Self-Directed Learner - the Three Pillar Model of Self-Directedness

Jennifer Gavriel, 2005-01-17 Self-directed learning is perhaps the Holy Grail of adult learning and for good reason. The orange juice business Marcos Fava Neves, Vinicius Gustavo

Trombin, Frederico Fonseca Lopes, Rafael Kalaki, Patrícia Milan, 2012-04-07 The orange juice chain is unique, probably a sui generis commodity. Although several countries produce oranges and juices, two regions in the world are the responsible for around 80% of the production. These are the states of Sao Paulo in Brazil and Florida in the USA. Although the emerging countries are growing in production, the juice consumer is also concentrated in the USA and Europe where more than 90% of consumption takes place. The characteristics of this chain are so unique, that it makes a nice laboratory for academics and business people to exercise strategies, since risk is spread. Orange is a very sensitive plant, and fluctuations in production are notorious. The logistics of this chain are fascinating. The product travels great distances to reach the consumer in a generally safe and efficient way. The industry assets such as vessels and tanks are specific. By reading this book, business people, academics and chain practitioners have an opportunity to understand this chain. and can analyse all of its numbers and economics and exercise strategy building. This is needed since the orange juice market is a stable market in the world, growing only 1% per year, and the production costs of this chain are rising fast, due to structural changes faced by world food and agribusiness companies i.e. labour costs, energy costs, land costs, environmental costs and others. The book will be of interest to all those concerned with agri food chains.

U.S. Government Printing Office Style Manual Gpo Style Board, Robert C. Tapella, 2010-09-01 This, the 30th edition of the United States Government Printing Office Style Manual, is the first revision to this authoritative style manual since 2002. The GPO Style Manual, as it is popularly known, is issued under the authority of section 1105 of Title 44 U.S.C., which requires the Public Printer, as head of the GPO to determine the form and style in which the printing...ordered by a department is executed...having proper regard to economy, workmanship, and the purposes for which the work is needed. The Manual is prepared by the GPO Style Board, composed of proofreading, printing, and Government documents specialists from within GPO, where all congressional publications, and many other key Federal Government documents are prepared. The first GPO Style Manual appeared in 1894. It was developed originally as a printer's stylebook to standardize word and type treatment and remains so today. Through successive editions, however, the GPO Style Manual has come to be widely recognized by writers and editors both within and outside the Federal Government as one of the most useful resources in the editorial arsenal. This new, revised version of the GPO Style Manual has been thoroughly redesigned to make it more modern and easier to read, and the content has been updated generally throughout in keeping with current usage.

It takes stock of the achievements and obstacles towards sustainability over the last 20 years, and proposes new ideas and changes to create a more sustainable future. Students, academics and professionals interested in the notion of using a green economy and good governance to achieve sustainable development and poverty eradication are recommended to read this book.

"Kill the Chicken to Scare the Monkeys" , 2017 Singapore ... is a repressive place where the government severely restricts what can be said, published, performed, read, or watched. Those who criticize the government or the judiciary, or publicly discuss race and religion, frequently find themselves facing criminal investigations and charges, or civil defamation suits and crippling damages. Public demonstrations and other peaceful assemblies are severely limited, and failure to comply with detailed restrictions on what can be said and who can participate in public gatherings often leads to arrest. [This report] documents the Singaporean government's use of its overbroad criminal laws, oppressive regulatory restrictions, access to funding, and civil lawsuits to control and limit critical speech or peaceful protest. It provides an in-depth analysis of the laws and regulations used to suppress speech and assembly, including the Public Order Act, the Sedition Act, the Broadcasting Act, various Penal Code provisions, and laws on criminal contempt, and examines how those provisions have been used against peaceful activists. ... Human Rights Watch calls on Singapore's government to drop all pending charges and investigations against those being prosecuted for the exercise of their freedom of expression or their right to participate in peaceful assemblies, and amend or repeal relevant laws to bring them into line with international human rights standards.--Back cover.

Hazard Mitigation Grant Program Desk Reference (FEMA 345) Federal Emergency Management Agency, 2013-02-01 FEMA's Hazard Mitigation Grant Program is a powerful resource in the combined effort by Federal, State, and local government, as well as private industry and homeowners, to end the cycle of repetitive disaster damage. The Robert T. Stafford Disaster Relief and Emergency Assistance Act was passed on November 23, 1988, amending Public Law 93-288, the Disaster Relief Act of 1974. The Stafford Act included Section 404, which established the Hazard Mitigation Grant Program. In 1993, the Hazard Mitigation and Relocation Act amended Section 404 to increase the amount of HMGP funds available and the cost-share to 75 percent Federal. This amendment also encouraged the use of property acquisition and other non-structural flood mitigation measures. In an effort to streamline HMGP delivery, FEMA encourages States to develop their mitigation programs before disaster strikes. States are adopting a more active HMGP management role. Increased capabilities may include: Conducting comprehensive all-hazard mitigation planning prior to disaster events; Providing applicants technical assistance on sound mitigation techniques and hazard mitigation policy and procedures; Coordinating mitigation programs through interagency teams or councils. Conducting benefit-cost analyses; and Preparing National Environmental Policy Act reviews for FEMA approval. States that integrate the HMGP with their frequently updated State Administrative and Hazard Mitigation Plans will create cohesive and effective approaches to loss reduction. This type of coordinated approach minimizes the distinction between "predisaster" and "post-disaster" time periods, and instead produces an ongoing mitigation effort. Hazard mitigation is any sustained action taken to reduce or eliminate long-term risk to people and property from natural hazards and their effects. A key purpose of the HMGP is to ensure that the opportunity to take critical mitigation measures to protect life and property from future disasters is not lost during the recovery and reconstruction process following a disaster. Program grant funds available under Section 404 of the Stafford Act provide States with the incentive and capability to implement mitigation measures that previously may have been infeasible. The purpose of this Desk Reference is to: Provide comprehensive information about FEMA's Hazard Mitigation Grant Program (HMGP); Increase awareness of the HMGP as an integral part of statewide hazard mitigation efforts; and Encourage deeper commitments and increased responsibilities on the part of all States and communities to reduce damage and losses from natural disasters. This Desk Reference is organized to simplify program information and assist the reader with practical guidance for successful participation in the program. Lists of program-related acronyms and definitions are included, along with appendices that amplify selected aspects of the HMGP. This Desk Reference is organized into 14 sections, each of which presents a major HMGP subject area. In each section, information is presented on the right side of the page. In several sections, job aids containing supplemental material are provided. The job aids for each section can be found at the end of the section. At the front of each section, there is a detailed table of contents to help you locate specific information.
