Fieldwork in Tourism Michael C. Hall, 2010-10-04 The inherent mobility of tourists and consequent relative ephemerality of contact between the visitor and the visited tourism phenomenon have specific characteristics that challenge the usual fieldwork practices of the social and physical sciences. Such conditions create specific concerns for the tourism researcher in terms of their positionality, relationality, accessibility, ethics, reflexivity, and methodological appropriateness. *Fieldwork in Tourism* is the first book to focus on this extremely significant component of contemporary tourist research and provides hands-on approaches to conducting tourism fieldwork in a range of settings, exploring the methodological considerations and offering strategies to mitigate these. The book also discusses how fieldwork affects researchers personally and what happens to field relationships. Divided into five sections, each with an introduction and a guide to further reading, the chapters cover the context of fieldwork, research relationships, politics and power, the position of the researcher in the field, research methods and processes, including virtual fieldwork, and the relationships between being a tourist and doing fieldwork. The concluding chapter suggests that the link between tourism and fieldwork perhaps offers greater insights into understanding creative fieldwork than may be imagined. This book incorporates a rich and diverse set of fieldwork experiences, insights and reflections on conducting fieldwork in different settings, the problems that emerge, the solutions that were developed, and the

realities of being 'in the field'. *Fieldwork in Tourism* is an essential guide for Tourism higher level students, academics and researchers embarking on research in this field.

Emerging Technologies and International Security Reuben

Steff,Joe Burton,Simona R. Soare,2020-11-25 This book offers a multidisciplinary analysis of emerging technologies and their

impact on the new international security environment across three levels of analysis. While recent technological developments, such as Artificial Intelligence (AI), robotics and automation, have the potential to transform international relations in positive ways, they also pose challenges to peace and security and raise new ethical, legal and political questions about the use of power and the role of humans in war and conflict. This book makes a contribution to these debates by considering emerging technologies across three levels of analysis: (1) the international system (systemic level) including the balance of power; (2) the state and its role in international affairs and how these technologies are redefining and challenging the state's traditional roles; and (3) the relationship between the state and society, including how these technologies affect individuals and non-state actors. This provides specific insights at each of these levels and generates a better understanding of the connections between the international and the local when it comes to technological advance across time and space. The chapters examine the implications of these technologies for the balance of power, examining the strategies of the US, Russia, and China to harness AI, robotics and automation (and how their militaries and private corporations are responding); how smaller and less powerful states and non-state actors are adjusting; the political, ethical and legal implications of AI and automation; what these technologies mean for how war and power is understood and utilized in the 21st century; and how these technologies diffuse power away from the state to society, individuals and non-state actors. This volume will be of much interest to students of international security, science and technology studies, law, philosophy, and international relations.

Exploring the Journey Through Life Daniel

Finn, 2009-08-04 arts and philosophy

Eloquence of Effort Indar Maharaj, 2017-09-27 The Eloquence of Effort echoes the merits of conscientious toil. It provides an

insightful look into the benefits of sustained socio-economic effort. To convincingly argue that dreams are only achievable through mind-numbing toil, the writer draws heavily from biographical, philosophical, economic, religious, historical and scientific data. Work is the mission; the multiple rewards are the byproducts, he argues. Moreover, the pleasure resides in the effort, not the results. Against the dark backdrop of malignancies inflicted on society by unrepentant leeches, the benefit of conscientious work is sharply focused. The reader is imperceptibly nudged into a higher plane of reality: namely, purposeful effort, regardless of its nature, is supremely rewarding. The writer forces the realization that regardless of the outcome, effort is never wasted. Conversely, indolence is the bane of progress and the root cause of economic crimes. Indeed, corruption in all its diabolical forms is nothing but laziness masquerading as diligence and embraced by vacuous minds craving the most for the least. Analysis of biographical data sustains the thesis that industry prolongs life; inaction truncates it – a finding supported by the second Law of Thermodynamics. The persuasiveness of the arguments is supported by a wealth of references. Together they form the final authority; they have given resonance to the arguments contained herein.

House of Commons - Scottish Affairs Committee: Land Reform in Scotland: Interim Report - HC 877 Great Britain: Parliament: House of Commons: Scottish Affairs Committee, Ian Davidson, 2014-03-20 This report concludes that any government which is serious about land reform needs full and clear information on existing land ownership and values made widely available. Scotland lags behind most comparable European countries in providing such data, and the Committee calls on the Scottish and UK Governments to address this as a priority. Scotland is also behind other countries in terms of the openness and ease of land transactions. Land reform is an important, neglected and intensely political area of public policy and the

Committee is expanding this enquiry more widely than originally envisaged. Evidence is sought from interested parties on a number of topics including: state aid; the Scottish Government's Land Reform Review Group; community land ownership; and opaque and indirect ownership by front companies, trusts and offshore entities

Elohim III: The Return Kerry L. Barger, 2014-06-13 Elohim III: The Return is the third and final book in this author's controversial Elohim series, which began with Elohim: Ancient Science Fiction or Biblical God? and was recently followed by Elohim II: Ascension of the King. World War III has begun! According to a current list of reported UFO sightings, few documented reports exist from the time of Classical antiquity until the 1940's. However, after the siege and destruction of Jerusalem in 70 A.D., the historian Josephus wrote the following: ...Thus there was a star resembling a sword, which stood over the city... at the ninth hour of the night, so great a light shone round the altar and the holy house, that it appeared to be bright day time; which lasted for half an hour... before sunseting, chariots and troops of soldiers in their armor were seen running about among the clouds, and surrounding of cities.

Bad Faith Carmen Callil, 2008-12-10 Bad Faith tells the story of one of history's most despicable villains and con men—Louis Darquier de Pellepoix, Nazi collaborator and “Commissioner for Jewish Affairs” in France's Vichy government. Darquier set about to eliminate Jews in France with brutal efficiency, delivering 75,000 men, women, and children to the Nazis and confiscating Jewish property, which he used for his own gain. Carmen Callil's riveting and sometimes darkly comic narrative reveals Darquier as a self-obsessed fantasist who found his metier in propagating hatred—a career he denied to his dying day—and traces the heartrending consequences for his daughter Anne of her poisoned family legacy. A brilliant meld of epic sweep and psychological insight, Bad Faith is a startling history of our times.

A Survey of the Forensic Sciences Randall Skelton,2011 Exploring the broad spectrum of the forensic sciences practiced both inside and outside of a crime lab, this text investigates forensic sciences that are used both in criminal and civil contexts, along with non-traditional and new applications such as occupational fraud, wildlife protection, and homeland security. The approach is unifying in that it seeks to explain the underlying theoretical and practical concepts that unite all forensic science

as well as the individual challenges of each of the forensic sciences. The scientific concepts that underly the forensic sciences are explained in a manner that is understandable by readers without a science background.
