The Post-Soviet Russian Media Birgit Beumers, Stephen Hutchings, Natalia Rulyova, 2008-11-26 This book explores developments in the Russian mass media since the collapse of the USSR in 1991. Complementing and building upon its companion volume, Television and Culture in Putin's Russia: Remote Control, it traces the tensions resulting from the effective return to state-control under Putin of a mass media privatised and accorded its first, limited, taste of independence in the Yeltsin period. It surveys the key developments in Russian media since 1991, including the printed press, television and new media, and investigates the contradictions of the post-Soviet media market that have affected the development of the media sector in recent years. It analyses the impact of the Putin presidency, including the ways in which the media have constructed Putin's image in order to consolidate his power and their role in securing his election victories in 2000 and 2004. It goes on to consider the status and function of journalism in post-Soviet Russia, discussing the conflict between market needs and those of censorship, the gulf that has arisen separating journalists from their audiences. The relationship between television and politics is examined, and also the role of television as entertainment, as well as its role in nation building and the projection of a national identity. Finally, it appraises the increasingly important role of new media and the internet. Overall, this book is a detailed investigation of the development of mass media in Russia since the end of Communism and the collapse of the Soviet Union.

European Legal Cultures in Transition Åse B. Grødeland, William L. Miller, 2015-07-24 Are national legal cultures in Europe converging or diverging as a result of the pressures of European legal integration? Åse B. Grødeland and William L. Miller address this question by exploring the attitudes and perceptions of the general public and law professionals in five European countries: England, Norway, Bulgaria, Poland and the Ukraine. Presenting new findings, they challenge the established view that ordinary citizens and people working professionally with the law have different legal cultures. Their research in fact reveals that the attitudes of citizens in Eastern and Western Europe towards 'law-in-principle' are remarkably similar, whereas perceptions of 'law-in-practice' differ by country and often correlate with GDP per capita and country ranking in rule of law indices. Grødeland and Miller's innovative methodological approach will appeal to both experts and non-experts with an interest in legal culture, European integration, or European elite and public opinion.

The PKK Doctor Paul White, 2015-08-15 The Kurdistan Workers' Party (PKK) is infamous for its violence. The struggle it has waged for Kurdish independence in southeastern Turkey has cost in excess of 40,000 lives since 1984. A less-known fact, however, is that the PKK now embraces a non-violent end to the conflict, with its leader Abdullah Öcalan having ordered a ceasefire and engaging in a negotiated peace with the Ankara government. Whether these tentative attempts at peacemaking mean an end to the bloodshed remains to be seen, but either way the ramifications for Turkey and the wider region are potentially huge. Charting the ideological evolution of the PKK, as well as its origins, aims and structure, Paul White provides the only authoritative and up-to-date analysis of one of the most important non-state political players in the contemporary Middle East.

Kurdish Awakening Ofra Bengio, 2014-11-15 Kurdish Awakening examines key questions related to Kurdish nationalism and identity formation in Syria, Iraq, Iran, and Turkey. The world's largest stateless ethnic group, Kurds have steadily grown in importance as a political power in the Middle East, particularly in light of the Arab Spring. As a result, Kurdish issues—political, cultural, and historical alike—have emerged as the subject of intense scholarly interest. This book provides fresh ways of understanding the historical and sociopolitical underpinnings of the ongoing Kurdish awakening and its already significant impact on the region. Rather than focusing on one state or angle, this anthology fills a gap in the literature on the Kurds by providing a panoramic view of the Kurdish homeland's various parts. The volume focuses on aspects of Kurdish nationalism and identity formation not addressed elsewhere, including perspectives on literature, gender, and constitution making. Further, broad thematic essays include a discussion of the historical experiences of the Kurds from the time of their Islamization more than a millennium ago up until the modern era, a comparison of the Kurdish experience with other ethno-national movements, and a treatment of the role of tribalism in modern nation building. This collection is unique in its use of original sources in various languages. The result is an analytically rich portrayal that sheds light on the Kurds' prospects and the challenges they confront in a region undergoing sweeping upheavals.

Facing Trauma in Contemporary American Literary Discourse Laura Virginia Castor, 2019-10-08 Trauma has always been part of the American collective experience, but only since September 11, 2001 has it been acknowledged on a

widespread scale. Most people will experience some form of trauma during their lifetime, but in contemporary American culture, it is often understood as a problem to be blamed on someone, fought, or repressed entirely. Despite burgeoning trauma studies, popular responses to trauma – from the media to politics – produce ever more aggression and fear. This book responds to this growing awareness through literary analyses of texts by Louise Erdrich, Siri Hustvedt, Melanie Thernstrom, Nicole Krauss, Joy Harjo, Linda Hogan, Jhumpa Lahiri, and Toni Morrison. Considered separately, each chapter provides a lens into a historically-situated trauma and the process of renegotiating it. Read together, they function as voices in an ongoing conversation that affirms the power of narrative. A good story can become a space for curiosity in the face of trauma and uncertainty. A story opens imaginative possibilities for asking, “in what ways can readers bring more awareness to the benefits of seeing our planetary interdependence in the midst of global polarization?” The readings of novels, autobiographical texts, and poems here suggest how this question is among the most valuable we can ask in the early 21st century.
