The Science of Citizen Science Katrin Vohland, Anne Land-zandstra, Luigi Ceccaroni, Rob Lemmens, Josep Perelló, Marisa Ponti, Roeland Samson, Katherin Wagenknecht, 2021 This open access book discusses how the involvement of citizens into scientific endeavors is expected to contribute to solve the big challenges of our time, such as climate change and the loss of biodiversity, growing inequalities within and between societies, and the sustainability turn. The field of citizen science has been growing in recent decades. Many different stakeholders from scientists to citizens and from policy makers to

environmental organisations have been involved in its practice. In addition, many scientists also study citizen science as a research approach and as a way for science and society to interact and collaborate. This book provides a representation of the practices as well as scientific and societal outcomes in different disciplines. It reflects the contribution of citizen science to societal development, education, or innovation and provides an overview of the field of actors as well as on tools and guidelines. It serves as an introduction for anyone who wants to get involved in and learn more about the science of citizen science.

United Nations System Funding Marjorie Ann Browne, 2010–11 The debate over U.N. funding focuses on several questions, including: (1) What is the appropriate level of U.S. funding for U.N. system operations and programs? (2) What U.S. funding actions are most likely to produce a positive continuation of U.N. system reform efforts? For more than 60 years, the U.S. has been the single largest financial contributor to the U.N. system, supplying in recent years 22% of most U.N. agency budgets. This report tracks

the process by which Congress provides the funding for U.S. assessed contributions to the regular budgets of the U.N, its agencies, and U.N. peacekeeping operations, as well for U.S. voluntary contributions to U.N. system programs and funds. Basic info. is provided to help the reader understand this process. Illus.

Radon - Nuclear Fallout in Your Home Al Susoeff, Jr.,2009-08-28 The EPA has recommended that all homes in the US be tested for the presence of Radon. Do you have this odorless, colorless, and DEADLY gas in your home? There is no way to know without testing, and although testing is relatively inexpensive, it can be tedious to do and if not done very precisely, can skew the results. This book not only covers what exactly radon is, but also how it enters your home, why it is dangerous to your health, how to test for it, and how to remove it if you find that it is present. And, as if that's not enough, we have even added a few EPA regulations used with permission from the Federal Government at no extra charge!
