Strategic System Assurance and Business Analytics P. K. Kapur, Ompal Singh, Sunil Kumar Khatri, Ajit Kumar Verma, 2020-06-19 This book systematically examines and quantifies industrial problems by assessing the complexity and safety of large systems. It includes chapters on system performance management, software reliability assessment, testing, quality management, analysis using soft computing techniques, management analytics, and business analytics, with a clear focus on exploring real-world business issues.

Through contributions from researchers working in the area of performance, management, and business analytics, it explores the development of new methods and approaches to improve business by gaining knowledge from bulk data. With system performance analytics, companies are now able to drive performance and provide actionable insights for each level and for every role using key indicators, generate mobile-enabled scorecards, time series-based analysis using charts, and dashboards. In the current dynamic environment, a viable tool known as multi-criteria decision analysis (MCDA) is increasingly being adopted to deal with complex business decisions. MCDA is an important decision support tool for analyzing goals and providing optimal solutions and alternatives. It comprises several distinct techniques, which are implemented by specialized decision-making packages. This book addresses a number of important MCDA methods, such as DEMATEL, TOPSIS, AHP, MAUT, and Intuitionistic Fuzzy MCDM, which make it possible to derive maximum utility in the area of analytics. As such, it is a valuable resource for researchers and academicians, as well as practitioners and business experts.

Data Driven Approach Towards Disruptive Technologies T P Singh, Ravi Tomar, Tanupriya Choudhury, Thinagaran Perumal, Hussain Falih Mahdi, 2021-04-06 This book is a compilation of peer-reviewed papers presented at the International Conference on Machine Intelligence and Data Science Applications, organized by the School of Computer Science, University of

Petroleum & Energy Studies, Dehradun, India, during 4–5 September 2020. The book addresses the algorithmic aspect of machine intelligence which includes the framework and optimization of various states of algorithms. Variety of papers related to wide applications in various fields like data-driven industrial IoT, bioinformatics, network and security, autonomous computing and various other aligned areas. The book concludes with interdisciplinary applications like legal, health care, smart society, cyber-physical system and smart agriculture. All papers have been carefully reviewed. The book is of interest to computer science engineers, lecturers/researchers in machine intelligence discipline and engineering graduates.

Artificial Intelligence on Fashion and Textiles

Wai Keung Wong, 2018-10-13 The book includes the Proceedings of the Artificial Intelligence on Fashion and Textiles conference 2018 which provides state-of-the-art techniques and applications of AI in the fashion and textile industries. It is essential reading for scientists, researchers and R&D professionals working in the field of AI with applications in the fashion and textile industry; managers in the fashion and textile enterprises; and anyone with an interest in the applications of AI. Over the last two decades, with the great advancement of computer technology, academic research in artificial intelligence (AI) and its applications in fashion and textile supply chain has been becoming a very hot topic and has received greater attention from both academics and industrialists.

A number of AI-related techniques has been successfully employed and proven to handle the problems including fashion sales forecasting, supply chain optimization, planning and scheduling, textile material defect detection, fashion and textile image recognition, fashion image and style retrieval, human body modeling and fitting, etc.

Proceedings of the International Conference on Soft Computing Systems L. Padma Suresh, Bijaya Ketan Panigrahi, 2015-12-07 The book is a collection of high-quality peer-reviewed research papers presented in International Conference on Soft Computing Systems (ICSCS 2015) held at Noorul Islam Centre for Higher Education, Chennai, India. These research papers provide the latest developments in the emerging areas of Soft Computing in Engineering and Technology. The book is organized in two volumes and discusses a wide variety of industrial, engineering and scientific applications of the emerging techniques. It presents invited papers from the inventors/originators of new applications and advanced technologies.

Tamam Shud Kerry Greenwood, 2013-01-01 In 1948 a man was found dead on an Adelaide beach. Well-dressed and unmarked, he had a half-smoked cigarette by his side, but no identity documents. Six decades on we don't know who he was, how he got there or how he died. Somerton Man remains one of Australia's most mysterious cold cases. Yet it is the bizarre details of this case that make it the stuff of a spy novel. The missing labels from all his clothing. The tiny piece of paper with the

words 'Tamam Shud' found sewn into the lining of the dead man's coat. A mysterious code found etched inside the very book of Persian poetry from which this note was torn. Brimming with facts that are stranger than fiction, the case has intrigued novelist Kerry Greenwood for almost her whole life. She goes on a journey into her own past to try to solve this crime, uncovering a new way of writing about true crime – and herself – as she goes.

Empirical Studies on Economics of Innovation, Public Economics and Management Mehmet Huseyin Bilgin, Hakan Danis, Ender Demir, Ugur Can, 2017-03-06 This volume presents selected papers from the 18th Eurasia Business and Economics Society (EBES) Conference, with major emphasis placed on highlighting the latest research developments in the economics of innovation, public economics, and management. The articles in the volume also address more specialized topics such as luxury fashion, weather derivatives, health management, islamic bonds, and life satisfaction, among others. The majority of the articles focus on phenomena observed in the Middle East and North Africa (MENA) region and South Asia, representing a unique contribution to understanding contemporary research challenges from a different perspective.

Boyd Robert Coram, 2002-11-21 John Boyd may be the most remarkable unsung hero in all of American military history. Some remember him as the greatest U.S. fighter pilot ever -- the man who, in simulated air-to-air combat, defeated every challenger in less than forty seconds. Some recall

him as the father of our country's most legendary fighter aircraft -- the F-15 and F-16. Still others think of Boyd as the most influential military theorist since Sun Tzu. They know only half the story. Boyd, more than any other person, saved fighter aviation from the predations of the Strategic Air Command. His manual of fighter tactics changed the way every air force in the world flies and fights. He discovered a physical theory that forever altered the way fighter planes were designed. Later in life, he developed a theory of military strategy that has been adopted throughout the world and even applied to business models for maximizing efficiency. And in one of the most startling and unknown stories of modern military history, the Air Force fighter pilot taught the U.S. Marine Corps how to fight war on the ground. His ideas led to America's swift and decisive victory in the Gulf War and foretold the terrorist attacks of September 11, 2001. On a personal level, Boyd rarely met a general he couldn't offend. He was loud, abrasive, and profane. A man of daring, ferocious passion and intractable stubbornness, he was that most American of heroes -- a rebel who cared not for his reputation or fortune but for his country. He was a true patriot, a man who made a career of challenging the shortsighted and self-serving Pentagon bureaucracy. America owes Boyd and his disciples -- the six men known as the Acolytes -- a great debt. Robert Coram finally brings to light the remarkable story of a man who polarized all who knew him, but who left a legacy that will influence the military -- and all of America --

for decades to come . . .

The Semantic Web - ISWC 2004 Sheila A. McIlraith, Dimitris Plexousakis, Frank van Harmelen, 2004-10-19 The 3rd International Semantic Web Conference (ISWC 2004) was held November 7–11, 2004 in Hiroshima, Japan. If it is true what the proverb says: “Once by accident, twice by habit, three times by tradition,” then this third ISWC did indeed firmly establish a tradition. After the overwhelming interest in last year’s conference at Sanibel Island, Florida, this year’s conference showed that the Semantic Web is not just a one-day wonder, but has established itself firmly on the research agenda. At a time when special interest meetings with a Semantic Web theme are springing up at major conferences in numerous areas (ACL, VLDB, ECAI, AAAI, ECML, WWW, to name but a few), the ISWC series has established itself as the primary venue for Semantic Web research. Response to the call for papers for the conference continued to be strong. We solicited submissions to three tracks of the conference: the research track, the industrial track, and the poster track. The research track, the premier venue for basic research on the Semantic Web, received 205 submissions, of which 48 were accepted for publication. Each submission was evaluated by three program committee members whose reviews were coordinated by members of the senior program committee. Final decisions were made by the program co-chairs in consultation with the conference chair and the senior program committee. The industrial track, soliciting papers describing industrial research on the Semantic Web, received

22 submissions, of which 7 were accepted for publication.

Proceedings of the International Conference on Transformations in Engineering Education R. Natarajan, 2014-10-22 This book comprises the proceedings of the International Conference on Transformations in Engineering Education conducted jointly by BVB College of Engineering & Technology, Hubli, India and Indo US Collaboration for Engineering Education (IUCEE). This event is done in collaboration with International Federation of Engineering Education Societies (IFEES), American Society for Engineering Education (ASEE) and Global Engineering Deans' Council (GEDC). The conference is about showcasing the transformational practices in Engineering Education space.

Digital Business Veselin Rakocevic, Katarina Stanoevska-Slabeva, Luigi Telesca, 2010-01-04 This volume contains the proceedings of the First International ICST Conference on Digital Business (DigiBiz 2009), hosted by City University London in London, UK. This annual event had the main objective to stimulate and disseminate research results and experimentation on future Digital Business to a wider multidisciplinary forum that would allow the participants to cross the boundaries between research and business. The scientific offering in e-business, e-commerce, and ICT in general is quite broad and spans many different research themes, involving several communities and methodologies. The growth and dynamic nature of these research themes pose both challenges and opportunities. The challenges are

in having scientists and practitioners talk to each other: despite the fact that they work on similar problems they often use very different languages in terms of research tools and approaches. The opportunities on the other hand arise when scientists and practitioners engage in multidisciplinary discussions leading to new ideas, projects and products.

Major Challenges Facing Higher Education in the Arab World: Quality Assurance and Relevance Adnan Badran, Elias Baydoun, John R. Hillman, 2019-03-25

This book focuses on two crucial issues that need to be addressed as a matter of urgency by universities in the Arab region, namely (a) conducting independent assessments of the quality of their teaching, research, administration, governance, and planning; and (b) determining the relevance of their teaching, research, and societal impacts. Although well-established around the world in manufacturing industries and private-sector service industries, including the research and commercialisation arms of the major universities and research institutes, it is only in recent years that quality-assurance (QA) assessments have started to be applied to most aspects education. Several Arab universities are adopting various forms of QA but some variants are little more than bureaucratic “box-ticking” exercises with minimal commitment by staff to the ultimate aim of continuing self-improvement. This book will be of interest to senior management at faculty and departmental level and above in all Arab universities specifically, and more generally in Islamic institutions of higher education.

Senior management in other universities, especially in the developing world will benefit from its analyses and recommendations.

The Unknown Man G M Feltus,2010 One of South Australia's most baffling mysteries. On the 1st December 1948, the body of a man was found on Somerton Beach, with no identification and the name tags removed from his clothing. A validated bus ticket and a torn paper with the words 'Tamam Shud' were the only clues.

Educational Media and Technology Yearbook Robert Maribe Branch,Hyewon Lee,Sheng Shiang Tseng,2019-11-06 This is Volume 42 of the Educational Media and Technology Yearbook. For the past 40 years, our Yearbook has contributed to the field of Educational Technology in presenting contemporary topics, ideas, and developments regarding diverse technology tools for educational purposes. Our Yearbook has inspired researchers, practitioners, and teachers to consider how to develop technological designs and develop curricula and instruction integrating technology to enhance student learning, teach diverse populations across levels with effective technology integration, and apply technology in interactive ways to motivate students to engage in course content. In addition, Volume 42 features the Virtual Reality (VR) and Augmented Reality (AR) research and educational use cases, organized and coordinated by Vivienne and David. This section provides evidence that the affordances of AR, VR, and mixed reality, defined as an immersive multi-platform experience reality (XR), have begun to make indelible changes in teaching and learning

in the United States. XR's recent developments stimulated the editors to propose a special edition to mark the interoperability of immersive technology to push the boundaries of human curiosity, creativity, and problem solving. After years of incremental development, XR has reached a critical level of investment, infrastructure, and emerging production. The chapters included in this section illustrate how XR can push user inquiry, engagement, learning, and interactivity to new levels within physical and digital contexts.

Security in Computing and Communications Sabu M. Thampi, Gregorio Martinez Perez, Ryan Ko, Danda B. Rawat, 2020-04-25 This book constitutes the refereed proceedings of the 7th International Symposium on Security in Computing and Communications, SSCC 2019, held in Trivandrum, India, in December 2019. The 22 revised full papers and 7 revised short papers presented were carefully reviewed and selected from 61 submissions. The papers cover wide research fields including cryptography, database and storage security, human and societal aspects of security and privacy.

Smart Objects and Technologies for Social Good Ombretta Gaggi, Pietro Manzoni, Claudio Palazzi, Armir Bujari, Johann M. Marquez-Barja, 2017-07-14 This book constitutes the proceedings of the Second EAI international Conference on Smart Objects and Technologies for Social Good, GOODTECHS 2016, held in Venice, Italy, November 30 – December 1, 2016. The 38 revised full papers were carefully reviewed and selected from 73 submissions. The papers reflect

the design, implementation, deployment, operation and evaluation of smart objects and technologies for social good. A social good can be understood as a service that benefits a large number of people in a most possible way. Some classic examples are healthcare, safety, environment, democracy, and human rights, or even art, entertainment, and communication.

The Hacker's Dictionary Eric S.

Raymond, 2017-06-19 This document is a collection of slang terms used by various subcultures of computer hackers. Though some technical material is included for background and flavor, it is not a technical dictionary; what we describe here is the language hackers use among themselves for fun, social communication, and technical debate.

Rigged Dean Baker, 2016-10-06 There has been an enormous upward redistribution of income in the United States in the last four decades. In his most recent book, Baker shows that this upward redistribution was not the result of globalization and the natural workings of the market. Rather, it was the result of conscious policies that were designed to put downward pressure on the wages of ordinary workers while protecting and enhancing the incomes of those at the top. Baker explains how rules on trade, patents, copyrights, corporate governance, and macroeconomic policy were rigged to make income flow upward.

Issues in Law and Public Policy on Contract Labour in India Pankaj Kumar, Jaivir

Singh, 2018-09-14 This book discusses the increasing use of contract labour in India that has accompanied attempts to liberalise the

economy. After briefly examining Indian labour laws and public policy, it juxtaposes the country's labour market practices with international labour standards. The questions that are raised are then explored through a series of empirical studies investigating the use of contract labour in a variety of industries and locations, manifesting a wide-spectrum of concerns including labour standards, productivity and employment relations. The set of comparative research studies within India are supplemented with a field study from the Shenzhen and Guangzhou industrial regions of South China, which are in an advanced stage of industrial development. The unprecedented inflow of capital into China has captivated many developing countries, including India, which has gone on to mimic similar strategies particularly in terms of labour market deregulation. In this context, a set of crucial questions arise – can enforcing 'labour market flexibility' in itself provide the required impetus for a nation's industrial growth? Is the Chinese success in becoming the major destination for foreign direct investments (FDIs) a consequence of a flexible labour regime or is there some other concealed strength to be found in Chinese labour market institutions? In particular it needs to be noted that after double-digit growth for more than 25 consecutive years, China has recognised some of the fallacy of its development path and in 2008 adopted fairly stringent labour laws, which now regulate its labour market. This Chinese trajectory perhaps has lessons for India and other countries that are

still struggling on the liberal path. In particular, the Chinese example helps put the Indian field studies in perspective and provides insights into India-specific policy recommendations that could also be useful for the developing world. The book concludes with the observation that where production entails long-term relationships, the interests of both the employer and the workers need to be maintained sustainably. As the title suggests, the book provides takeaways, not only for academics and researchers working in this field but also for lawyers, consultants, politicians, bureaucrats, and policymakers.

This book delves into Strange Windows 8 Gadgets Error 2937.htm. Strange Windows 8 Gadgets Error 2937.htm is a vital topic that must be grasped by everyone, from students and scholars to the general public. The book will furnish comprehensive and in-depth insights into Strange Windows 8 Gadgets Error 2937.htm, encompassing both the fundamentals and more intricate discussions.

1. This book is structured into several chapters, namely:
 - Chapter 1: Introduction to Strange Windows 8 Gadgets Error 2937.htm
 - Chapter 2: Essential Elements of Strange Windows 8 Gadgets Error 2937.htm
 - Chapter 3: Strange Windows 8 Gadgets Error 2937.htm in Everyday Life

- Chapter 4: Strange Windows 8 Gadgets Error 2937.htm in Specific Contexts
 - Chapter 5: Conclusion
2. In chapter 1, this book will provide an overview of Strange Windows 8 Gadgets Error 2937.htm. This chapter will explore what Strange Windows 8 Gadgets Error 2937.htm is, why Strange Windows 8 Gadgets Error 2937.htm is vital, and how to effectively learn about Strange Windows 8 Gadgets Error 2937.htm.
 3. In chapter 2, the author will delve into the foundational concepts of Strange Windows 8 Gadgets Error 2937.htm. This chapter will elucidate the essential principles that must be understood to grasp Strange Windows 8 Gadgets Error 2937.htm in its entirety.
 4. In chapter 3, the author will examine the practical applications of Strange Windows 8 Gadgets Error 2937.htm in daily life. This chapter will showcase real-world examples of how Strange Windows 8 Gadgets Error 2937.htm can be effectively utilized in everyday scenarios.
