*Tamam Shud* Kerry Greenwood, 2013-01-01 In 1948 a man was found dead on an Adelaide beach. Well-dressed and unmarked, he had a half-smoked cigarette by his side, but no identity documents. Six decades on we don't know who he was, how he got there or how he died. Somerton Man remains one of Australia's most mysterious cold cases. Yet it is the bizarre details of this case that make it the stuff of a spy novel. The missing labels from all his clothing. The tiny piece of paper with the words 'Tamam Shud' found sewn into the lining of the dead man's coat. A mysterious code found etched inside the very book of Persian poetry from which this note was torn. Brimming with facts that are stranger than fiction, the case has intrigued novelist Kerry Greenwood for almost her whole life. She goes on a journey into her own past to try to solve this crime, uncovering a new way of writing about true crime - and herself - as she goes.

*Digital Business* Veselin Rakocevic, Katarina Stanojevska-Slabeva, Luigi Telesca, 2010-01-04 This volume contains the proceedings of the First International ICST Conference on Digital Business (DigiBiz 2009), hosted by City University London in London, UK. This annual event had the main objective to stimulate and disseminate research results and experimentation on future Digital Business to a wider multidisciplinary forum that would allow the participants to cross the boundaries between research and business. The scientific offering in e-business, e-commerce, and ICT in general is quite broad and spans many different research themes, involving several communities and methodologies. The growth and dynamic nature of these research themes pose both challenges and

opportunities. The challenges are in having scientists and practitioners talk to each other: despite the fact that they work on similar problems they often use very different languages in terms of research tools and approaches. The opportunities on the other hand arise when scientists and practitioners engage in multidisciplinary discussions leading to new ideas, projects and products.

Rigged Dean Baker, 2016-10-06 There has been an enormous upward redistribution of income in the United States in the last four decades. In his most recent book, Baker shows that this upward redistribution was not the result of globalization and the natural workings of the market. Rather, it was the result of conscious policies that were designed to put downward pressure on the wages of ordinary workers while protecting and enhancing the incomes of those at the top. Baker explains how rules on trade, patents, copyrights, corporate governance, and macroeconomic policy were rigged to make income flow upward.

Educational Media and Technology Yearbook Robert Maribe Branch, Hyewon Lee, Sheng Shiang Tseng, 2019-11-06 This is Volume 42 of the Educational Media and Technology Yearbook. For the past 40 years, our Yearbook has contributed to the field of Educational Technology in presenting contemporary topics, ideas, and developments regarding diverse technology tools for educational purposes. Our Yearbook has inspired researchers, practitioners, and teachers to consider how to develop technological designs and develop curricula and instruction integrating technology to enhance student learning, teach diverse populations across levels with effective technology integration, and apply technology in interactive ways to motivate students to engage in course content. In addition, Volume 42 features the Virtual Reality (VR) and Augmented Reality (AR) research and educational use cases, organized and coordinated by Vivienne and David. This section provides evidence that the affordances of AR, VR, and mixed reality, defined as an immersive multi-platform experience reality (XR), have begun to make indelible changes in teaching and learning in the United States. XR's recent developments stimulated the editors to propose a special edition to mark the interoperability of immersive technology to push the boundaries of human curiosity, creativity, and

problem solving. After years of incremental development, XR has reached a critical level of investment, infrastructure, and emerging production. The chapters included in this section illustrate how XR can push user inquiry, engagement, learning, and interactivity to new levels within physical and digital contexts.

**The Urban Fabric of Crime and Fear** Vania Ceccato, 2012-06-21 How does the city's urban fabric relate to crime and fear, and how is that fabric affected by crime and fear? Does the urban environment affect one's decision to commit an offence? Is there a victimisation-related inequality within cities? How do crime and fear interrelate to inequality and segregation in cities of developing countries? What are the challenges to planning cities which are both safe and sustainable? This book searches for answers to these questions in the nature of the city, particularly in the social interactions that take place in urban space distinctively guided by different land uses and people's activities. In other words, the book deals with the urban fabric of crime and fear. The novelty of the book is to place safety and security issues on the urban scale by (1) showing links between urban structure, and crime and fear, (2) illustrating how different disciplines deal with urban vulnerability to (and fear of) crime (3) including concrete examples of issues and challenges found in European and North American cities, and, without being too extensive, also in cities of the Global South.

**Dependable Computer Systems** Wojciech Zamojski, Janusz Kacprzyk, Jacek Mazurkiewicz, Jarosław Sugier, Tomasz Walkowiak, 2011-05-13 Dependability analysis is the recent approach to performance evaluation of contemporary systems which tries to cope with new challenges that are brought with their unprecedented complexity, size and diversity. Especially in case of computer systems and networks such evaluation must be based on multidisciplinary

approach to theory, technology, and maintenance of systems which operate in real (and very often unfriendly) environments. As opposed to “classic” reliability which focuses mainly on technical aspects of system functioning, dependability studies investigate the systems as multifaceted and sophisticated amalgamations of technical, information and also human resources. This monograph presents selected new developments in such areas of dependability research as mathematical models, evaluation of software, probabilistic assessment, methodologies, tools, and technologies. Intelligent and soft computing methods help to resolve fundamental problems of dependability analysis which are caused by the fact that in contemporary computer systems it is often difficult to find a relation between system elements and system events (the relation between reasons and results) and it is even more difficult to define strict mathematical models with “analytical” relationships between such phenomena.

*Machine Design* Robert L. Norton, 2019-08-31 For courses in Machine Design. An integrated, case-based approach to machine design *Machine Design: An Integrated Approach*, 6th Edition presents machine design in an up-to-date and thorough manner with an emphasis on design. Author Robert Norton draws on his 50-plus years of experience in mechanical engineering design, both in industry and as a consultant, as well as 40 of those years as a university instructor in mechanical engineering design. Written at a level aimed at junior-senior mechanical engineering students, the textbook emphasizes failure theory and analysis as well as the synthesis and design aspects of machine elements. Independent of any particular computer program, the book points out the commonality of the analytical approaches needed to design a wide variety of elements and emphasizes the use of computer-aided engineering as an approach to the design and analysis of these classes of problems. Also available with Mastering Engineering Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and often improves results for each student. Tutorial exercises and author-created tutorial videos walk students through how to solve a problem, consistent with the author's voice and approach from the book.
