**Uniting of Europe** Ernst B. Haas, Ernst Haas, Dr, 2020-11-15 The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the power to redirect the loyalties and expectations of political actors. In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a united Europe took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political scientists and historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

*Social Rights Judgments and the Politics of Compliance* Malcolm Langford, César Rodríguez-Garavito, Julieta Rossi, 2017-03-02 The past few decades have witnessed an explosion of judgments on social rights around the world. However, we know little about whether these rulings have been implemented. *Social Rights Judgments and the Politics of Compliance* is the first book to engage in a comparative study of compliance of social rights judgments as well as their broader effects. Covering fourteen different domestic and international jurisdictions, and drawing on multiple disciplines, it finds significant variance in outcomes and reveals both spectacular successes and failures in making social rights a reality on the ground. This variance is strikingly similar to that found in previous studies on civil rights, and the key explanatory factors lie in the political calculus of defendants and the remedial framework. The book also discusses which strategies have enhanced implementation, and focuses on judicial reflexivity, alliance building and social mobilisation.

Supplemented by useful pedagogical research tools and exemplars of both qualitative and quantitative action research studies, this new edition features chapters engaging with teaching excellence and analysing qualitative and quantitative research, additions to the resources section and a new preface focusing more explicitly on the ever-growing number of part-time academics. *Action Research in Teaching and Learning* combines a theoretical understanding of the scholarly literature with practical applications and is an essential, critical read for any individual teaching or undertaking action research.

**The Political Economy of the Hospital in History** Martin Gorsky, Margarita Vilar Rodríguez, Jerònia Pons Pons, 2020 The modern hospital is at once the site of healing, the locus of medical learning and a cornerstone of the welfare state. Its technological and infrastructural costs have transformed health services into one of today's fastest growing sectors, absorbing substantial proportions of national income in both developed and emerging economies. The aim of this book is to examine this growth in different countries, with a main focus on the twentieth century, and also with a backward glance to earlier shaping forces. It will explore the hospital's economic history, the relationship between public and private forms of provision, and the political context in which health systems were constructed. The collection advances the historical world map of different hospital models, ranging across Spain, Brazil, Germany, East and Central Europe, Britain, the United States and China. Collectively, these comparative cases illuminate the complexities involved in each country and bring new historical evidence to current debates on health care organisation, financing and reform.

Clinical Trials in Latin America: Where Ethics and Business Clash Nuria Homedes, Antonio Ugalde, 2013-11-29 The outsourcing of clinical trials to Latin America by the transnational innovative pharmaceutical industry began about twenty years ago. Using archival information and field work in Argentina, Brazil, Costa Rica, Mexico and Peru, the authors discuss the regulatory contexts and the ethical dimensions of human experimentation in the region. More than 80% of all clinical trials in the region take place in these countries, and the European Medicines Agency has defined them as priority countries in Latin America. The authors raise questions about the quality of data obtained from the trials and the violation of human rights during their implementation. Their findings are presented in this volume, the first in-depth analysis of clinical trials in the region.

**Pitfalls & Pipelines** Abigail Anongos,2012 Indigenous peoples have suffered disproportionately from the effects of extractive industries on their lands and livelihoods, including environmental degradation, human rights violations, and dispossession. Although the abuses have been ongoing, there has been a growing assertion of the rights of indigenous peoples to decide their own development paths, which frequently calls for the rejection of large-scale extractive projects. Based primarily on the proceedings of an International Conference on Extractive Industries and Indigenous Peoples that took place in Manila in March 2009, this book thematically explores the nature of the problem, reviews recent developments and analyses the strategies employed at local, national, and international levels.
