Uniting of Europe Ernst B. Haas, Ernst Haas, Dr, 2020-11-15 The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the power to redirect the loyalties and expectations of political actors. In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a united Europe took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political scientists and historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

Social Rights Judgments and the Politics of Compliance Malcolm Langford, César Rodríguez-Garavito, Julieta Rossi, 2017-03-02 The past few decades have witnessed an explosion of judgments on social rights around the world. However, we know little about whether these rulings have been implemented. *Social Rights Judgments and the Politics of Compliance* is the first book to engage in a comparative study of compliance of social rights judgments as well as

their broader effects. Covering fourteen different domestic and international jurisdictions, and drawing on multiple disciplines, it finds significant variance in outcomes and reveals both spectacular successes and failures in making social rights a reality on the ground. This variance is strikingly similar to that found in previous studies on civil rights, and the key explanatory factors lie in the political calculus of defendants and the remedial framework. The book also discusses which strategies have enhanced implementation, and focuses on judicial reflexivity, alliance building and social mobilisation.

Action Research in Teaching and Learning Lin Norton, 2018-11-02 Practical and down-to-earth, the second edition of *Action Research in Teaching and Learning* is an ideal introduction to the subject, offering a distinctive blend of the theoretical and the practical, grounded firmly in the global higher education landscape. Written in an accessible style to build confidence, it provides easily adaptable, practical frameworks, guidelines and advice on research practice within a higher education context. The reader is guided through each stage of the action research process, from engaging with the critical theory, to the practical applications with the ultimate goal of providing a research study which is publishable. Supplemented by useful pedagogical research tools and exemplars of both qualitative and quantitative action research studies, this new edition features chapters engaging with teaching excellence and analysing qualitative and quantitative research, additions to the resources section and a new preface focusing more explicitly on the ever-growing number of part-time academics. *Action Research in Teaching and Learning* combines a theoretical understanding of the scholarly literature with practical applications and is an essential, critical read for any

individual teaching or undertaking action research.

The Political Economy of the Hospital in History

Martin Gorsky, Margarita Vilar Rodríguez, Jerònia Pons Pons, 2020 The modern hospital is at once the site of healing, the locus of medical learning and a cornerstone of the welfare state. Its technological and infrastructural costs have transformed health services into one of today's fastest growing sectors, absorbing substantial proportions of national income in both developed and emerging economies. The aim of this book is to examine this growth in different countries, with a main focus on the twentieth century, and also with a backward glance to earlier shaping forces. It will explore the hospital's economic history, the relationship between public and private forms of provision, and the political context in which health systems were constructed. The collection advances the historical world map of different hospital models, ranging across Spain, Brazil, Germany, East and Central Europe, Britain, the United States and China. Collectively, these comparative cases illuminate the complexities involved in each country and bring new historical evidence to current debates on health care organisation, financing and reform.

Clinical Trials in Latin America: Where Ethics and Business Clash Nuria Homedes, Antonio Ugalde, 2013-11-29 The outsourcing of clinical trials to Latin America by the transnational innovative pharmaceutical industry began about twenty years ago. Using archival information and field work in Argentina, Brazil, Costa Rica, Mexico and Peru, the authors discuss the regulatory contexts and the ethical

dimensions of human experimentation in the region. More than 80% of all clinical trials in the region take place in these countries, and the European Medicines Agency has defined them as priority countries in Latin America. The authors raise questions about the quality of data obtained from the trials and the violation of human rights during their implementation. Their findings are presented in this volume, the first in-depth analysis of clinical trials in the region.

Pain Management and the Opioid Epidemic National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on Pain Management and Regulatory Strategies to Address Prescription Opioid Abuse, 2017-09-28

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and

monitoring.

Toman's Tuberculosis K. Toman, 2004-06-23 This is the second edition of a reference work aimed at all those concerned with dealing with tuberculosis control in developing countries. The book follows in the tradition of Kurt Toman's original work in this field, with the text set out in a question and answer format, grouped under three headings: case detection; treatment, and monitoring. The threat of tuberculosis is still potent, with two million deaths globally. This new edition, containing contributions from a number of experts in this field, addresses the resurgence of tuberculosis, and the emergence of multidrug-resistant bacilli, and the growth of HIV-infected individuals with tuberculosis, as well as recent scientific developments.
