Handbook of Parent-Child Interaction Therapy for Children on the Autism Spectrum Cheryl Bodiford

McNeil, Lauren Borduin Quetsch, Cynthia M.

Anderson, 2019-02-06 This handbook offers a theoretical foundation for the adaptation of Parent-Child Interaction Therapy (PCIT) for children with autism spectrum disorder (ASD) and their families. The volume examines current treatments for children with ASD and provides a rationale for why PCIT is considered a strong option to address many of the concerns found within this population of children and families. It presents an overview of PCIT theory, the goals of PCIT, the unique aspects of the treatment, and the exceptional outcomes. The handbook demonstrates the versatility of PCIT in conjunction with standard science-based therapies in addressing specific behavioral problems in this young population. Chapters provide a theoretical basis for PCIT, the empirical evidence for its efficacy, clinical considerations, and training issues. Chapters also offer a selection of case studies that help illustrate how PCIT has been successful in treating children with autism. The handbook concludes by identifying the gaps that need to be addressed by future research. Topics featured in the Handbook include: A clinical description of Parent-Child Interaction Therapy. The effects of medication for individuals with ASD. The importance of parent-child interactions in social communication and development. Teaching complex social behavior to children with ASD. Internet-delivered PCIT (I-PCIT) for children with autism. Child-Directed Interaction treatments for children with ASD. Parent-Directed Interaction treatments for children on the autism spectrum. The Handbook of Parent-Child Interaction Therapy for Children on the Autism Spectrum is a must-have resource for researchers, professors,

clinicians/practitioners/therapists, and graduate students across many interrelated disciplines, including child and school psychology, behavioral therapy, social work, child and adolescent psychiatry, pediatrics, and family studies as well as occupational therapy, physical therapy, behavior analysis, and speech therapy.

People and Computers XV — Interaction without Frontiers Ann Blandford, Jean Vanderdonckt, Phil Gray, 2011-06-27 In 2001 AFIHM and the British HCI Group combined their annual conferences, bringing together the best features of each organisation's separate conference series, and providing a special opportunity for the French- and English-speaking HCI communities to interact. This volume contains the full papers presented at IHM-HCI 2001, the 15th annual conference of the British HCI group, a specialist group of the British Computer Society and the 14th annual conference of the Association Francophone d'interaction Homme-Machine, an independent association for any French-speaking person who is interested in Human-Computer Interaction. Human-Computer Interaction is a discipline well-suited to such a multi-linguistic and multi-cultural conference since it brings together researchers and practitioners from a

variety of disciplines with very different ways of thinking and working. As a community we are already used to tackling the challenges of working across such boundaries, dealing with the problems and taking advantage of the richness of the resulting insights: interaction without frontiers. The papers presented in this volume cover all the main areas of HCI research, but also focus on considering the challenges of new applications addressing the following themes: - Enriching HCI by crossing national, linguistic and cultural boundaries; - Achieving greater co-operation between disciplines to deliver usable, useful and exciting design solutions; - Benefiting from experience gained in other application areas; - Transcending interaction constraints through the use of novel technologies; - Supporting mobile users.

Furniture Design Jerzy Smardzewski, 2015-06-18

Maximizing reader insights into the principles of designing furniture as wooden structures, this book discusses issues related to the history of furniture structures, their classification and characteristics, ergonomic approaches to anthropometric requirements and safety of use. It presents key methods and highlights common errors in designing the characteristics of the materials, components, joints and structures, as well as looking at the challenges regarding developing associated design documentation. Including analysis of how designers may go about calculating the stiffness and endurance of parts, joints and whole structures, the book analyzes questions regarding the loss of furniture stability and the resulting threats to health of the user, putting forward a concept of furniture design as an engineering processes. Creating an attractive, functional, ergonomic and safe piece of furniture is not only the fruit of the work of individual architects and artists, but requires an effort of many people working in interdisciplinary teams, this book is designed to add important knowledge to the literature for engineer approaches in furniture design.

Celluloid Activist Michael Schiavi, 2011-05-10 Celluloid Activist is the biography of gay-rights giant Vito Russo, the man who wrote *The Celluloid Closet: Homosexuality in the Movies*, commonly regarded as the foundational text of gay and lesbian film studies and one of the first to be widely

read. But Russo was much more than a pioneering journalist and author. A founding member of the Gay and Lesbian Alliance Against Defamation (GLAAD) and cofounder of the AIDS Coalition to Unleash Power (ACT UP), Russo lived at the center of the most important gay cultural turning points in the 1960s, 1970s, and 1980s. His life as a cultural Zelig intersects a crucial period of social change, and in some ways his story becomes the story of a developing gay revolution in America. A frequent participant at “zaps” and an organizer of Gay Activists Alliance (GAA) cabarets and dances—which gave the New York gay and lesbian community its first social alternative to Mafia-owned bars—Russo made his most enduring contribution to the GAA with his marshaling of “Movie Nights,” the forerunners to his worldwide Celluloid Closet lecture tours that gave gay audiences their first community forum for the dissection of gay imagery in mainstream film. Biographer Michael Schiavi unravels Vito Russo’s fascinating life story, from his childhood in East Harlem to his own heartbreaking experiences with HIV/AIDS. Drawing on archival materials, unpublished letters and journals, and more than two hundred interviews, including conversations with a range of Russo’s friends and family from brother Charlie Russo to comedian Lily Tomlin to pioneering activist and playwright Larry Kramer, *Celluloid Activist* provides an unprecedented portrait of a man who defined gay-rights and AIDS activism. “Schiavi tells a compelling story in this biography—from his re-creation of life on the streets of East Harlem and in Greenwich Village of the 1960s and 1970s to the way he conveys Russo’s excitement about his film research and popular education to his account of the AIDS years in New York City.”—John D’Emilio, *Italian American Review* “In [Schiavi’s] hands Russo’s life is both fascinating in its own right and a

window into a larger milieu of activism during two critical decades.”—Italian American Review Best Special Interest Books, selected by the American Association of School Librarians Best Books for General Audiences, selected by the Public Library Reviewers Finalist, Gay Memoir/Biography, Lambda Literary Awards Finalist, Over the Rainbow Selection, American Library Association

An International Perspective on Disasters and Children's Mental Health Christina W. Hoven, Lawrence V. Amsel, Sam Tyano, 2019-07-18 This book provides a broad international perspective on the psychological trauma faced by children and adolescents exposed to major disasters, and on the local public health response to their needs. An outstanding quality of the book is that it draws upon the experience of local researchers, clinicians, and public mental health practitioners who dedicated themselves to these children in the wake of overwhelming events. The chapters address exemplary responses to a wide variety of trauma types, including severe weather, war, industrial catastrophes, earthquakes, and terrorism. Because disasters do not recognize geographic, economic, or political boundaries, the chapters have been selected to

reflect the diverse global community's attempt to respond to vulnerable children in the most challenging times. The book, thus, examines a diverse range of healthcare systems, cultural settings, mental health infrastructure, government policies, and the economic factors that have played an important role in responses to traumatic events. The ultimate goal of this book is to stimulate future international collaborations and interventions that will promote children's mental health in the face of disaster.
