Academic E-Books Suzanne M. Ward,Robert S. Freeman,Judith M. Nixon,2015-11-15 Academic E-Books: Publishers, Librarians, and Users provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

State of the Young Child in India Mobile Creches,2020-02-24 This Report is one of the first comprehensive studies on young children in India. It focuses on children under 6 years of age and presents key aspects of their well-being and development. With the highest number of neonatal, infant and under-5 deaths in the world, there is an urgent need to address issues that continue to affect the young child in India. This volume: Introduces two young child indices aggregating selected indicators to separately track child outcomes and child circumstances. Provides an account of the current situation of the young child in terms of physical and cognitive development, access to care, disadvantaged children and major issues that have led to the continued neglect of this age group. Explores the policy and legal framework, fiscal space and the role and obligations of key stakeholders, including the state, private sector, civil society, media and the family. Highlights key recommendations and action points that can help to improve the ecosystem for early childhood care and development. Drawing on specially commissioned technical background papers, supplemented by extensive field experience of Mobile Creches in childcare, this Report will be of interest to practitioners, policymakers and influencers, think tanks and researchers of public policy, development studies, human rights, sociology and social anthropology, as well as general readers. Translating Anarchy Mark Bray,2013-09-27 Translating Anarchy tells the story of the anti-capitalist anti-authoritarians of Occupy Wall Street who strategically communicated their revolutionary politics to the public in a way that was both accessible and revolutionary. By "translating" their ideas into everyday concepts like community empowerment and collective needs, these anarchists sparked the most dynamic American social movement in decades.

Financing Africa Samuel Munzele Maimbo,Issa Faye,Thouraya Triki,2011-09-07 Financing Africa takes stock of Africa's financial systems in light of recent changes in the global financial system -- including the greater risk aversion of international investors, a shift in economic and financial powers towards emerging markets and the regulatory reform debate - and the increasing role of technology. Using a wider and more detailed array of data than previous publications, we observe a trend towards financial deepening, more stability and more inclusion leading up to the crisis; serious challenges, however, continue, including limited access to financial services, focus on short-term contracts and hidden fragility, related to weak regulatory frameworks, undue government interference and governance deficiencies. Our policy analysis therefore focuses on (i) expanding outreach, (ii) fostering long-term finance and (iii) improving regulation and supervision. We identify the positive role of innovation and competition, a stronger focus on non-traditional financial service providers, and more emphasis on demand-side constraints as priority areas for policy actions. Specifically, competition from new players outside the banking system, including telecom companies can increase outreach with technological innovation that changes the economics of retail finance. Moving beyond national stock exchanges that are not sustainable in most African countries towards regional solutions and over-the-counter trades can help foster long-term finance, as can addressing governance challenges in contractual savings institutions, including life insurance companies and pension funds. Finally, there is a need to look beyond supply-side constraints towards users of financial services, focusing more on financial literacy of households and firms, but also consumer protection. In formulating policy messages, we carefully distinguish between different country groupings, differentiating -- among others -- between low- and middle-income and small and larger economies, with a special focus on resource-based economies and post-conflict countries. This book reaches out to both policy makers concerned about a more inclusive and effective financial system and other stakeholders, including practitioners and development partners. With this book we aim to contribute to the on-going financial sector debate on Africa, with the ultimate goal of faster economic development and poverty reduction.

Handbook on Personalized Learning for States, Districts, and Schools Marilyn Murphy,Sam Redding,Janet Twyman,2016-07-01 The recent passage of the Every Student Succeeds Act (ESSA) presents new opportunities and greater flexibility in efforts to personalize learning for all children. The Handbook on Personalized Learning for States, Districts, and Schools provides insight and guidance on maximizing that new flexibility. Produced by the Center on Innovations in Learning (CIL), one of seven national content centers funded by the U.S. Department of Education, this volume suggests how teachers can enhance personalized learning by cultivating relationships with students and their families to better understand a child's learning and motivation. Personalized learning also encourages the development of students' metacognitive, social, and emotional competencies, thereby fostering students' self-direction in their own education, one aimed at mastery of knowledge and skills and readiness for career and college. Chapters address topics across the landscape of personalized learning, including co-designing instruction and learning pathways with students; variation in the time, place, and pace of learning, including flipped and blended classrooms; and using technology to manage and analyze the learning process. The Handbook's chapters include Action Principles to guide states, districts, and schools in personalizing learning.

A Long Walk To Church Nathaniel Davis,2018-10-08 Making use of the formerly secret archives of the Soviet government, interviews, and first-hand personal experiences, Nathaniel Davis describes how the Russian Orthodox Church hung on the brink of institutional extinction twice in the past sixty-five years. In 1939, only a few score widely scattered priests were still functioning openly. Ironically, Hitler's invasion and Stalin's reaction to it rescued the church -- and parishes reopened, new clergy and bishops were consecrated, a patriarch was elected, and seminaries and convents were reinstituted. However, after Stalin's death, Khrushchev resumed the onslaught against religion. Davis reveals that the erosion of church strength between 1948 and 1988 was greater than previously known and it was none too soon when the Soviet government changed policy in anticipation of the millennium of Russia's conversion to Christianity. More recently, the collapse of communism has created a mixture of dizzying opportunity and daunting trouble for Russian Orthodoxy. The newly revised and updated edition addresses the tumultuous events of recent years, including schisms in Ukraine, Estonia, and Moldova, and confrontations between church traditionalists, conservatives and reformers. The author also covers battles against Greek-Catholics, Roman Catholics, Protestant evangelists, and pagans in the south and east, the canonization of the last Czar, the church's financial crisis, and hard data on the slowing Russian orthodox recovery and growth. Institutional rebuilding and moral leadership now beckon between promise and possibility.

Cyber Fraud Rick Howard,2009-04-23 With millions lost each year, cyber crime has evolved from a minor nuisance to a major concern involving well-organized actors and highly sophisticated organizations. Combining the best of investigative journalism and technical analysis, *Cyber Fraud: Tactics, Techniques, and Procedures* documents changes in the culture of cyber criminals and explores the innovations that are the result of those changes. The book uses the term Botnet as a metaphor for the evolving changes represented by this underground economy. Copiously illustrated, this engaging and engrossing book explores the state of threats present in the cyber fraud underground. It discusses phishing and pharming, trojans and toolkits, direct threats, pump-and-dump scams, and other fraud-related activities of the booming cyber-underground economy. By examining the geopolitical and socio-economic foundations of a cyber threat landscape, the book specifically examines telecommunications infrastructure development, patterns and trends of internet adoption and use, profiles of specific malicious actors, threat types, and trends in these areas. This eye-opening work includes a variety of case studies — including the cyber threat landscape in Russia and Brazil. An in-depth discussion is provided on the Russian Business Network's (RBN) role in global cyber crime as well as new evidence on how these criminals steal, package, buy, sell, and profit from the personal financial information of consumers. Armed with this invaluable information, organizations and individuals will be better able to secure their systems and develop countermeasures to disrupt underground fraud.

Risk, Ruin and Survival Ricardas Zitikis,Jiandong Ren,Kristina Sendova,2020-04-02 Developing techniques for assessing various risks and calculating probabilities of ruin and survival are exciting topics for mathematically-inclined academics. For practicing actuaries and financial engineers, the resulting insights have provided enormous opportunities but also created serious challenges to

overcome, thus facilitating closer cooperation between industries and academic institutions. In this book, several renown researchers with extensive interdisciplinary research experiences share their thoughts that, in one way or another, contribute to the betterment of practice and theory of decision making under uncertainty. Behavioral, cultural, mathematical, and statistical aspects of risk assessment and modelling have been explored, and have been often illustrated using real and simulated data. Topics range from financial and insurance risks to security-type risks, from one-dimensional to multi- and even infinite-dimensional risks. The articles in the book were written with a broad audience in mind and should provide enjoyable reading for those with university level degrees and/or those who have studied for accreditation by various actuarial and financial societies.

Big Tech and the Digital Economy Nicolas Petit,2020-07 This book asks a simple question: are the tech giants monopolies? In the current environment of suspicion towards the major technology companies as a result of concerns about their power and influence, it has become commonplace to talk of Google, Facebook, Amazon, Apple, Microsoft, or Netflix as the modern day version of the 19th century trusts. In turn, the tech giants are vilified for a whole range of monopoly harms towards consumers, workers and even the democratic process. In the US and the EU, antitrust, and regulatory reform is on the way. Using economics, business and management science as well legal reasoning, this book offers a new perspective on big tech. It builds a theory of moligopoly. The theory advances that the tech giants, or at least some of them, coexist both as monopolies and oligopoly firms that compete against each other in an environment of substantial uncertainty and economic dynamism. With this, the book assesses ongoing antitrust and regulatory policy efforts. It demonstrates that it is counterproductive to pursue policies that introduce more rivalry in moligopoly markets subject to technological discontinuities. And that non-economic harms like privacy violations, fake news, or hate speech are difficult issues that belong to the realm of regulation, not antimonopoly remediation.

No Shelf Required 2 Sue Polanka,2012 E-book content, devices, and services have created challenges for libraries as well as opportunities. Because the e-book playing field is constantly changing, any predictions are, at best, tenuous. Librarians must be resilient in order to manage, and not be managed by, e-books and their progenies. With their explosive sales and widespread availability over the past few years, e-books have definitively proven that they are here to stay. In this sequel to her first book of the same title, the author dives even deeper into the world of digital distribution. Contributors from across the e-book world offer their perspectives on what is happening now and what to expect in the coming months and years. Included in this resource are: Guidelines for performing traditional library processes such as cataloging, weeding, archiving, and managing e-book accessibility for patrons with special needs; Explorations of topics such as the e-book digital divide and open-access publishing; Case studies from an array of academic, public, and school libraries, offering firsthand accounts of what works, what doesn't, and why; Discussions of the emerging model of the electronic-only library and the rich possibilities of enhanced e-books.

Faith-Rooted Organizing Rev. Alexia Salvatierra,Peter Heltzel,2013-12-06 With so many injustices, small and great, across the world and right at our doorstep, what are people of faith to do? Since the 1930s, organizing movements for social justice in the U.S. have largely been built on assumptions that are secular origin—such as reliance on self-interest and having a common enemy as a motivator for change. But what if Christians were to shape their organizing around the implications of the truth that God is real and Jesus is risen? Alexia Salvatierra has developed a model of social action that is rooted in the values and convictions born of faith. Together with theologian Peter Heltzel, this model of faith-rooted organizing offers a path to meaningful social change that takes seriously the command to love God and to love our neighbor as ourself.
