International Standard Classification of Occupations International Labour Office, 2012 The International Standard Classification of Occupations 2008 (ISCO-08) is a four-level hierarchically structured classification that covers all jobs in the world. Developed with the benefit of accumulated national and international experience as well as the help of experts from many countries and agencies, ISCO-08 is fully supported by the international community as an accepted standard for international labour statistics. ISCO-08 classifies jobs into 436 unit groups. These unit groups are aggregated into 130 minor groups, 43 sub-major groups and 10 major groups, based on their similarity in terms of the skill level and skill specialisation required for the jobs. This allows the production of relatively detailed internationally comparable data as well as summary information for only 10 groups at the highest level of aggregation. Each group in the classification is designated by a title and code number and is associated with a definition that specifies the scope of the group. The classification is divided into two volumes: Volume I presents the structure and definitions of all groups in ISCO-08 and their correspondence with ISCO-88, which it supersedes, while Volume II provides an updated and expanded index of occupational titles and associated ISCO-08 and ISCO-88 codes.

Chaldean-Americans Mary C. Sengstock,1982 Chaldean Americans in Detroit, Michigan, a growing community of Roman Catholic immigrants from Iraq, are the focus of this study. A description is given of the Detroit Chaldean community centers around three key institutions, namely the church, the family, and the ethnic occupation or community economic enterprise, and of how these institutions have been affected by the migration experience and by contact with the new culture. An analysis of the social setting of migration examines religious and economic determinants of migration to America, migration effects on the Detroit community, and Chaldeans' relationships with other social groups in Detroit. An exploration of Chaldeans' adaptation to their new setting considers assimilation and acculturation processes, changes in social structure and values, creation of a balance between old country patterns and new practices, and the development of an ethnic identity and a sense of nationalism. Ethnic conflicts and accommodation processes that arise from efforts to achieve the balance between old and new are explored, and it is suggested that family and friendship ties will offset the divisive effects of conflict and American liberalism and keep the Chaldean community from disintegrating. Finally, an exploration of the future direction of American ethnicity points to the need for unity in a culturally diverse society. (Author/MJL)

Food Security in Africa Alexander Sarris,2010-01-01 'As they often do, Jamie Morrison and Alexander Sarris have provided researchers, policy-makers, and the interested public with the firm empirical grounding needed for sound agricultural development policies. They have synthesized from a rich and varied set of country studies a unique contribution to one of the key challenges of our times increasing the productivity of smallholder food production in the age of globalization.' Timothy A. Wise, Tufts University, US 'Food security has been a major concern in Africa for decades, and a more pressing problem with recent increases in food prices. The editors and contributors to this volume are experts in the field and should be commended for a timely, informative and in places challenging analysis of food production and markets in eastern and southern Africa. The volume brings a refreshing variety of theoretical, analytical and informed case study approaches to bear on the food security problem; it should be read by anybody seriously interested in African development.' Oliver Morrissey, University of Nottingham, UK Drawing on insights from theoretical applications, empirically based approaches and case study experience, this book contributes to the improved design and use of trade and related policy interventions in staple food markets. Trade policy interventions have a potentially critical role to play in the development of staple food markets in developing countries and, as a source of revenue, in wider processes of rural development. Governments have long defended trade and related policy interventions in staple food markets on the basis of food security concerns. However, the design and implementation of these policies has often resulted in unintended impacts, increasing the risks faced by private sector actors and reducing their incentives for investment in improved market performance. In the context of increasingly volatile staple food markets, this book, commissioned from leading experts in this field, seeks to enhance dialogue between stakeholders involved in, and affected by, the design and use of trade and related policy interventions. This significant book will appeal to policy analysts and decision makers influential in the design and implementation of trade and related market interventions, as well as students of development economics. Researchers contributing to debates on the use and impacts of trade and related market interventions in staple food markets in poor countries will also find this volume of great benefit.

Innovative Business Practices Alkis Thrassou,Demetris Vrontis,2013-07-16 This second decade of the millennium finds the world changing at a once unimaginable pace. Businesses, tangled in the interwoven threads of galloping globalization, technological advances, cultural diversity, economic recession and deep-rooted human social evolution, struggle to keep up with incessant changes; consequently and inexorably experiencing severe difficulties and disorientation. Executives, much bewildered, habitually turn to conventional, time-honoured strategies and practices, which increasingly fail to offer the much-sought answers and means to survival, competitiveness and growth. We are currently experiencing a business era of turbulence and dynamic change - an era that inherently rejects conventionality and orthodox business theory to reward businesses embracing agility, reflex-style adaptability, innovation and creativity. This turbulence is, however, not a parenthesis or even a pattern, but the new reality in which each business must reinvent and redefine itself. This is a new reality of stakeholders that shift focus from the external to the internal, from the tangible to the intangible, and from fact to perception. This book presents research and paradigms that transcend classical theory in order to examine how business practice is positively affected by these conditions. Across a multitude of sectors and organisational types, scholars of different business specialisations set the theoretical foundations of contemporary thinking and present their practical implementations.

Empowerment and Poverty Reduction Deepa Narayan-Parker,2002-01-01 This publication offers a framework for the empowerment of people living in poverty throughout the world that concentrates on increasing people's freedom of choice and action to shape their own lives. Based on analysis of practical experiences, the book identifies four key elements to support empowerment: information, inclusion and participation, improved accountability and local organisational capacity. This framework is then applied to five areas of action to improve development effectiveness: provision of basic services, improved local governance, improved national governance, pro-poor market development, and access to justice and legal aid. It also offers twenty 'tools and practices' which concentrate on a wide-range of topics to support the empowerment of the poor.

War Photographs Taken on the Battlefields of the Civil War Mathew B. Brady,Alexander Gardner,2013-06-01 Fought over the course of four years, the Civil War pitted countrymen against countrymen, North versus South, friend against friend, and brother against brother. The photographs within these pages document the war that united America as one. These rare shots were taken in the middle of the battlefield during the earliest days of photography. Selected from a collection of seven thousand original negatives, these historic photos capture nearly every aspect of Civil War life. Among these photos are images of camps sprawling across acres, soldiers at their battlements, firing of heavy artillery, the aftermath of battle, and the terror that these young men faced. See first-hand of Union and Confederate officers strategizing their next moves, and Abraham Lincoln addressing his Union commanders. Originally released from the private collection of Edward Bailey Eaton in 1907, this edition is a must have for any Civil War buff or historian. No collection can be considered complete without these photographs by Matthew Brady and Alexander Gardner, as well as the meticulous passages that put the images in illuminating context.
