Transcending Fear: Brian Germain,2013-11-14 The product of a lifetime of research and reflection, *Transcending Fear* is Brian Germain's most important work. The book addresses the most significant challenge of human kind to date: the process of recognizing and moving beyond fear. In an age in which fear has literally brought our world to the brink of destruction, understanding why we contract in fear and how we can go beyond this instinctive reaction is essential for our survival as a species.As a World Champion skydiver, test pilot and psychologist, Brian Germain offers a unique personalized perspective on the

phenomenon of fear. Reflecting on his many intense experiences with fear, Brian sorts through the most current psychology research on fear, and presents the ways to de-escalate the emotional response in provocative situations. The fundamental premise of the book is simple: Fear makes us stupid. If we are to transcend the limitations imposed by a contracted perspective, we must develop our ability to remain calm. Specific methods for relaxing in dangerous situations are covered in detail, as well as scientific evidence to support the reasons for this unusual and powerful approach to dealing with fear.

**The Skydiving Beavers** Susan Wood, 2017-04-15 Just after World War II, the people of McCall, Idaho, found themselves with a problem on their hands. McCall was a lovely resort community in Idaho's backcountry with mountain views, a sparkling lake, and plenty of forests. People rushed to build roads and homes there to enjoy the year-round outdoor activities. It was a beautiful place to live. And not just for humans. For centuries, beavers had made the region their home. But what's good for beavers is not necessarily good for humans, and vice versa. So in a unique conservation effort, in 1948 a team from the Idaho Fish and Game Department decided to relocate the McCall beaver colony. In a daring experiment, the team airdropped seventy-six live beavers to a new location. One beaver, playfully named Geronimo, endured countless practice drops, seeming to enjoy the skydives, and led the way as all the beavers parachuted into their new home. Readers and nature enthusiasts of all ages will enjoy this true story of ingenuity and determination.

**Learning to Fly** Steph Davis, 2013-04-02 WITH A NEW EPILOGUE BY THE AUTHOR World-class free climber Steph Davis delivers a "thrilling and infectious interesting" (San Francisco Book Review) memoir about rediscovering herself

through love, loss, and the joy of letting go. The paperback includes a new epilogue in which Davis shares how her husband Mario's tragic accident has affected her relationship to climbing and flying. Steph Davis is a superstar in the climbing community and has ascended some of the world's most challenging and awe-inspiring peaks. But after her first husband makes a controversial climb in a national park, the media fallout escalates rapidly and in one fell swoop leaves her without a partner, a career, a source of income...or a purpose. In the company of only her beloved dog, Fletch, Davis sets off on a search for a new identity and discovers skydiving. Falling out of an airplane is completely antithetical to the climber's control she'd practiced for so long, but she perseveres, turning each daring jump into an opportunity to fly, first as a skydiver, then as a base jumper. As she opens herself to falling, she also finds the strength to open herself to love again, even in the wake of heartbreak. And before too long, she meets someone who shares her passion for living life to the limit. With gorgeous black-and-white photos throughout, *Learning to Fly* is Davis's fascinating account of her transformation. From her early tentative skydives, to zipping into her first wingsuit, to surviving devastating accidents against the background of breathtaking cliffs, to soaring beyond her past limits, she discovers new hope and joy in letting go.

Skydiving is a fun, enlightening and instructive adventure into our skies!Imagine your heart pounding in your chest while peering out over the edge of a plane 13,000 feet above ground. Suddenly you are opened up to a whole new world with just one jump which launches you into flight where you can do all sorts of fun things.Discover how the sport of skydiving developed at the

end of Second World War and how it has become a sport for people who are thrill seekers, wanting to have the ultimate adrenaline rush. You will learn how, as you become more skilled, you will be able to jump with new and best friends, which is the greatest feeling in the world, especially as you make each jump a little more action packed and challenging. These days, skydiving is the fun form of parachuting done from a plane or sometimes a helicopter which takes off from a small airbase known as a drop zone. Skydivers usually exit the aircraft at a height of 13,000 feet (4000 meters) and free-fall for a time before opening their chute to slow their descent to a safe landing speed. If you are a little bit like me, you will be going to bed in the evenings thinking about where and when your next skydive will be, what is in store in the future, and who you'll meet along the way. I watched him strap on his harness and helmet, climb into the cockpit and, minutes later, a black dot falls off the wing two thousand feet above our field. At almost the same instant, a white streak behind him flowered out into the delicate wavering muslin of a parachute - a few gossamer yards grasping onto air and suspending below them, with invisible threads, a human life, and man who by stitches, cloth, and cord, had made himself a god of the sky for those immortal moments. - Charles Lindbergh

**Faith Is Like Skydiving** Rick Mattson,2014-04-07 It can be hard to explain why you believe in God. But images and analogies can provide concrete handles for making the Christian faith more plausible. If someone claims that Christians make a blind leap of faith, you can respond, No, it's not a blind leap. Faith is like skydiving. You check out your parachute beforehand and make sure it's secure. You follow the safety instructions. And then you jump. It's a leap, but it's not a blind leap. It's an informed leap. Experienced evangelist and apologist Rick Mattson has collected dozens of easy-to-use images for explaining Christianity. God's amazing design of the world? It's like getting dealt a royal flush over and over again. Why is there evil and suffering in the world? Because it's a broken world, and things are not how they're supposed to be. With practical tips on how to interact with your skeptical friends, this book provides a handy toolkit of memorable and instantly usable images for conversation. Find yourself better equipped to give an answer to anyone who asks you about your faith.
