## **Life and Security in Rural Afghanistan**

Neamatollah Nojumi, Dyan Mazurana, Elizabeth Stites, 2010-01-06 Despite the fall of the Taliban, Afghanistan remains a country in dire need of strong international support. This fascinating and clearly written book mines a rich and unique array of data, which was collected in rural areas of Afghanistan by an expert team of researchers, to analyze countrywide trends in the relationship between human security and livelihoods. The team's research and recommendations are published here for the first time.

**After the Taliban** Neamatollah Nojumi, 2009

My Life with the Taliban Mullah Abdul Salam Zaeef, 2011-06-16 Abdul Zaeef describes growing up in poverty in rural Kandahar province, which he fled for Pakistan after the Russian invasion of 1979. Zaeef joined the jihad in 1983, was seriously wounded in several encounters and met many leading figures of the resistance, including the current Taliban head, Mullah Mohammad Omar. Disgusted by the lawlessness that ensued after the Soviet withdrawal, Zaeef was one among the former mujahidin who were closely involved in the emergence of the Taliban, in 1994. He then details his Taliban career, including negotiations with Ahmed Shah Massoud and role as ambassador to Pakistan during 9/11. In early 2002 Zaeef was handed over to American forces in Islamabad and spent four and a half years in prison in Bagram and Guantanamo before being released without charge. My Life with the Taliban offers insights into the Pashtun village communities that are the

Taliban's bedrock and helps to explain what drives men like Zaeef to take up arms against the foreigners who are foolish enough to invade his homeland.

Land of the Unconquerable Jennifer Heath, Ashraf Zahedi, 2011-03-23 Reaching beyond sensational headlines, this book offers a three-dimensional portrait of Afghan women. In a series of wide-ranging, deeply reflective essays, this book examines the realities of life for women in both urban and rural settings.

*Drones and Targeted Killing in the Middle East and Africa* Christine Sixta Rinehart, 2016-12-06 The use of drone warfare has become a controversial foreign policy weapon to keep the United States safe from further terrorist attacks. This book is an assessment of American targeted killing practices through drone warfare in the Middle East and Africa, including Afghanistan, Iraq, Libya, Pakistan, Somalia, Syria, and Yemen.

**A State Built on Sand** David Mansfield, 2016-05-01 Oscillations in opium poppy production in Afghanistan have long been associated with how the state was perceived, such as after the Taliban imposed a cultivation ban in 2000-1. The international community's subsequent attempts to regulate opium poppy became intimately linked with its own state-building project, and rising levels of cultivation were cited as evidence of failure by those international donors who spearheaded development in poppy-growing provinces like Helmand, Nangarhar and Kandahar. Mansfield's book examines why drug control - particularly opium bans - have been imposed in Afghanistan; he

documents the actors involved; and he scrutinizes how prohibition served divergent and competing interests. Drawing on almost two decades of fieldwork in rural areas, he explains how these bans affected farming communities, and how prohibition endured in some areas while in others opium production bans undermined livelihoods and destabilized the political order, fuelling violence and rural rebellion. Above all this book challenges how we have come to understand political power in rural Afghanistan. Far from being the passive recipients of violence by state and non-state actors, Mansfield highlights the role that rural communities have played in shaping the political terrain, including establishing the conditions under which they could persist with opium production.

*Historical Dictionary of Afghanistan* Thomas H. Johnson, Ludwig W. Adamec, 2021-05-15 *Historical Dictionary of Afghanistan*, Fifth Edition contains a chronology, an introduction, and an extensive bibliography. The dictionary section has more than 1,000 cross-referenced entries on important personalities as well as aspects of the country's politics, economy, foreign relations, religion, and culture.

**Historical Dictionary of Afghanistan** Ludwig W. Adamec, 2012 This new fourth edition has been substantially expanded because so much has taken place in such a short period of time. The most important changes, however, have been made to the dictionary section, with hundreds of added or substantially revised entries on important people, places, events, institutions, practices, ethnic

and religious groups, political parties, and Islamist movements, as well as significant aspects of Afghanistan's politics, economy, society, and culture.

**My Life with the Taliban** Abdul Salam

Zaeef, 2010-01-01 This is the autobiography of Abdul Salam Zaeef, a senior former member of the Taliban. His memoirs, translated from Pashto, are more than just a personal account of his extraordinary life. My Life with the Taliban offers a counter-narrative to the standard accounts of Afghanistan since 1979. Zaeef describes growing up in rural poverty in Kandahar province. Both of his parents died at an early age, and the Russian invasion of 1979 forced him to flee to Pakistan. He started fighting the jihad in 1983, during which time he was associated with many major figures in the anti-Soviet resistance, including the current Taliban head Mullah Mohammad Omar. After the war Zaeef returned to a quiet life in a small village in Kandahar, but chaos soon overwhelmed Afghanistan as factional fighting erupted after the Russians pulled out. Disgusted by the lawlessness that ensued, Zaeef was one among the former mujahidin who were closely involved in the discussions that led to the emergence of the Taliban, in 1994. Zaeef then details his Taliban career as civil servant and minister who negotiated with foreign oil companies as well as with Afghanistan's own resistance leader, Ahmed Shah Massoud. Zaeef was ambassador to Pakistan at the time of the 9/11 attacks, and his account discusses the strange phoney war period before the US-led intervention toppled the

Taliban. In early 2002 Zaef was handed over to American forces in Pakistan, notwithstanding his diplomatic status, and spent four and a half years in prison (including several years in Guantanamo) before being released without having been tried or charged with any offence. My Life with the Taliban offers a personal and privileged insight into the rural Pashtun village communities that are the Taliban's bedrock. It helps to explain what drives men like Zaef to take up arms against the foreigners who are foolish enough to invade his homeland.

Written by a leading international authority on the subject, the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are

interrelated related. This ebook is a static version of an article from Oxford Bibliographies Online: Islamic Studies, a dynamic, continuously updated, online resource designed to provide authoritative guidance through scholarship and other materials relevant to the study of the Islamic religion and Muslim cultures. Oxford Bibliographies Online covers most subject disciplines within the social science and humanities, for more information visit [www.aboutobo.com](http://www.aboutobo.com).

*The Intelligence War in Afghanistan* Musa Khan, 2019-05-01 Globalisation continues to challenge our world at unprecedented speed. Technological innovations, changing geographical developments, regional rivalries, and destruction of national critical infrastructures in several Muslim states due to the US so called war on terrorism-all transformed the structures and hierarchies of societies. The idea of development of a nation that sounds on tripods that are food, shelter and security failed. The Edward Snowden leaks challenged policy makers and the public understanding and perspectives on the role of security intelligence in liberal democratic

states. The persisting imbalance of power in the United States, its institutional turmoil, and intelligence war, and the noticeably tilting power have made the country feel vulnerable and prodded it into military ventures. The calibration of Western allies around Whitehouse as the sole centre of globalization has only brought instability, destruction and loss of human lives.

My Forbidden Face Latifa, Chékéba Hachemi, 2002 In a moving tale of oppression and courageous defiance, sixteen-year-old Latifa tells her story of growing up in war torn Afghanistan.

Schools for Conflict or for Peace in Afghanistan Dana Burde, 2014-10-21 Foreign-backed funding for education does not always stabilize a country and enhance its statebuilding efforts. Dana Burde shows how aid to education in Afghanistan bolstered conflict both deliberately in the 1980s through violence-infused, anti-Soviet curricula and inadvertently in the 2000s through misguided stabilization programs. She also reveals how dominant humanitarian models that determine what counts as appropriate aid have limited attention and resources toward education, in some cases fueling programs that undermine their goals. For education to promote peace in Afghanistan, Burde argues we must expand equal access to quality community-based education and support programs that increase girls' and boys' attendance at school. Referring to a recent U.S. effort that has produced strong results in these areas, Burde commends the program's efficient administration and good quality, and its neutral curriculum, which can reduce conflict and build peace in

lasting ways. Drawing on up-to-date research on humanitarian education work amid conflict zones around the world and incorporating insights gleaned from extensive fieldwork in Afghanistan and Pakistan, Burde recalculates and improves a popular formula for peace.

*American State-Building in Afghanistan and Its Regional Consequences* Neamat Nojumi, 2016-03-03 The book calls for rethinking U.S. policy toward promoting Afghanistan as a regional economic hub in Southwest and Central Asia as it fits within the broader national security interest of the regional states. It argues for defining Afghanistan within the U.S. national security interests in Southwest and Central Asia, including Iran, and offers critical strategic tools for Washington to support political openness and reforms that can balance China and Russia, as well as more effectively manage Iran's regional behavior. It links the U.S. policy approach in Southwest and Central Asia as the "missing leg" of Washington's East Asia policy. The book defines the strategic interests of each of Afghanistan's neighboring states and key regional actors to explain why a rethinking of the U.S. role in Afghanistan can assist the emergence of a new regional order in Southwest and Central Asia, which in turn can embolden a free market economy and a growing political openness superior to authoritarianism and Islamist militancy.

Afghan National Army Musa Khan

Jalalzai, 2020-03-16 The Afghan National Army (ANA) and Afghan National Air Force (AAF) stand today as products of the 2001 war and Western intervention

in Afghanistan. This is not only because they were established in 2002 by the government brought to power by that intervention, but even more importantly because they were funded, designed and trained by the intervening forces. It was perhaps inevitable therefore that the question of their sustainability should arise.

**Afghanistan** Thomas Barfield, 2012-03-25 Traces the political history of Afghanistan from the sixteenth century to the present, looking at what has united the people as well as the regional, cultural, and political differences that divide them.

Routledge Handbook of Research Methods in Military Studies Joseph Soeters, Patricia M. Shields, Sebastiaan Rietjens, 2014-06-27 This volume offers an overview of the methodologies of research in the field of military studies. As an institution relying on individuals and resources provided by society, the military has been studied by scholars from a wide range of disciplines: political science, sociology, history, psychology, anthropology, economics and administrative studies. The methodological approaches in these disciplines vary from computational modelling of conflicts and surveys of military performance, to the qualitative study of military stories from the battlefield and veterans experiences. Rapidly developing technological facilities (more powerful hardware, more sophisticated software, digitalization of documents and pictures) render the methodologies in use more dynamic than ever. The Routledge Handbook of Research Methods in Military Studies offers a comprehensive and

dynamic overview of these developments as they emerge in the many approaches to military studies. The chapters in this Handbook are divided over four parts: starting research, qualitative methods, quantitative methods, and finalizing a study, and every chapter starts with the description of a well-published study illustrating the methodological issues that will be dealt with in that particular chapter. Hence, this Handbook not only provides methodological know-how, but also offers a useful overview of military studies from a variety of research perspectives. This Handbook will be of much interest to students of military studies, security and war studies, civil-military relations, military sociology, political science and research methods in general.

Afghanistan Barnett R. Rubin, 2020-07-01

Afghanistan, a landlocked country in Central Asia, has improbably been at the center of international geopolitics for four decades. After the Soviet Union invaded in 1980, Afghanistan descended into an unending conflict that featured at various points most of the world's major powers. In the mid-1990s, the country entered a new phase, when the Taliban took power and imposed order based on a harsh, repressive version of Islamic law. Infamously, the sheltered Osama bin Laden, whose attack on 9/11 Towers ushered in the Global War on Terror, drew tens of thousands of American troops to the country, where they remain today. In *Afghanistan: What Everyone Needs to Know®*, leading scholar Barnett R. Rubin provides an overview of this complicated nation. After providing a concise history of Afghanistan, he explores the various

peoples and cultures of the country and its relations with neighbors like Pakistan and Iran. He also provides an authoritative overview of the conflicts that have plagued the country since the Soviet invasion. Both wide-ranging and pithy, this book explains why Afghanistan matters and what its possible future might look like.

*Just War Theory and Non-State Actors* Eric E. Smith, 2020-03-20 This book uses an historical body of knowledge, Just War Theory, as the basis for analyzing modern conflicts involving Armed Non-State Actors who employ force against states. As the global community faces the challenges of globalization, terrorism, 24-hour international news coverage, super power collapse, weapons of mass destruction, and failed states, the author explores whether the historic bodies of knowledge governing decision makers during conflict remain relevant. Tracing the evolution of Just War Theory, he analyzes circumstances involving Armed Non-State Actor (ANSA) groups possessing powerful and destructive capabilities and a desire to use them, and pursues answers to the central research question: how does Just War Theory apply in modern scenarios involving ANSA groups who challenge the state and international institution's monopoly on use of force? The study finds that Just War Theory still has the capacity to accommodate modern day statecraft and application in scenarios involving Armed Non-State Actors. This book will be of great interest to those researching and studying in the fields of political theory, security studies, international relations, war and conflict studies, and public ethics.
