**Invention** James Dyson,2021-09-02 Dyson has become a byword for high performing products, technology, design and invention. Now, James Dyson, the inventor and entrepreneur who made it all happen, tells his remarkable and inspirational story in *Invention: A Life*. Famously, over a four-year period, James Dyson made 5127 prototypes of the cyclonic vacuum cleaner that would transform the way houses are cleaned around the world. In devoting all his resources to iteratively developing the technology, he risked it all, but out of many failures and setbacks came hard-fought success. His products - including vacuum cleaners, hair dryers and hair stylers, and fans and purifiers - are not only revolutionary technologies, but design classics. This was a legacy of his time studying at the Royal College of Art in the 1960s, when he was inspired by some of the most famous artists, designers and inventors of the era, as well as his engineering heroes such as Frank Whittle and Alec Issigonis. In *Invention: A Life*, Dyson reveals how he came to set up his own company and led it to become one of the most inventive technology companies in the world. It is a compelling and dramatic tale, with many obstacles overcome. Dyson has always looked to the future, even setting up his own university to help provide the next generation of engineers and designers. For, as he says, 'everything changes all the time, so experience is of little use'. Whether you are someone who has an idea for a better product, an aspiring entrepreneur, whether you appreciate great design or a page-turning read, *Invention: A Life* offers you inspiration, hope and much more.

**Out Of Control** Kevin Kelly,2009-04-30 Out of Control chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.

**The Disappearing Spoon** Sam Kean,2010-07-12 From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. \*Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

**Grateful American** Gary Sinise,2019-02-12 Discover the moving, entertaining, never-before-told story of how one man found his calling: to see that those who defend this country and its freedoms are never forgotten. As a kid in suburban Chicago, Gary Sinise was more interested in sports and rock 'n' roll than reading or

schoolwork. But when he impulsively auditioned for a school production of West Side Story, he found his true purpose--or so it seemed. Within a few years, Gary and a handful of friends created what became one of the most exciting and important new theater companies in America. From its humble beginnings in a suburban Chicago church basement and eventual move into the city, the Steppenwolf Theatre Company launched a series of groundbreaking productions, igniting Gary's career along with those of John Malkovich, Joan Allen, Gary Cole, Laurie Metcalf, Jeff Perry, John Mahoney, and countless others. Television and film came calling soon after, and Gary starred in *Of Mice and Men* (which he also directed) and *The Stand* before taking the role that would change his life in unforeseeable ways: Lieutenant Dan in the Academy Award-winning *Forrest Gump*. The military community's embrace of the character of the disabled veteran was matched only by the depth of Gary's realization that America's defenders had not received all the honor, respect, and gratitude their sacrifices deserve. In the aftermath of the September 11 attacks, this became Gary's new calling. *Grateful American*, now a New York Times bestseller, documents Gary's dedication to working tirelessly on behalf of those who serve this country, sharing stories about how he has: Entertained more than a half million troops around the world playing bass guitar with his Lt. Dan Band Raised funds on behalf of veterans Founded the Gary Sinise Foundation with a mission to serve and honor America's defenders, veterans, first responders, their families, and those in need *Grateful American* is the moving, entertaining, profoundly gripping story of how one man found his life's work: to see that those who defend this country and its freedoms are never forgotten. Praise for *Grateful American*: Gary Sinise writes as he lives, and as the artist and actor he has always been: with American authenticity, purpose, and a conviction that is inseparable from his nature. --Tom Hanks, actor and filmmaker No entertainer alive today has visited and performed more for our troops at veterans hospitals and military bases all over the world than Gary Sinise. For years his foundation has built 'smart homes' for our troops that were severely wounded in combat. The book is called *Grateful American*, and I promise that after you read it you will be grateful for what Gary has accomplished and contributed to our country. He's truly one of a kind. --Clint Eastwood, actor, director, producer, and musician

**Class** Paul Fussell,1992 This book describes the living-room artifacts, clothing styles, and intellectual proclivities of American classes from top to bottom.

*The Pricing Puzzle* Jan Y. Yang,2020-08-24 The price of virtually any product or service can reveal intriguing stories. The author looks back at his own decade-long pricing journey and shares some of the most exciting and insightful pricing stories, allowing readers to see the world from a different angle. From pricing a chilled Coke in Tehran, to iPhone, to explaining the fall of MUJI, this book reveals the rationales behind and outcomes of various pricing strategies. The author also presents a number of stories from China, a price wonderland in which he, both as a consumer and a pricing consultant, has observed unconventional pricing practices rarely found elsewhere, such as the frequent use of negative prices among tech unicorns, i.e., sellers paying consumers to use their products. Structured as a collection of short stories, the book offers a delightful and eye-opening reading experience for business owners, managers, and anyone interested in understanding what prices are, and how pricing works and interacts with us as customers.

**Accelerando** Charles Stross,2005-07-05 The Singularity. It is the era of the posthuman. Artificial intelligences have surpassed the limits of human intellect. Biotechnological beings have rendered people all but extinct. Molecular nanotechnology runs rampant, replicating and reprogramming at will. Contact with extraterrestrial life grows more imminent with each new day. Struggling to survive and thrive in this accelerated world are three generations of the Macx clan: Manfred, an entrepreneur dealing in intelligence amplification technology whose mind is divided between his physical environment and the Internet; his daughter, Amber, on the run from her domineering mother, seeking her fortune in the outer system as an indentured astronaut; and Sirhan, Amber's son, who finds his destiny linked to the fate of all of humanity. For something is systematically dismantling the nine planets of the solar system. Something beyond human comprehension. Something that has no use for biological life in any form...

**The Brand Innovation Manifesto** John Grant,2006-05-12 The days of the image brands are over, and 'new marketing' has gone mainstream. The world's biggest companies are pursuing a post-advertising strategy, moving away from advertising and investing in leading edge alternatives. In the vanguard of the revolution has been John Grant, co-founder of the legendary agency St. Luke's and author of *The New Marketing Manifesto*, whose radical thinking has informed a generation. Now Grant is set to stun the industry again. In *The Brand Innovation Manifesto*, he redefines the nature of brands, showing why old models and scales no longer work and revealing that the key to success today is impacting people's lifestyles (think Starbucks, iPod and eBay). At the heart of the book is the concept of the 'brand molecule' to which new cultural ideas can be constantly added to keep pace with change. Cataloguing 32 classes of idea, Grant presents a practical approach to mixing and matching them within your own market to develop new brand ideas - and new ideas for existing brands.

Noise, Water, Meat Douglas Kahn,2001-08-24 An examination of the role of sound in twentieth-century arts. This interdisciplinary history and theory of sound in the arts reads the twentieth century by listening to it--to the emphatic and exceptional sounds of modernism and those on the cusp of postmodernism, recorded sound, noise, silence, the fluid sounds of immersion and dripping, and the meat voices of viruses, screams, and bestial cries. Focusing on Europe in the first half of the century and the United States in the postwar years, Douglas Kahn explores aural activities in literature, music, visual arts, theater, and film. Placing aurality at the center of the history of the arts, he revisits key artistic questions, listening to the sounds that drown out the politics and poetics that generated them. Artists discussed include Antonin Artaud, George Brecht, William Burroughs, John Cage, Sergei Eisenstein, Fluxus, Allan Kaprow, Michael McClure, Yoko Ono, Jackson Pollock, Luigi Russolo, and Dzigia Vertov.

*Lab 257* Michael C. Carroll,2009-10-13 Strictly off limits to the public, Plum Island is home to virginal beaches, cliffs, forests, ponds -- and the deadliest germs that have ever roamed the planet. *Lab 257* blows the lid off the stunning true nature and checkered history of Plum Island. It shows that the seemingly bucolic island in the shadow of New York City is a ticking biological time bomb that none of us can safely ignore. Based on declassified government documents, in-depth interviews, and access to Plum Island itself, this is an eye-opening, suspenseful account of a federal government germ laboratory gone terribly wrong. For the first time, *Lab 257* takes you deep inside this secret world and presents startling revelations on virus outbreaks, biological meltdowns, infected workers, the periodic flushing of

contaminated raw sewage into area waters, and the insidious connections between Plum Island, Lyme disease, and the deadly West Nile virus. The book also probes what's in store for Plum Island's new owner, the Department of Homeland Security, in this age of bioterrorism. Lab 257 is a call to action for those concerned with protecting present and future generations from preventable biological catastrophes.

*The Next Step*, 2017-03 The Next Step: Exponential Life presents essays on the potential of what are known as exponential technologies--those whose development is accelerating rapidly, such as robotics, artificial intelligence or industrial biology--considering their economic, social, environmental, ethical and even ontological implications. This book's premise is that humanity is at the beginning of a technological revolution that is evolving at a much faster pace than earlier ones--a revolution is so far-reaching it is destined to generate transformations we can only begin to imagine. Contributors include Aubrey D.N.J. de Grey, Jonathan Rossiter, Joseph A. Paradiso, Kevin Warwick, Huma Shah, Ramón López de Mántaras, Helen Papagiannis, Jay David Bolter, Maria Engberg, Robin Hanson, Stuart Russell, Darrell M.
