Kingdom Animalia Aracelis Girmay, 2011-09-20 The poems in this highly anticipated second book are elegiac poems, as concerned with honoring our dead as they are with praising the living. Through Aracelis Girmay's lens, everything is animal: the sea, a jukebox, the desert. In these poems, everything possesses a system of desire, hunger, a set of teeth, and language. These are poems about what is both difficult and beautiful about our time here on earth. Aracelis Girmay's debut collection won the Great Lakes Colleges Association New Writers Award. A Cave Canem Fellow, she is on the faculty at Drew University and Hampshire College. She lives in Brooklyn, New York.

Concepts of Biology Samantha Fowler, Rebecca Roush, James Wise, 2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features

that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.
