Advances in Practical Applications of Agents, Multi-Agent Systems, and Complex Systems Simulation. The PAAMS Collection Frank Dignum, Philippe Mathieu, Juan Manuel Corchado, Fernando De La Prieta, 2022-10-12 This book constitutes the proceedings of the 20th International Conference on Practical Applications of Agents and Multi-Agent Systems, PAAMS 2022, held in L'Aquila, Italy in July 2022. The 37 full papers in this book were reviewed and selected from 67 submissions. Another 10 demonstrations papers were selected from 11 submissions are presented here as short papers. The papers deal with the application and validation of agent-based models, methods, and technologies in a number of key applications areas, including: advanced models and learning, agent-based programming, decision-making, education and social interactions, formal and theoretic models, health and safety, mobility and the city, swarms and task allocation.

Political Handbook of the World 2022-2023 Tom Lansford, 2023-04-25 The Political Handbook of the World 2022-2023 provides timely, thorough, and accurate political information, with more in-depth coverage of current political controversies than any other reference guide. The updated 2022-2023 edition continues to be the most authoritative source for finding complete facts and analysis on each country's governmental and political makeup. Tom Lansford has compiled in one place more than 200 entries on countries and territories throughout the world, this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system. It also provides names of key ambassadors and international memberships of each country, plus detailed profiles of more than 30 intergovernmental organizations and UN agencies. And this update will aim to include coverage of current events, issues, crises, and controversies from the course of the last two years.

The Four Realms of Existence Joseph E. LeDoux, 2023-10-24 One of the world's leading experts on mind and brain takes us on an expedition that reveals a new view of what makes us who we are. Humans have long thought of their bodies and minds as separate spheres of existence. The body is physical—the source of aches and pains. But the mind is mental; it perceives, remembers, believes, feels, and imagines. Although modern science has largely eliminated this mind-body dualism, people still tend to imagine their minds as separate from their physical being. Even in research, the notion of the "self" as somehow distinct from the rest of the organism persists. Joseph LeDoux argues that we have hit an epistemological wall—that ideas like the self are increasingly barriers to discovery and understanding. He offers a new framework of who we are, theorizing four realms of existence—bodily, neural, cognitive, and conscious. The biological realm makes life possible. Hence, every living thing exists biologically. Animals, uniquely, supplement biological existence with a nervous system. This neural component enables them to control their bodies with speed and precision unseen in other forms of life. Some animals with nervous systems possess a cognitive realm, which allows the creation of internal representations of the world around them. These mental models are used to control a wide range of behaviors. Finally, the conscious realm allows its possessors to have inner experiences of, and thoughts about, the world. Together, LeDoux shows, these four realms make humans who and what we are. They cooperate continuously and underlie our capacity to live and experience ourselves as beings with a past, present, and future. The result, LeDoux shows, is not a self but an "ensemble of being" that subsumes our entire human existence, both as individuals and as a species.

True West Betsy Gaines Quammen, 2023-10-24 True West explores myths of the West and how, if left unexamined, they distort the realities of the present and exacerbate polarizations. These misperceptions about land, politics, liberty, and self-determination threaten the wellbeing of western communities overrun by newcomers seeking a

dream--and the country unless America recognizes the dangers of building a national identity on illusion. Betsy Gaines Quammen interrogates it all by listening, carefully, to people from varying political and cultural perspectives as she seeks to reconcile the deep anger and broad misunderstandings that linger amid myths that define and impede the West and America.

China's Long and Winding Road to Modernization Fu-Lai Tony Yu, Diana S. Kwan, 2023 This book adopts Austrian and evolutionary approaches to interpret contemporary China's economic transformation under uncertainty, learning and experimentation. It incorporates culture, institutions, government agents and entrepreneurship to understand policy making in China.

The nature of human experience with language and education Çelen Dimililer, Ahmet Güneşli, 2023-06-05

Bestsellers and masterpieces Heather Blurton, Dwight F. Reynolds, 2022-08-16 Bestsellers and masterpieces: The changing medieval canon addresses the strange fact that, in both European and Middle Eastern medieval studies, those texts that we now study and teach as the most canonical representations of their era were in fact not popular or even widely read in their day. On the other hand, those texts that were popular, as evidenced by the extant manuscript record, are taught and studied with far less frequency. The book provides cross-cultural insight into both the literary tastes of the medieval period and the literary and political forces behind the creation of the 'modern canon' of medieval literature.
