Goodman, Charlene Marshall, 2015-01-01 Recognizing and Reporting Red Flags for the Physical Therapist Assistant will help you develop skills to recognize signs and symptoms that can compromise patient care. It is the first text to present a consistent, three-step model for monitoring patients for red flags relating to neuromuscular and musculoskeletal problems, medical diseases, side effects of medications, and other co-morbidities that may be unknown to the PT. Combining the insights of physical therapist Catherine Cavallaro Goodman and physical therapist assistant Charlene Marshall, this resource is unmatched in providing clear guidelines for finding and documenting red flags. Coverage of warning flags includes red and yellow flags, risk factors, clinical presentation, signs and symptoms, helpful screening clues, and guidelines for communicating with the PT, allowing you as the PTA to quickly recognize the need for any re-evaluation of the patient. Three-step approach to formative assessments of physical therapy patients provides a consistent way to watch for and report on adverse changes such as range of motion, strength, pain, balance, coordination, swelling, endurance, or gait deviations. PTA Action Plans show the clinical application of text material relating to observing, documenting, and reporting red (or yellow) flags to the physical therapist. Clinically relevant information includes the tools that you need to monitor the patient's response to selected interventions, and accurately and quickly report changes to the supervising PT.
