13th International Conference on Computational Intelligence in Security for Information Systems (CISIS 2020) Álvaro Herrero,Carlos Cambra,Daniel

Urda,Javier Sedano,Héctor Quintián,Emilio Corchado,2020-08-27 This book contains accepted papers presented at CISIS 2020 held in the beautiful and historic city of Burgos (Spain), in September 2020. The aim of the CISIS 2020 conference is to offer a meeting opportunity for academic and industry-related researchers belonging to the various, vast communities of computational intelligence, information security, and data mining. The need for intelligent, flexible behaviour by large, complex systems, especially in mission-critical domains, is intended to be the catalyst and the aggregation stimulus for the overall event. After a thorough peer-review process, the CISIS 2020 International Program Committee selected 43 papers which are published in these conference proceedings achieving an acceptance rate of 28%. Due to the COVID-19 outbreak, the CISIS 2020 edition was blended, combining on-site and on-line participation. In this relevant edition, a special emphasis was put on the organization of five special sessions related to relevant topics as Fake News Detection and Prevention, Mathematical Methods and Models in Cybersecurity, Measurements for a Dynamic Cyber-Risk Assessment, Cybersecurity in a Hybrid Quantum World, Anomaly/Intrusion Detection, and From the least to the least: cryptographic and data analytics solutions to fulfil least minimum privilege and endorse least minimum effort in information systems. The selection of papers was extremely rigorous in order to maintain the high quality of the conference and we would like to thank the members of the Program Committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference, and the CISIS conference would not exist without their help.

Sound Works Holger Schulze,2019-04-04 What is sound design? What is its function in the early 21st century and into the future? Sound Works examines these questions in four parts: Part 1, Why This Sound?, presents an overview of the modern history of sound design. Part2 is highly visual and provides a

glance onto a sound designer's workbench and the current state of Sonic Labor. Part 3 uses cultural analysis to explore our contemporary Living with Sounds. The final and fourth part then proposes a series of anthropological and political interpretations of how "Sound Works" today. This book is not a manual on sound design; it instead argues for a cultural theory of sound design for sound designers and sound artists, for clients who commission a sound design and for researchers in the fields of sound studies, design research, and cultural studies

Selected Papers from the 12th International Networking Conference Bogdan

Ghita,Stavros Shiaeles,2021-01-04 The proceedings includes a selection of papers covering a range of subjects focusing on topical areas of computer networks and security with a specific emphasis of novel environments, ranging from 5G and virtualised infrastructures to Internet of things, smart environments and cyber security issues. Networking represents the underlying core of current IT systems, providing the necessary communication support for complex infrastructures. Recent years have witnessed a number of novel concepts moving from theory to large scale implementations, such as Software Defined Networking, Network Function Virtualisation, 5G, smart environments, and IoT. These concepts change fundamentally the paradigms used in traditional networking, with a number of areas such as network routing and system or business security having to adjust or redesign to accommodate them. While the benefits are clear, through the advent of new applications, use cases, improved user interaction and experience, they also introduce new challenges for generic network architectures, mobility, security, traffic engineering.

Proceeding of the International Conference on Computer Networks, Big Data and IoT (ICCBI - 2019) A. Pasumpon Pandian,Ram Palanisamy,Klimis

It also discusses security and privacy issues, network intrusion detection, cryptography, 5G/6G networks, social network analysis, artificial intelligence, human–machine interaction, smart home and smart city applications.

Старший брат следит за тобой: Как защитить себя в цифровом мире Михаил Райтман, В эпоху тотальной цифровизации сложно представить свою жизнь без интернета и умных устройств. Но даже люди, осторожно ведущие себя в реальном мире, часто недостаточно внимательно относятся к своей цифровой безопасности. Между тем с последствиями такой беспечности можно столкнуться в любой момент: злоумышленник может перехватить управление автомобилем, а телевизор – записывать разговоры зрителей, с помощью игрушек преступники могут похищать детей, а к видеокамерам можно подключиться и шпионить за владельцами. Существуют и государственные проекты наподобие «Умного города», подразумевающие повсеместное внедрение видеокамер и технологий распознавания лиц. Все это не значит, что нужно стремиться к цифровому затворничеству и панически избегать гаджетов, но необходимо изучить и соблюдать элементарные правила безопасности. Михаил Райтман в своей книге рассказывает, как максимально снизить вероятность утечки персональных данных, осложнив задачу потенциальным злоумышленникам.

Intelligente Videoüberwachung Monika Desoi,2018-03-12 Monika Desoi

betrachtet den Einsatz „intelligenter“ Videoüberwachungssysteme, welche Videobilder nicht nur übertragen und aufnehmen, sondern auch auswerten können. Durch Vernetzung mit Kleinstsensoren können weitere Arten personenbezogener Daten erhoben und mit den gewonnenen Erkenntnissen der „intelligenten“ Bildanalyse verknüpft werden. Hierdurch greifen diese Videoüberwachungssysteme tiefer in die Grundrechte der Betroffenen ein. Am Beispiel des Drei-Stufen-Modells legt die Autorin dar, wie die entstehenden Risiken durch eine rechtsgemäße Gestaltung der einzusetzenden Technik vermindert werden können. Sie zeigt, wie der Einsatz, jeweils abhängig vom Einsatzszenario und der damit verbundenen technischen Ausgestaltung des Systems, verhältnismäßig gestaltet und damit gerechtfertigt werden kann.
