Professor Barbara Stark

Psychomythics William R. Uttal, 2014-04-04 Psychology deals with the most complex subject matter of any science. As such, it is subject to misunderstandings, artifacts, and just simple errors of data, logic, and interpretation. This book teases out the details of some of the sources of these errors. It considers errors in psychological data and theories that arise from confusing endogenous and exogenous causal forces in perceptual research, misinterpreting the effects of inevitable natural laws as psychological phenomena, improper application of statistics and measurement, and flawed assumptions. Examples of each of these sources of error are presented and discussed. Finally, the book concludes that a return to a revitalized kind of behaviorism is preferred, rather than continuing on the current cognitive path.

Eyes on Target Scott McEwen, Richard Miniter, 2014-02-25 Told through the eyes of current and former Navy SEALs, *EYES ON TARGET* is an inside account of some of the most harrowing missions in American history—including the mission to kill Osama bin Laden and the mission that wasn't, the deadly attack on the US diplomatic outpost in Benghazi where a retired SEAL sniper with a small team held off one hundred terrorists while his repeated radio calls for help went unheeded. The book contains incredible accounts of major SEAL operations—from the violent birth of SEAL Team Six and the aborted Operation Eagle Claw meant to save the hostages in Iran, to key missions in Iraq and Afghanistan where the SEALs suffered their worst losses in their fifty year history—and every chapter illustrates why this elite military special operations unit remains the most feared anti-terrorist force in the world. We hear reports on the record from retired SEAL officers including Lt. Cmdr. Richard Marcinko, the founder of SEAL Team Six, and a former Commander at SEAL team Six, Ryan Zinke, and we come away understanding the deep commitment of these military men who put themselves in danger to protect our country and save American lives. In the face of insurmountable odds and the imminent threat of death, they give all to protect those who cannot protect themselves. No matter the situation, on duty or at ease, SEALs never, ever give up. One powerful chapter in the book tells the story of how one Medal of Honor winner saved another, the only time this has been done in US military history. *EYES ON TARGET* includes these special features: A detailed timeline of events during the Benghazi attack Sample rescue scenarios from a military expert who believes that help could have reached the Benghazi compound in time The US House Republican Conference Interim Progress Report on the events surrounding the September 11, 2012 Terrorist Attacks in Benghazi Through their many interviews and unique access, Scott McEwen and Richard Miniter pull back the veil that has so often concealed the heroism of these patriots. They live by a stringent and demanding code of their own creation, keeping them ready to ignore politics, bureaucracy and—if necessary—direct orders. They share a unique combination of character, intelligence, courage, love of country and what can only be called true grit. They are the Navy SEALs, and they keep their Eyes on Target.

International Family Law Professor Barbara Stark, 2013-01-28 International law has become part of everyday family law practice, as lawyers everywhere are confronted with questions regarding the rights of 'mail-order' brides, the adoption of children from other countries, the abduction of children by foreign parents, and domestic violence victims seeking asylum. Indeed, globalization is transforming family law, even as families themselves are being redefined. This book provides a practical overview of such issues and also examines the ways in which culture shapes family law in different countries. It provides students with a useful introduction to challenging, complicated and fascinating issues in international family law. Finally, by incorporating a comparative perspective, it gives readers an opportunity to re-examine their own legal systems.

The Palgrave Handbook of Testimony and Culture Sara Jones, Roger Woods, 2023-04-19 This Palgrave Handbook examines the ways in which researchers and practitioners theorise, analyse, produce and make use of testimony. It explores the full range of testimony in the public sphere, including perpetrator testimony, testimony presented through social media and virtual reality. A growing body of research shows how complex and multi-layered testimony can be, how much this complexity adds to our understanding of our past, and how creators and users of testimony have their

own complex purposes. These advances indicate that many of our existing assumptions about testimony and models for working with it need to be revisited. The purpose of this Palgrave Handbook is to do just that by bringing together a wide range of disciplinary, theoretical, methodological, and practice-based perspectives.

The Crises of Postcoloniality in Africa Omeje, Kenneth, 2017-05-05 The Crises of Postcoloniality in Africa is an assemblage of transdisciplinary essays that offer a spirited reflection on the debate and phenomenon of postcoloniality in Africa, including the changing patterns and ramifications of problems, challenges and opportunities associated with it. A key conceptual rhythm that runs through the various chapters of the book is that, far from being demised, postcoloniality is still firmly embedded in Africa, manifesting itself in both blatant and insidious forms. Among the important themes covered in the book include the concepts of postcolonialism, postcoloniality, and neocolonialism; Africa's precolonial formations and the impact of colonialism; the enduring patterns of colonial legacies in Africa; the persistent contradictions between African indigenous institutions and western versions of modernity; the unravelling of the postcolonial state and issues of armed conflict, conflict intervention and peacebuilding; postcolonial imperialism in Africa and the US-led global war on terror, the historical and postcolonial contexts of gender relations in Africa, as well as pan-Africanism and regionalist approaches to redressing the crises of postcoloniality.

Nicolaes Witsen and Shipbuilding in the Dutch Golden Age A. J. Hoving, Diederick Wildeman, 2012-03-29 In 1671, Dutch diplomat and scientist Nicolaes Witsen published a book that served, among other things, as an encyclopedia for the "shell-first" method of ship construction. In the centuries since, Witsen's rather convoluted text has also become a valuable source for insights into historical shipbuilding methods and philosophies during the "Golden Age" of Dutch maritime trade. However, as André Wegener Sleeswyk's foreword notes, Witsen's work is difficult to access not only for its seventeenth-century Dutch language but also for the vagaries of its author's presentation. Fortunately for scholars and students of nautical archaeology and shipbuilding, this important but chaotic work has now been reorganized and elucidated by A. J. Hoving and translated into English by Alan Lemmers. In Nicolaes Witsen and Shipbuilding in the Dutch Golden Age, Hoving, master model builder for the Rijksmuseum in Amsterdam, sorts out the steps in Witsen's method for building a seventeenth-century pinas by following them and building a model of the vessel. Experimenting with techniques and materials, conducting research in other publications of the time, and rewriting as needed to clarify and correct some vital omissions in the sequence, Hoving makes Witsen's work easier to use and understand. Nicolaes Witsen and Shipbuilding in the Dutch Golden Age is an indispensable guide to Witsen's work and the world of his topic: the almost forgotten basics of a craftsmanship that has been credited with the flourishing of the Dutch Republic in the seventeenth century. Economic Modeling of Water Glyn Wittwer, 2012-03-14 The book details the innovative TERM (The Enormous Regional Model) approach to regional and national economic modeling, and explains the conversion from a comparative-static to a dynamic model. It moves on to an adaptation of TERM to water policy, including the additional theoretical and database requirements of the dynamic TERM-H2O model. In particular, it examines the contrasting economic impacts of water buyback policy and recurring droughts in the Murray-Darling Basin. South-east Queensland, where climate uncertainty has been borne out by record-breaking drought and the worst floods in living memory, provides a chapter-length case study. The exploration of the policy background and implications of TERM's dynamic modeling will provide food for thought in policy making circles worldwide, where there is a pressing need for solutions to similarly intractable problems in water management.

Holding Their Breath Marion Girard Dorsey, 2023-03-15 *Holding Their Breath* uncovers just how close Britain, the United States, and Canada came to crossing the red line that restrained chemical weapon use during World War II. Unlike in World War I, belligerents did not release poison gas regularly during the Second World War. Yet, the looming threat of chemical warfare significantly

affected the actions and attitudes of these three nations as they prepared their populations for war, mediated their diplomatic and military alliances, and attempted to defend their national identities and sovereignty. The story of chemical weapons and World War II begins in the interwar period as politicians and citizens alike advocated to ban, to resist, and eventually to prepare for gas use in the next war. M. Girard Dorsey reveals, through extensive research in multinational archives and historical literature, that although poison gas was rarely released on the battlefield in World War II, experts as well as lay people dedicated significant time and energy to the weapon's potential use; they did not view chemical warfare as obsolete or taboo. Poison gas was an influential weapon in World War II, even if not deployed in a traditional way, and arms control, for various reasons, worked. Thus, what did not happen is just as important as what did. *Holding Their Breath* provides insight into these potentialities by untangling World War II diplomacy and chemical weapons use in a new way.

Macromolecular Protein Complexes II: Structure and Function J. Robin Harris, Jon Marles-Wright, 2020-01-14 This book follows on from Volume 83 in the SCBI series ("Macromolecular Protein Complexes"), and addresses several important topics (such as the Proteasome, Anaphase Promoting Complex, Ribosome and Apoptosome) that were not previously included, together with a number of additional exciting topics in this rapidly expanding field of study. Although the first SCBI Protein Complex book focused on soluble protein complexes, the second (Vol. 87) addressed Membrane Complexes, and the third (Vol. 88) put the spotlight on Viral Protein and Nucleoprotein Complexes, a number of membrane, virus and even fibrillar protein complexes have been considered for inclusion in the present book. A further book is also under preparation that follows the same pattern, in an attempt to provide a thorough coverage of the subject. Chapter 9 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

The European Union, China and Central Asia Fabienne Bossuyt, Bart Dessein, 2021-10-04 This book examines the involvement of the European Union (EU) and China in Central Asia and critically assesses the implications this has for the region as a whole. The volume adopts a comprehensive, interdisciplinary approach, combining insights from International Relations, EU Studies, International Economics, International Law, Sinology, and History. It concentrates on three thematic levels: (1) historical and contextual, (2) geopolitical and geo-economic, and (3) socio-cultural and institutional. Paying particular attention to the role of the EU and the factors driving the EU's and China's relations with Central Asia, it looks at how the Central Asian countries position themselves vis-à-vis China's growing influence, and how the balance of power between China, Russia, and the EU plays out. Contributors also explore the important historical context of the 'Silk Routes', as well as of the erstwhile connection of the Central Asian states with the Soviet Union. Critically analysing the potential areas for collaboration and synergy between the EU and China, the book also discusses the extent to which they share a common ground in Central Asia that could serve as a basis for long-term cooperation. It will be of interest to all scholars and students of International Relations, Economics, Sinology, and History.

Digital Contact Tracing for Pandemic Response Jeffrey P. Kahn, Johns Hopkins Project on Ethics and Governance of Digital Contact Tracing Technologies, 2020-05-29 As nations race to hone contact-tracing efforts, the world's experts consider strategies for maximum transparency and impact. As public health professionals around the world work tirelessly to respond to the COVID-19 pandemic, it is clear that traditional methods of contact tracing need to be augmented in order to help address a public health crisis of unprecedented scope. Innovators worldwide are racing to develop and implement novel public-facing technology solutions, including digital contact tracing technology. These technological products may aid public health surveillance and containment strategies for this pandemic and become part of the larger toolbox for future infectious outbreak prevention and control. As technology evolves in an effort to meet our current moment, Johns Hopkins Project on Ethics and Governance of Digital Contact Tracing Technologies—a rapid research and expert consensus group effort led by Dr. Jeffrey P. Kahn of the Johns Hopkins Berman Institute of Bioethics in collaboration with the university's Center for Health Security—carried out an in-depth

analysis of the technology and the issues it raises. Drawing on this analysis, they produced a report that includes detailed recommendations for technology companies, policymakers, institutions, employers, and the public. The project brings together perspectives from bioethics, health security, public health, technology development, engineering, public policy, and law to wrestle with the complex interactions of the many facets of the technology and its applications. This team of experts from Johns Hopkins University and other world-renowned institutions has crafted clear and detailed guidelines to help manage the creation, implementation, and application of digital contact tracing. Digital Contact Tracing for Pandemic Response is the essential resource for this fast-moving crisis. Child Rights in India Asha Bajpai,2018-02-15 Legislation is one of the most important tools for empowering children. It reflects the commitment of the state to promote an ideal and progressive value system. Recent years have seen several key developments in the law, policy, and practice related to child rights. Significantly, with the adoption of the United Nations Convention on the Rights of the Child in 1989, a rights-based approach has acquired prominence in the child rights discourse across the world. The book analyses the laws in the light of court judgments and policy initiatives taken in India. It also examines the interventions and strategies employed by non-governmental organizations in recommending legislative reforms in support of children. This fully revised third edition focuses on the new legal developments in India—such as the Juvenile Justice (Care and Protection of Children) Act, 2015; the new Central Adoption Resource Agency guidelines; the Right of Children to Free and Compulsory Education Act, 2009; and the National Food Security Act, 2013—thus attempting to integrate the law in theory and field practice.
