Advances in Decision Sciences, Image Processing, Security and Computer Vision Suresh Chandra Satapathy, K. Srujan Raju, K. Shyamala, D. Rama Krishna, Margarita N. Favorskaya, 2019-07-12 This book constitutes the proceedings of the First International Conference on Emerging Trends in Engineering (ICETE), held at University College of Engineering and organised by the Alumni Association, University College of Engineering, Osmania University, in Hyderabad, India on 22–23 March 2019. The proceedings of the ICETE are published in three volumes, covering seven areas: Biomedical, Civil, Computer Science, Electrical & Electronics, Electronics & Communication, Mechanical, and Mining Engineering. The 215 peer-reviewed papers from around the globe present the latest state-of-the-art research, and are useful to postgraduate students, researchers, academics and industry engineers working in the respective fields. Volume 1 presents papers on the theme “Advances in Decision Sciences, Image Processing, Security and Computer Vision – International Conference on Emerging Trends in Engineering (ICETE)”. It includes state-of-the-art technical contributions in the area of biomedical and computer science engineering, discussing sustainable developments in the field, such as instrumentation and innovation, signal and image processing, Internet of Things, cryptography and network security, data mining and machine learning.

SQL Tuning Dan Tow, 2003-11-19 A poorly performing database application not only costs users time, but also has an impact on other applications running on the same computer or the same network. SQL Tuning provides an essential next step for SQL developers and database administrators who want to extend their SQL tuning expertise and get the most from their database applications. There are two basic issues to focus on when tuning SQL: how to find and interpret the execution plan of an SQL statement and how to change SQL to get a specific alternate execution plan. SQL Tuning provides answers to these questions and addresses a third issue that's even more important: how to find the optimal execution plan for the query to use. Author Dan Tow outlines a timesaving method he's developed for finding the optimum execution plan--rapidly and systematically--regardless of the complexity of the SQL or the database platform being used. You'll learn how to understand and control SQL execution plans and how to diagram SQL queries to deduce the best execution plan for a query. Key chapters in the book include exercises to reinforce the concepts you've learned. SQL Tuning concludes by addressing special concerns and unique solutions to unsolvable problems. Whether you are a programmer who develops SQL-based applications or a database administrator or other who troubleshoots poorly tuned applications, SQL Tuning will arm you with a reliable and deterministic method for tuning your SQL queries to gain optimal performance.

Space Infrastructures: From Risk to Resilience Governance U. Tatar, A.V. Gheorghe, O.F. Keskin, 2020-04-17 Space-critical infrastructures

represent an interdependent system of systems consisting of workforce, environment, facilities, and multidirectional interactions. These are essential for the maintenance of vital societal functions such as health, safety, security, mobility, and the economic and social well-being of people, and their destruction or disruption would have a significant impact on society as a whole. In all, 79 nations and government consortia currently operate satellites, with 11 countries operating 22 launch sites. Despite creating new challenges, this multi-actor environment offers opportunities for international cooperation, but making the most of these opportunities requires a holistic approach to space-critical infrastructure, away from strictly defined space technologies and towards understanding the resilience of complex systems and how they are intertwined in reality. This book presents papers from the NATO Advanced Research Workshop (ARW), entitled Critical Space Infrastructure: From Vulnerabilities and Threats to Resilience, held in Norfolk, Virginia, USA from 21-22 May 2019. The ARW brought together representatives from academia, industry, and international organizations in an effort to deepen scientific and technological understanding of space-critical infrastructures and explore the implications for national and international space security and resilience. It examined space as a critical infrastructure from a multidisciplinary perspective in accordance with NATO's Strategic Concept. The 29 chapters in the book are divided into six sections covering space infrastructure: governance; cybersecurity; risk, resiliency and complexity; emerging technologies such as block chain, artificial intelligence and quantum computing; application domains; and national approaches and applications.

Annual Report on Exchange Arrangements and Exchange Restrictions 2011 International Monetary Fund. Monetary and Capital Markets Department, 2011-10-25 Published since 1950, this authoritative, annual reference is based upon a unique IMF database that tracks exchange and trade arrangements for all 186 IMF member countries, along with Hong Kong SAR, Aruba, and the Netherlands Antilles. The Annual Report on Exchange Arrangements and Exchange Restrictions (AREAER) draws together information available to the IMF from a number of sources, including during official IMF staff visits to member countries. There is a separate chapter for each of the 189 countries included, and these are presented in a clear, easy-to-read tabular format. A summary table allows for simple cross-country comparisons of key features of their exchange and trade regimes. The report's introduction summarizes recent global trends and developments. It discusses such topical issues as exchange rate arrangements, current or capital transactions, or prudential regulations. The individual country chapters outline exchange measures in place, the structure and setting of exchange rates, arrangements for payments and receipts, procedures for resident and nonresident accounts, mechanisms for import and export payments and receipts, controls on capital transactions, and provisions specific to the financial sector. The report now provides more detailed information on the operations of foreign exchange markets and exchange rate mechanisms and better describes the regulatory framework for current and capital account transactions.

ICT Analysis and Applications Simon Fong, Nilanjan Dey, Amit Joshi, 2020-02-03 This book proposes new technologies and discusses future solutions for ICT design infrastructures, as reflected in high-quality papers presented at the 4th International Conference on ICT for Sustainable Development (ICT4SD 2019), held in Goa, India, on 5-6 July 2019. The conference provided a valuable forum for cutting-edge research discussions among pioneering researchers, scientists, industrial engineers, and students from all around the world. Bringing together experts from different countries, the book explores a range of central issues from an international perspective.

Multilingual Memories Robert Blackwood, John Macalister, 2019-10-17 Drawing on a range of disciplines from within the humanities and social sciences, Multilingual Memories addresses questions of remembering and forgetting from an explicitly multilingual perspective. From a museum at Victoria Falls in Zambia to a Japanese-American internment in Arkansas, this book probes how the medium of the communication of memories affirms social orders across the globe. Applying linguistic landscape approaches to a wide variety of monuments and memorials from around the world, this

book identifies how multilingualism (and its absence) contributes to the inevitable partiality of public memorials. Using a number of different methods, including multimodal discourse analysis, code preferences, interaction orders, and indexicality, the chapters explore how memorials have the potential to erase linguistic diversity as much as they can entextualize multilingualism. With examples from Africa, Asia, Australasia, Europe, and North and South America, this volume also examines the extent to which multilingual memories legitimize not only specific discourses but also individuals, particular communities, and ethno-linguistic groups - often to the detriment of others.

Greene's Protective Groups in Organic Synthesis Peter G. M. Wuts, Theodora W. Greene, 2012-12-20 The Fourth Edition of Greene's Protective Groups in Organic Synthesis continues to be an indispensable reference for controlling the reactivity of the most common functional groups during a synthetic sequence. This new edition incorporates the significant developments in the field since publication of the third edition in 1998, including... New protective groups such as the fluorosulfonyl family and the uniquely removable 2-methoxybenzenesulfonyl group for the protection of amines New techniques for the formation and cleavage of existing protective groups, with examples to illustrate each new technique Expanded coverage of the unexpected side reactions that occur with protective groups New chart covering the selective deprotection of silyl ethers 3,100 new references from the professional literature The content is organized around the functional group to be protected, and ranges from the simplest to the most complex and highly specialized protective groups.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

A Peep at the Blacks' Ian Clark,2015-01-01 This book is concerned with the history of tourism at the Coranderrk Aboriginal Station at Healesville, northeast of Melbourne, which functioned as a government reserve from 1863 until its closure in 1924. At Coranderrk, Aboriginal mission interests and tourism intersected and the station became a 'showplace' of Aboriginal culture and the government policy of assimilation. The Aboriginal residents responded to tourist interest by staging cultural performances that involved boomerang throwing and traditional ways of lighting fires and by manufacturing and selling traditional artifacts. Whenever government policy impacted adversely on the Aboriginal community, the residents of Coranderrk took advantage of the opportunities offered to them by tourism to advance their political and cultural interests. This was particularly evident in the 1910s and 1920s when government policy moved to close the station.
