Preclinical Safety Evaluation of Biopharmaceuticals Joy A. Cavagnaro,2013-03-07 The goal is to provide a comprehensive reference book for the preclinical discovery and development scientist whose responsibilities span target identification, lead candidate selection, pharmacokinetics, pharmacology, and toxicology, and for regulatory scientists whose responsibilities include the evaluation of novel therapies. —From the Afterword by Anthony D. Dayan Proper preclinical safety evaluation can improve the predictive value, lessen the time and cost of launching new biopharmaceuticals, and speed potentially lifesaving drugs to market. This guide covers topics ranging from lead candidate selection to establishing proof of concept and toxicity testing to the selection of the first human doses. With chapters contributed by experts in their specific areas, *Preclinical Safety Evaluation of Biopharmaceuticals: A Science-Based Approach to Facilitating Clinical Trials*: Includes an overview of biopharmaceuticals with information on regulation and methods of production Discusses the principles of ICH S6 and their implementation in the U.S., Europe, and Japan Covers current practices in preclinical development and includes a comparison of safety assessments for small molecules with those for biopharmaceuticals Addresses all aspects of the preclinical evaluation process, including: the selection of relevant species; safety/toxicity endpoints; specific considerations based upon class; and practical considerations in the design, implementation, and analysis of biopharmaceuticals Covers transitioning from preclinical development to clinical trials This is a hands-on, straightforward reference for professionals involved in preclinical drug development, including scientists, toxicologists, project managers, consultants, and regulatory personnel.

Government Finance Statistics Manual Sage De Clerck,Tobias Wickens,2015-03-10 The Government Finance Statistics Manual 2014 (GFSM 2014)—describes a specialized macroeconomic statistical framework--the government finance statistics (GFS) framework--designed to support fiscal analysis. The manual provides the economic and statistical reporting principles to be used in compiling the statistics; describes guidelines for presenting fiscal statistics within an analytic framework that includes appropriate balancing items; and is harmonized with other macroeconomic statistical guidelines.

One Health: The Human-Animal-Environment Interfaces in Emerging Infectious Diseases John S. Mackenzie,Martyn Jeggo,Peter Daszak,Juergen A. Richt,2013-11-22 One Health is an emerging concept that aims to bring together human, animal, and environmental health. Achieving harmonized approaches for disease detection and prevention is difficult because traditional boundaries of medical and veterinary practice must be crossed. In the 19th and early 20th centuries this was not the case—then researchers like Louis Pasteur and Robert Koch and physicians like William Osler and Rudolph Virchow crossed the boundaries between animal and human health. More recently Calvin Schwabe revised the concept of One Medicine. This was critical for the advancement of the field of epidemiology, especially as applied to zoonotic diseases. The future of One Health is at a crossroads with a need to more clearly define its boundaries and demonstrate its benefits. Interestingly the greatest acceptance of One Health

is seen in the developing world where it is having significant impacts on control of infectious diseases.

The Intercultural City Charles Landry, Phil Wood, 2012 In a world of increasing mobility, how people of different cultures live together is a key issue of our age, especially for those responsible for planning and running cities. New thinking is needed on how diverse communities can cooperate in productive harmony instead of leading parallel or antagonistic lives. Policy is often dominated by mitigating the perceived negative effects of diversity, and little thought is given to how a 'diversity dividend' or increased innovative capacity might be achieved. The Intercultural City, based on numerous case studies worldwide, analyses the links between urban change and cultural diversity. It draws on original research in the US, Europe, Australasia and the UK. It critiques past and current policy and introduces new conceptual frameworks. It provides significant and practical advice for readers, with new insights and tools for practitioners such as the 'intercultural lens', 'indicators of openness', 'urban cultural literacy' and 'ten steps to an Intercultural City'. Published with Comedia.

Two Questers in the Twentieth-century North Africa Imen Ayari Cozzo, 2016-09-23 This book offers a unique exploration of the work of Paul Bowles and Ibrahim Alkoni, and reveals timely insights into the relationship between the West and the Orient, showing that they both challenge and extend existing scholarship on this subject. It builds on a sound theoretical platform which serves as a solid foundation for the analysis of the overarching theme. Theories of place, representation, Orientalism and post-colonialism are discussed in depth and are linked to the deconstruction and analysis of the selected literary texts, helping the reader understand the various quests and motivations of the protagonists of the works of Bowles and Alkoni. The first part of the book looks into the work of Bowles, and is based on the fact that many of the author's texts revolve around the theme of encounters between Western and Eastern cultures. It adopts a specific focus on the North African space, which is depicted from a number of different points of view, including native, French, English and American perspectives. The second section discusses the work of the Libyan author Ibrahim Alkoni as a quester for a Mythical Identity. It introduces the reader to the significance of the desert in both classical and modern Arabic literature and its place in the Arabic cultural imaginary. This work is highly original both in its approach and subject matter, and, as such, it

constitutes a valuable contribution to the study of comparative literature, Arabic literature, and postcolonial magical realist literature. It offers many original insights into this little studied field, demonstrating a successful venture into less-trodden terrain.

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Growing Cooler Reid H. Ewing,2008 Based on a comprehensive study review by leading urban planning researchers, this investigative document demonstrates how urban development is both a key contributor to climate change and an essential factor in combating it -- by reducing vehicle greenhouse gas emissions.

Achieving the Paris Climate Agreement Goals Sven Teske,2019-02-01 This open access book presents detailed pathways to achieve 100% renewable energy by 2050, globally and across ten geographical regions. Based on state-of-the-art scenario modelling, it provides the vital missing link between renewable energy targets and the measures needed to achieve them. Bringing together the latest research in climate science, renewable energy technology, employment and resource impacts, the book breaks new ground by covering all the elements essential to achieving the ambitious climate mitigation targets set out in the Paris Climate Agreement. For example, sectoral implementation pathways, with special emphasis on differences between developed and developing countries and regional conditions, provide tools to implement the scenarios globally and domestically. Non-energy greenhouse gas mitigation scenarios define a sustainable pathway for land-use change and the agricultural sector. Furthermore, results of the impact of the scenarios on employment and mineral and resource requirements provide vital insight on economic and resource management implications. The book clearly demonstrates that the goals of the Paris Agreement are achievable and feasible with current technology and are beneficial in economic and employment terms. It is essential reading for anyone with responsibility for implementing renewable energy or climate targets internationally or domestically, including climate policy negotiators, policy-makers at all levels of government, businesses with renewable energy commitments, researchers and the renewable energy industry.

In the Nation's Compelling Interest Institute of Medicine,Board on Health Sciences Policy,Committee on Institutional and Policy-Level Strategies for Increasing the Diversity of the U.S. Health Care Workforce,2004-06-29 The United States is rapidly transforming into one of the most racially and ethnically diverse nations in the world. Groups commonly referred to as minorities-including Asian Americans, Pacific Islanders, African Americans, Hispanics, American Indians, and Alaska Natives-are the fastest growing segments of the population and emerging as the nation's majority. Despite the rapid growth of racial and ethnic minority groups, their representation among the nation's health professionals has grown only

modestly in the past 25 years. This alarming disparity has prompted the recent creation of initiatives to increase diversity in health professions. In the Nation's Compelling Interest considers the benefits of greater racial and ethnic diversity, and identifies institutional and policy-level mechanisms to garner broad support among health professions leaders, community members, and other key stakeholders to implement these strategies. Assessing the potential benefits of greater racial and ethnic diversity among health professionals will improve the access to and quality of healthcare for all Americans.
