*Internationalizing Rural Science Teacher Preparation* Gayle A. Buck, Vesna Dimitrieska, Valarie L. Akerson, 2023-12-25 This edited volume discusses the need to increase quantity and enhance quality of science education focused on preparing rural students to thrive in an interconnected, interdependent, and complex world. It acknowledges that globally integrated education incorporates local knowledge and culture with global trends. Additionally it highlights globally competent science teaching is not included in most preparation programs, and teachers enter schools unprepared to address students' needs. Rural schools lack opportunities to keep up with reform efforts and may have limited experiences with diversity, particularly at the global level. These chapters describe globalization in authors' respective academic institutions by sharing global competence action research projects for preservice teachers. The studies presented were conducted in elementary and secondary science methods, and science content courses. The book's research is unique as the contributors have carried out action research in science teacher preparation programs and participated in peer discussions that helped them fill gaps in global science teaching while advancing the field of teacher preparation programs.

**Dynamic Sustainability** Jay S. Golden, 2023-12-21 This book provides new insights into the opportunities, risks, and unintended consequences for the American economy, legacy industries, global multinational corporations, and financial institutions having pledged to transition to a net-zero carbon economy. It places specific emphasis on 'systems analysis', as well as the unprecedented pace needed for our sustainability transition. It examines the implications of organizations purchasing voluntary carbon credits which are not regulated, insured, and often not scientifically validated. It scrutinises how financial markets are driving corporate sustainability while at the same time conservative policymakers seek to ban Environmental Social Governance investments. Golden discusses national security as well as the growing rural-urban divide, seemingly widened by major automotive manufacturers looking to move towards zero-emission electric vehicles. Using empirical evidence to chart the effect of our sustainability transition on the government, the military, and corporations, this book is an

invaluable resource for researchers, graduate students, policymakers, and industry professionals.

Strategies to Improve Cardiac Arrest Survival Institute of Medicine, Board on Health Sciences Policy, Committee on the Treatment of Cardiac Arrest: Current Status and Future Directions, 2015-09-29 Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

*Theatre Theory and Performance* Siddhartha

Biswas, 2017-08-21 Over the last few centuries, the world as we know it has seen remarkable change and the arts - including theatre - have faced new challenges. Theatre is now no longer a simple point of entertainment laced with instruction or dissent, but is perceived as a more collaborative idea that looks at ever-changing paradigms. All over the world, theatre now is a dynamic process that simultaneously retains tradition and delves into extreme experimentations. This book represents a starting point for a much-needed critical interrogation. It looks at the constant features of European theatre and brings in some Indian elements, positing both in their respective locations, as well as looking at the symbiosis that has been functioning for some time.

*How Do We Know Ourselves?* David G. Myers, 2022-11-01

“Each chapter is a gem of insight into the human experience, cut and polished to perfection by the renowned psychologist David Myers. Better than any book I can recall, this book answers questions about why we think, feel, and act as we do—but also makes us curious to learn more.” —Angela Duckworth A delightful tour of the wonders of our humanity from David G. Myers, the award-winning professor and author of psychology’s bestselling textbook. Over the past three decades, millions of students have learned about psychology from textbooks by David G. Myers. To create these books and to satisfy his own endless curiosity about the human mind, Myers monitors the leading journals to discover the most extraordinary developments in psychological science. *How Do We Know Ourselves?* is a compendium of the most wondrous verities that Myers has found, revealing thought-provoking insights into our everyday lives. His astute observations and sharp-witted wisdom enable readers to think smarter and live happier. Myers’s subjects range from why we so often fear the wrong things to how simply going for a walk with someone can increase rapport and empathy. He reveals why we repeatedly mishear song lyrics and how the color of President Obama’s suits aided in his decision-making. Myers also explores the powers and perils of our intuition, explaining why anything can seem obvious once it happens. These forty essays offer fresh insight into our sometimes bewildering but ever-fascinating lives. Myers is engaging and intellectually provocative, and he brings a wealth of knowledge from more than fifty years of teaching and writing about psychology to this lively and informative collection. He inspires us to ponder timeless questions, including what might be the most intriguing one of all: How do we know ourselves?

### *Investing in the Health and Well-Being of Young Adults*

National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Improving the Health, Safety, and Well-Being of Young Adults, 2015-01-27 Young adulthood - ages approximately 18 to 26 - is a critical period of development with long-lasting implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. *Investing in The Health and Well-Being of Young Adults* describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. *Investing in The Health and Well-Being of Young Adults* makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and

success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. Investing in The Health and Well-Being of Young Adults will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.
