From the Ground Up Luke W. Cole, Sheila R. Foster, 2001 Cole (director, California Rural Legal Assistance Foundation's Center on Race, Poverty, and the Environment) and Foster (law, Rutgers University) examine the movement for environmental justice in the United States. Tracing the movement's roots and illustrating the historical and contemporary causes of environmental racism, they combine their analysis with a narrative account of struggles

from around the country--including those in Kettleman City, California, Chester, Pennsylvania, and Dilkon, Arizona. In so doing, they consider the transformative effects this movement has had on individuals, communities, and environmental policy. Annotation copyrighted by Book News Inc., Portland, OR

The Study of Names Frank Nuessel, 1992-09-30 An introduction and research guide to onomastics the study of names, this book covers the major areas of name study in individual chapters on personal names (anthroponyms), place names (toponyms), acronyms, brand names and trade names. A final chapter treats special areas such as designations for athletic teams, musical groups, and tropical storms, names of awards and alcoholic beverages, animal names, code names, and scientific nomenclature. The wealth of topics covered in each chapter may be gleaned from a listing of their subheadings (see table of contents). Included are such fascinating subjects as pseudonyms and personalized license plates, names for retirement communities and airports, racist and ethnic slurs, eponyms, and names of diseases and syndromes. Every topic comprises a discussion of underlying principles as well as numerous illustrative examples. Infused with linguistic interpretation, the study provides explanations based on phonetics (sounds of speech), morphology (shapes of names), syntax (place in sentence structure) and semantics (meaning). Throughout, special attention is given to classification and methodologies. The introduction clearly articulates theoretical aspects of onomastics, and a glossary of linguistic and onomastic terms appears as an appendix. Additional appendixes provide information on organizations and journals related to the field and a list of onomastic bibliographies. An extensive reference list and index complete the work. Useful as a text or reference book, *The Study of Names* is explicit enough to inform students of

linguistics, yet clear and lively enough to be a good read for anyone interested in names and naming.

Cardiovascular Genomics Keith DiPetrillo, 2012-03-07 As two of the leading causes of death worldwide, heart disease and stroke represent a clear target for genomic research aimed at deciphering the genes and cellular pathways that underlie cardiovascular disease and creating improved therapies. In *Cardiovascular Genomics: Methods and Protocols*, experts in the field provide methods for cardiovascular phenotyping of rodent models in the first section of the volume and for statistical and bioinformatic integration of phenotype data with genome-wide genotype and expression data in the second section. Understanding these diverse methods will allow an individual laboratory to utilize these genomic methods independently or to better prepare for collaboration with scientists having expertise in other disciplines in order to uncover genes affecting cardiovascular disease. Written in the highly successful *Methods in Molecular Biology*™ series format, chapters include introductions to their respective topics, lists of the necessary equipment, materials, and reagents, step-by-step, readily reproducible laboratory protocols, and notes on troubleshooting and avoiding known pitfalls. Cutting-edge and easy-to-use, *Cardiovascular Genomics: Methods and Protocols* will enable researchers to identify causal genes and novel molecular targets that can lead to vital new treatments for cardiovascular disease.

Cross-Disciplinary, Cross-Institutional Collaboration in Teacher Education

Cheryl J. Craig, Laura Turchi, Denise M. McDonald, 2020-11-24 This book focuses on the impact of sustained and evolving collaborations, showcasing research and scholarship in a faculty group—consisting of 28 professors from five regional universities—meeting and supporting each other since 2002. Originally an innovation introduced by Cheryl J. Craig and funded by a reform movement, the Faculty Academy continues to flourish in the fourth largest

city in America long after the reform initiative abandoned its charge. Contributors to this volume represent all stages of careers, include all races and genders, and write from a multiplicity of disciplinary stances (literacy, mathematics, science, social education, multiculturalism, English as a Second Language, accountability, etc.). In addition to fascinatingly diverse perspectives on teacher education, the authors also investigate issues related to career trajectories—including experiences of vulnerability. The volume illuminates how the Faculty Academy works as a dynamic academic and social bond: not only as a glue that binds members in community, but also in rigorous intellectual commitments that fuel their collective knowing and advance their careers while providing leadership, mentorship, and modelling in up-close and timely ways.

The Angelic Conflict R. B. Thieme, Jr., 2012-01-01 The Angelic Conflict rages around us. This is not a world war. This is a war beyond the world—an invisible warfare between the forces of Satan and the forces of God. Ultimately God will win. Long before the advent of human history, Satan arrogantly rebelled against his Creator. He wanted to make himself “like the Most High” and recruited one-third of the angels to follow him. God justly condemned Satan and his fallen angels to spend eternity in the lake of fire. Satan appealed the sentence, claiming unfairness—questioning how a loving God could cast His creatures into hell. Planet Earth is now the battleground where Satan seeks to outmaneuver God, prove the judgment unfair, and foil the execution of his sentence. Satan will not suffer defeat without an intense struggle. God created man to resolve this angelic conflict. Human volition is

the focal point of the firestorm. Will man choose God's grace plan of salvation or follow the arrogant system of Satan? Through the freewill decisions of mankind, God proves to Satan His perfect justice and love again and again. As believers, it is imperative we understand this spiritual warfare that surrounds us. Satan uses every ruse at his command to derail and discredit those who are in Christ. For our defense, God has provided an overwhelming advantage in a powerful suit of spiritual armor. With it we can withstand the "flaming missiles of the evil one" and become heroes in the invisible war. God is glorified as we lock shields and stand firm on His power and Word.
