Curriculum 21 Heidi Hayes Jacobs,2010-01-05 What year are you preparing your students for? 1973? 1995? Can you honestly say that your school's curriculum and the program you use are preparing your students for 2015 or 2020? Are you even preparing them for today? With those provocative questions, author and educator Heidi Hayes Jacobs launches a powerful case for overhauling, updating, and injecting life into the K-12 curriculum. Sharing her expertise as a world-renowned curriculum designer and calling upon the collective wisdom of 10 education thought leaders, Jacobs provides insight and inspiration in the following key areas: * Content and assessment: How to identify what to keep, what to cut, and what to create, and where portfolios and other new kinds of assessment fit into the picture. * Program structures: How to improve our use of time and space and groupings of students and staff. * Technology: How it's transforming teaching, and how to take advantage of students' natural facility with technology. * Media literacy: The essential issues to address, and the best resources for helping students become informed users of multiple forms of media. * Globalization: What steps to take to help students gain a global perspective. * Sustainability: How to instill enduring values and beliefs that will lead to healthier local, national, and global communities. * Habits of mind: The thinking habits that students, teachers, and administrators need to develop and practice to succeed in school, work, and life. The answers to these questions and many more make Curriculum 21 the ideal guide for transforming our schools into what they must become: learning organizations that match the times in which we live.

The Nature of Technology Michael P. Clough,Joanne K. Olson,Dale S Niederhauser,2013-09-03 How does technology alter thinking and action without our awareness? How can instantaneous information access impede understanding and wisdom? How does technology alter conceptions of education, schooling, teaching and what learning entails? What are the implications of these and other technology issues for society? Meaningful technology education is far more than learning how to use technology. It entails an understanding of the nature of technology — what technology is, how and why technology is developed, how individuals and society direct, react to, and are sometimes unwittingly changed by technology. This book places these and other issues regarding the nature of technology in the context of learning, teaching and schooling. The nature of technology and its impact on education must become a significant object of inquiry among educators. Students must come to understand the nature of technology so that they can make informed decisions regarding how technology may influence thinking, values and action, and when and how technology should be used in their personal lives and in society. Prudent choices regarding technology cannot be made without understanding the issues that this book raises. This book is intended to raise such issues and stimulate thinking and action among teachers, teacher educators, and education researchers. The contributions to this book raise historical and philosophical issues regarding the nature of technology and their implications for education; challenge teacher educators and teachers to promote understanding of the nature of technology; and provide practical considerations for teaching the nature of technology.

Other parts of the U.S. Government and some foreign governments have tried to apply the ‘DARPA model’ to help develop valuable new technologies. But how and why has DARPA succeeded? Which features of its operation and environment contribute to this success? And what lessons does its experience offer for other U.S. agencies and other governments that want to develop and demonstrate their own ‘transformative technologies’? When You Only See One Set of Footprints Darlene Jackson,2012-03-01 As I was called, like Abraham, to leave my father's house and follow Christ, my journey would take me and my children to many places which God has caused us to Triumph in Christ Jesus. I was told to share my story and write the things I've seen and heard and lived through so others can know they too can do the same when they put ALL of their Trust in the Holy God of Israel. When You Only See One Set of Footprints is like an open letter to all Living Epistle, for my life has seen everyday living and living for Christ. To give people hope no matter where you are, He can be there, also to show my children and others what Faith looks like despite what people think it ought to look like, to give people hope and encouragement to follow God to the end. This was also a walk for the destroying of Generational Curse so my children (Donelle, Nathifa, Monae, Dominique, Nakeya, Simone), and now my grandson (Nook, Nook), would not have to encounter because I have gone before them to destroy all curses in their path. To bring about transparency in this walk and to show We can come through all things through Christ who strengthens us, so may all be encouraged as well as inspired to continue in the faith and to fight the good fight of faith and know you fight not alone, for you too can see there were only one set of footprints. God Bless.
