**Atmospheric Effects in Space Geodesy** Johannes Böhm, Harald Schuh, 2013-06-12 Various effects of the atmosphere have to be considered in space geodesy and all of them are described and treated consistently in this textbook. Two chapters are concerned with ionospheric and tropospheric path delays of microwave and optical signals used by space geodetic techniques, such as the Global Navigation Satellite Systems (GNSS), Very Long Baseline Interferometry (VLBI), or Satellite Laser Ranging (SLR). It is explained how these effects are best reduced and modelled to improve the accuracy of space geodetic measurements. Other chapters are on the deformation of the Earth's crust due to atmospheric loading, on atmospheric excitation of Earth rotation, and on atmospheric effects on gravity field measurements from special satellite missions such as CHAMP, GRACE, and GOCE. All chapters have been written by staff members of the Department of Geodesy and Geoinformation at TU Wien who are experts in the particular fields.

*American Megafaunal Extinctions at the End of the Pleistocene* Gary Haynes, 2008-12-23 The volume contains summaries of facts, theories, and unsolved problems pertaining to the unexplained extinction of dozens of genera of mostly large terrestrial mammals, which occurred ca. 13,000 calendar years ago in North America and about 1,000 years later in South America. Another equally mysterious wave of extinctions affected large Caribbean islands around 5,000 years ago. The coupling of these extinctions with the earliest appearance of human beings has led to the suggestion that foraging humans are to blame, although major climatic shifts were also taking place in the Americas during some of the extinctions. The last published volume with similar (but not identical) themes -- *Extinctions in Near Time* -- appeared in 1999; since then a great deal of innovative, exciting new research has been done but has not yet been compiled and summarized. Different chapters in this volume provide in-depth resums of the chronology of the extinctions in North and South America, the possible insights into animal ecology provided by studies of stable isotopes and anatomical/physiological characteristics such as growth increments in mammoth and mastodont tusks, the clues from taphonomic research about large-mammal biology, the applications of dating methods to the extinctions debate, and archeological controversies concerning human hunting of large mammals.

*Analysis of Complex Surveys* C. J. Skinner, D. Holt, T. M. F. Smith, 1989-11-24 This study discusses appropriate principles and methods for the analysis of surveys, such as stratified multi-stage sampling, as well as the complex structure of the populations upon which these designs are based. It features essays on current research written by international experts.

**Wide-Gap Chalcopyrites** Susanne Siebentritt,Uwe Rau,2006-02-25 Chalcopyrites, in particular those with a wide band gap, are fascinating materials in terms of their technological potential in the next generation of thin-film solar cells and in terms of their basic material properties. They exhibit uniquely low defect formation energies, leading to unusual doping and phase behavior and to extremely benign grain boundaries. This book collects articles on a number of those basic material properties of wide-gap chalcopyrites, comparing them to their low-gap cousins. They explore the doping of the materials, the electronic structure and the transport through interfaces and grain boundaries, the formation of the electric field in a solar cell, the mechanisms and suppression of recombination, the role of inhomogeneities, and the technological role of wide-gap chalcopyrites.

**Biochemistry** David E. Metzler,2003-05-04 Biochemistry: The Chemical Reactions of Living Cells is a well-integrated, up-to-date reference for basic chemistry and underlying biological phenomena. Biochemistry is a comprehensive account of the chemical basis of life, describing the amazingly complex structures of the compounds that make up cells, the forces that hold them together, and the chemical reactions that allow for recognition, signaling, and movement. This book contains information on the human body, its genome, and the action of muscles, eyes, and the brain. \* Thousands of literature references provide introduction to current research as well as historical background \* Contains twice the number of chapters of the first edition \* Each chapter contains boxes of information on topics of general interest

**Online Film Production in China Using Blockchain and Smart Contracts** Patrice Poujol,2019-03-04 This book explores the use of Blockchain and smart contract technologies to develop new ways to finance independent films and digital media worldwide. Using case studies of Alibaba and in-depth, on-set observation of a Sino-US coproduction, as well as research collected from urban China, Hong Kong, Europe, and the USA, Online Film Production in China Using Blockchain and Smart Contracts explores new digital platforms and what this means for the international production of creative works. This research assesses the change in media consciousness from young urban audiences, their emergence as a potential participative and creative community within dis-intermediated, decentralised and distributed crowdfunding and crowdsourcing models. This research proposes solutions on how these young emerging local creative talents can be identified and nurtured early on, particularly those who now produce creative and artistic audiovisual content whether these works are related to film, Virtual Reality (VR), video game, graphic novels, or music. Ultimately, a new media content finance and production platform implementing blockchain is proposed to bring transparency in the film sector and open doors to emerging artists in digital media. Appropriate for both professionals and academics in the film industry as well as computer science.

**Macromolecular Architectures** Jöns G. Hilborn,2003-07-03 Molecular manipulation of nano- and microstructures paves the way to produce organic polymer materials by design. Such architectures comprise both the synthesis and the kinetics and thermodynamics of macromolecular organization and is the theme of this volume. The book consists of four articles reviewing living polymerization to produce precisely defined linear polyesters, comparing them to other living polymerization techniques. The articles also deal with the synthesis of polymeric dendrimers, either by the convergent or divergent approach; block copolymers synthesis, to define micromorphology in high performance polymers; and thereby tailoring their thermal, chemical, mechanical and dielectrical properties, and finally kinetics and thermodynamics for microstructural organization in macroporous thermosets.

**Sustainability in Denim** Subramanian Senthilkannan Muthu,2017-06-12 Sustainability in Denim provides the latest information on sustainable fabrics and practices. From cotton farming, to manufacture and end of life disposal, denim has extensive effects on the environment, inclusive of water consumption and contamination, destruction of large-scale ecosystems and transportation pollution. Additionally, recent developments in the manufacture of denim, such as the use of textiles, including elastane and polyester, have led to limitations in the high end recycling of denim. This book includes an introduction covering the history, manufacture and lifecycle of denim. It deals with the sustainability aspects of denim by addressing three important pillars of sustainability, the environmental, social and economic aspects, that when combined, present a unique approach in comparison to other books on the topic. The book primarily uses case studies to examine sustainability challenges throughout the denim lifecycle, and to evaluate new green initiatives and recycling processes. It will be of great use to industry professionals, sustainability managers, textile industry researchers and denim manufacturers. Reviews and studies denim from a sustainability perspective, addressing its major environmental, social and economic impacts Provides the reader with a fundamental knowledge of the history, manufacture and lifecycle of denim, thus enabling a holistic view of denim sustainability Presents new green initiatives for the processing and recycling of denim products for promotion and use amongst sustainability groups

**Cognitive Ecology** Reuven Dukas,1998-07-06 Cognitive Ecology lays the foundations for a field of study that integrates theory and data from evolutionary ecology and cognitive science to investigate how animal interactions with natural habitats shape cognitive systems, and how constraints imposed on nervous systems limit or bias animal behavior. Using critical literature reviews and theoretical models, the contributors provide new insights and raise novel questions about the adaptive design of specific brain capacities and about optimal behavior subject to the computational capabilities of brains.

**The Geography of Neandertals and Modern Humans in Europe and the Greater Mediterranean** Ofer Bar-Yosef,2000 During the Middle Paleolithic, various populations ancestral to modern Homo sapiens inhabited Africa, while Europe was homeland to the Neandertals. Recent archaeological investigations have provided data showing that the abrupt transition from the Middle to the Upper Neolithic, during which these populations met and interacted, was a fast-moving period of change for both groups. In this volume, the expansion of modern humans and their impact on the populations of Neandertals in Europe, Western Asia, and Northern Africa is discussed in depth, with particular focus on the lithic industries of the late Middle and early Upper Paleolithic.
