**The Opposite of Hate** Sally Kohn,2018-04-10 “A stunning debut by a truly gifted writer—an eye-opening read for both liberals and conservatives—and it could not come at a better time.”—Adam Grant, New York Times bestselling author of Option B, with Sheryl Sandberg What is the opposite of hate? As a progressive commentator on Fox News and now CNN, Sally Kohn has made a career out of bridging intractable political differences and learning how to talk respectfully with people whose views she disagrees with passionately. Her viral TED Talk on the need to practice emotional—rather than political—correctness sparked a new way of considering how often we amplify our differences and diminish our connections. But these days even famously “nice” Kohn finds herself wanting to breathe fire at her enemies. It was time, she decided, to look into the epidemic of hate all around us and learn how we can stop it. In The Opposite of Hate, Kohn talks to leading scientists and researchers and investigates the evolutionary and cultural roots of hate and how incivility can be a gateway to much worse. She travels to Rwanda, the Middle East, and across the United States, introducing us to former terrorists and white supremacists, and even some of her own Twitter trolls, drawing surprising lessons from dramatic and inspiring stories of those who left hate behind. As Kohn confronts her own shameful moments, whether it was back when she bullied a classmate or today when she harbors deep partisan resentment, she discovers, “The opposite of hate

is the beautiful and powerful reality of how we are all fundamentally linked and equal as human beings. The opposite of hate is connection." Sally Kohn's engaging, fascinating, and often funny book will open your eyes and your heart.

Provides a concise introduction of the fundamental science, related technological challenges, and solutions that microsupercapacitors can offer Compares microsupercapacitors with current technologies Reviews the applications of new strategies and the challenge of scaling down supercapacitors Covers the most relevant applications, including energy storage, energy harvesting, sensors and biomedical devices

***Supramolecular Chemistry in the 3rd Millennium*** Catherine E. Housecroft,2021-08-18 This Special Issue is one of the first for the new MDPI flagship journal Chemistry (ISSN 2624-8549) which has a broad remit for publishing original research in all areas of chemistry. The theme of this issue is Supramolecular Chemistry in the 3rd Millennium and I am sure that this topic will attract many exciting contributions. We chose this topic because it encompasses the unity of contemporary pluridisciplinary science, in which organic, inorganic, physical and theoretical chemists work together with molecular biologists and physicists to develop a systems-level understanding of molecular interactions. The description of supramolecular chemistry as 'chemistry beyond the molecule' (Jean-Marie Lehn, Nobel Lecture and Gautam R. Desiraju, Nature, 2001, 412, 397) addresses the wide variety of weak, non-covalent interactions that are the basis for the assembly of supramolecular architectures, molecular receptors and molecular recognition, programmed molecular systems, dynamic combinatorial libraries, coordination networks and functional supramolecular materials. We welcome submissions from all disciplines involved in this exciting and evolving area of science.

**Electronic Commerce 2018** Efraim Turban,Jon Outland,David King,Jae Kyu Lee,Ting-Peng Liang,Deborah C. Turban,2017-10-12 This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook , LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

***Knowledge Sharing in the Integrated Enterprise*** Peter Bernus,Mark Fox,2006-03-09 Enterprise Architects, in their endeavor to achieve Enterprise Integration, have limited guidance on how best to use Enterprise Models and Modeling Tools to support their practice. It is widely recognized that the practice

of engineering enterprises needs a number of models, but how to maintain the relation between these models with ease is still a problem. Model interoperability is an issue on multiple counts: - How to interchange models between enterprise modeling tools? - How to maintain the interdependencies between models - whether they describe the enterprise on the same level (but from different points of view), or from the same point of view (but on different levels of abstraction and granularity)? - How to maintain a coherent and evolving set of enterprise models in support of continuous change processes? - How to use and reuse enterprise models as a knowledge resource? The answers to these questions are of great importance to anyone who is implementing ISO9001:2000 requirements, whether through using enterprise architecture practice or not - although it can be argued that a well executed architecture practice should satisfy ISO9001 without additional effort. This volume attacks the problem on three fronts: 1. Authors working in international standardisation and tool development as well as in enterprise modeling research present the latest developments in semantic integration; 2. Authors who are practitioners of, or conducting active research in, enterprise architecting methodologies give an account on the latest developments and strategic directions in architecture frameworks and methodologies; 3. Authors who use or develop information integration infrastructures present best practice and future trends of this aspect of enterprise integration. Chapters of this book include contributions to the International Conference on Enterprise Integration and Modelling Technology (ICEIMT'04), and those presented at the Design of Information Infrastructure Systems for Manufacturing (DIISM'04) Workshop. While DIISM is traditionally oriented at supporting manufacturing practice, the results have a far greater domain of applicability.
