Disease Control Priorities, Third Edition (Volume 4) Vikram Patel,Dan Chisholm,Tarun

Dua,Ramanan Laxminarayan,Mari'a Lena Medina-Mora,Theo Vos,2016-03-10 Mental, neurological, and substance use disorders are common, highly disabling, and associated with significant premature mortality. The impact of these disorders on the social and economic well-being of individuals, families, and societies is large, growing, and underestimated. Despite this burden, these disorders have been systematically neglected, particularly in low- and middle-income countries, with pitifully small contributions to scaling up cost-effective prevention and treatment strategies. Systematically compiling the substantial existing knowledge to address this inequity is the central goal of this volume. This evidence-base can help policy makers in resource-constrained settings as they prioritize programs and interventions to address these disorders.

The United Nations world water development report 2019 WWP,2019-03-19 Access to water and sanitation is internationally recognized human right. Yet more than two billion people lack even the most basic of services. The latest United Nations World Water Development Report, Leaving No One Behind, explores the symptoms of exclusion and investigates ways to overcome inequalities.

Food Security in the High North Kamrul Hossain,Lena Maria Nilsson,Thora Martina

Herrmann,2020-09-09 This book explores the challenges facing food security, sustainability, sovereignty, and supply chains in the Arctic, with a specific focus on Indigenous Peoples. Offering multidisciplinary insights and with a particular focus on populations in the European High North region, the book highlights the importance of accessible and sustainable traditional foods for the dietary needs of local and Indigenous Peoples. It focuses on foods and natural products that are unique to this region and considers how they play a significant role towards food security and sovereignty. The book captures the tremendous complexity facing populations here as they strive to maintain sustainable food systems – both subsistent and commercial – and regain sovereignty over traditional food production policies. A range of issues are explored including food contamination risks, due to increasing human activities in the region, such as mining, to changing livelihoods and gender roles in the maintenance of traditional food security and sovereignty. The book also considers processing methods that combine indigenous and traditional knowledge to convert the traditional foods, that are harvested and hunted, into local foods. This book offers a broader understanding of food security and sovereignty and will be of interest to academics, scholars and policy makers working in food studies; geography and environmental studies; agricultural studies; sociology; anthropology; political science; health studies

and biology.

Doing Business in Europe Alina Mihaela Dima, 2018-04-09 The book brings together an international panel of experts on economic integration and international business to address the essential link between the two fields, namely the impact of integration processes on the business environment. Focusing on the European Union, it presents numerous examples and case studies to demonstrate how local business is becoming international business, and addresses the opportunities, constraints and overall historical changes. Starting with the regional and global economic integration framework, and subsequently exploring the institutional structure that makes everything possible and how the union came to be, the book reveals how the common policies of the EU impact businesses and entrepreneurship within both the common market and the member states. Readers will learn about the economic and political context that affect businesses in Europe; understand the basic concepts of integration, accompanied by cases and examples; gain a new perspective on important EU sectoral policies and challenges for individuals and businesses; become aware of the main challenges to EU enlargement; and better grasp the advantages and disadvantages of doing business in Europe in the present context.

Large-Scale Land Investments in Least Developed Countries Luis Tomás Montilla Fernández, 2018-08-25 This book analyses large-scale land investments for agricultural purposes in Africa's least developed countries from a law and economics perspective. Focusing on the effects of foreign land investments on host countries' local populations and the apparent failure of international law to create incentives to offset them, it also examines the legal and economic mechanisms to hold investors accountable in cases where their investment leads to human rights violations. Applying principal agent and contract theory, it elucidates the sources of opportunism and develops control mechanisms to ameliorate the negative effects. It shows that although judicial mechanisms fail to deliver justice, international law offers alternatives to safeguard against arbitrary and abusive state and investor conduct, and also to effectuate human rights and, thus, tackle opportunistic behaviour.

Forest Products Annual Market Review United Nations Publications, 2014-12 The UNECE/FAO Forest Products Annual Market Review, 2013-2014 provides general and statistical information on forest products markets and related policies in the UN Economic Commission for Europe region

(Europe, North America and the Commonwealth of Independent States). The Review begins with an overview chapter, followed by analysis of government and industry policies and market-based implements affecting forest products markets. The third chapter is on innovation in the forest sector. Five chapters are based on annual country-supplied statistics, describing: wood raw materials, sawn softwood, sawn hardwood, wood-based panels, and paper, paperboard and woodpulp. Additional chapters discuss markets for wood energy, value-added wood products, and housing. In each chapter, production, trade and consumption are analysed and relevant material on specific markets is included. Tables and graphs provided throughout the text present summary information.

Zero Carbon Australia Stationary Energy Plan Matthew Wright, Patrick Hearps, 2010 Zero Carbon Australia outlines a coherent and thoroughly researched blueprint showing how 100% renewable energy is achievable using technologies that are commercially available today: wind power and concentrating solar thermal with molten salt storage. It goes through the options, costs and benefits, confirming that a 10 year transformation of the stationary energy sector is achievable and affordable.

Forests and Food Bhaskar Vira, Christoph Wildburger, Stephanie Mansourian, 2015-11-15 As
 population estimates for 2050 reach over 9 billion, issues of food security and nutrition have been
 dominating academic and policy debates. A total of 805 million people are undernourished worldwide
 and malnutrition affects nearly every country on the planet. Despite impressive productivity increases,
 there is growing evidence that conventional agricultural strategies fall short of eliminating global
 hunger, as well as having long-term ecological consequences. Forests can play an important role in
 complementing agricultural production to address the Sustainable Development Goals on zero hunger.
 Forests and trees can be managed to provide better and more nutritionally-balanced diets, greater
 control over food inputs—particularly during lean seasons and periods of vulnerability (especially for
 marginalised groups)—and deliver ecosystem services for crop production. However forests are
 undergoing a rapid process of degradation, a complex process that governments are struggling to
 reverse. This volume provides important evidence and insights about the potential of forests to
 reducing global hunger and malnutrition, exploring the different roles of landscapes, and the
 governance approaches that are required for the equitable delivery of these benefits. Forests and Food
 is essential reading for researchers, students, NGOs and government departments responsible for
 agriculture, forestry, food security and poverty alleviation around the globe.

Understanding and Measuring the Shelf-Life of Food R. Steele, 2004-05-10 The shelf-life of a
 product is critical in determining both its quality and profitability. This important collection reviews the
 key factors in determining shelf-life and how it can be measured. Part one examines the factors
 affecting shelf-life and spoilage, including individual chapters on the major types of food spoilage, the

role of moisture and temperature, spoilage yeasts, the Maillard reaction and the factors underlying lipid oxidation. Part two addresses the best ways of measuring the shelf-life of foods, with chapters on modelling food spoilage, measuring and modelling glass transition, detecting spoilage yeasts, measuring lipid oxidation, the design and validation of shelf-life tests and the use of accelerated shelf-life tests. Understanding and measuring the shelf-life of food is an important reference for all those concerned with extending the shelf-life of food. Reviews the key factors in determining shelf-life and how they can be measured Examines the importance of the shelf-life of a product in determining its quality and profitability Brings together the leading international experts in the field

The Single Global Currency - Common Cents for the World Morrison Bonpasse, 2006-04 This 2014 Edition of THE SINGLE GLOBAL CURRENCY - COMMON CENTS FOR THE WORLD is the fifth book of this name, and it updates the text of the original 2006 edition. The 2007, 2008 and 2009 editions included the original edition together with an annual update appendix. Future editions are planned in five year increments for 2019 and 2024, the latter date being the 80th anniversary of the 1944 Bretton Woods Conference. The book is for all readers around the world, as every human being in our increasingly globalized world has an interest in achieving the goal of a Single Global Currency. What the people of the world want and deserve is stable money, so that the money they earn, save and invest today will be worth almost the same tomorrow. The Single Global Currency will provide that stability. It is the common cents/sense currency for our increasingly globalized world. The current multicurrency global monetary system is volatile and extremely risky as \$5.3 trillion worth of currencies are traded every trading day on the global foreign exchange markets. Currencies crises are a continuing threat. Avoiding the effects and risks of currency fluctuations and rapid flows of cross-currency capital were the primary goals of the International Monetary Fund at its 1945 creation, and the Single Global Currency will solve both problems. The Single Global Currency will be managed by a Global Central Bank within a Global Monetary Union. Since 1999, the primary model for this 3-G

system has been the euro which is managed by the European Central Bank within the European Monetary Union. Beginning with 12 member countries, the eurozone now has 18 members and continues to grow toward its full potential of all the members of the growing European Union, which now number 28. Creation of a Single Global Currency is not a new idea or goal, but is now feasible thanks to automation and the increasing interdependence of the world's peoples. The potential benefits of a Single Global Currency are staggering: - Worldwide asset values will increase by about \$10 trillion. - Worldwide GDP will increase by \$trillions. - Global trade will increase by \$trillions. - Annual FX trading transaction costs of \$300 billion will be avoided. - Global currency/payments imbalances will be eliminated. - Currency crises will be eliminated. - Currency speculation will be eliminated. - The need for unproductive foreign exchange reserves will be eliminated. Currently, the 193 members of the United Nations use 140 currencies for their international and domestic transactions. The 50+ members without their own national currencies are using the currencies of monetary unions of which they are members, or they are using (izing) the currencies of other countries or monetary unions. As existing monetary unions in Europe, the Caribbean and Africa are expanded, and as new monetary unions are created in Africa, the Americas, Asia and the Mid-East, the number of currencies will continue to decline. At some tipping point, perhaps after a merger of large currencies, the largest monetary union currency will likely be designated as the world's Single Global Currency. This process can be accelerated when individuals, nations and global institutions openly declare their support for a Single Global Currency and they initiate the necessary steps toward that goal. Such steps will include a global internet-based naming process for the new currency and a timeline for implementation. There is little question that the world is moving toward a Single Global Currency. The remaining question is When? The global challenge will be to achieve the Single Global Currency with a smooth transition from the existing multicurrency system. It is hoped that this book, and the work of the Single Global Currency Association (www.singleglobalcurrency.org) will help move the world in that direction.
