*Solutions Manual, Microeconomic Theory* Walter Nicholson, 1985

**Profit Cycles, Oligopoly, and Regional Development** Ann Markusen, 2008-07 This book develops a theory that radically reconceptualizes the economic forces producing regional change and tests it empirically for a set of fifteen sectors in the U.S. It offers a pioneering approach which should enable planners and managers to better cope with baffling changes in the current economic viability of regions. The dramatic shifts in heartland regional economies in the U.S. and other advanced industrial countries have thrown into question the ability of capitalist development to produce permanent growth, economic well being, and balanced regional development. This book develops a theory that radically reconceptualizes the economic forces producing regional change and tests it empirically for a set of fifteen sectors in the U.S. It offers a pioneering approach which should enable planners and managers to better cope with baffling changes in the current economic viability of regions. Traditional theories of regional development have failed to account for innovation and longrun structural change. They have ignored the role of corporate strategy and the existence of market power. Markusen's profit-cycle theory provides a key to understanding how, why, and when a region's leading industries undergo major changes. The theory is synthetic, building upon Schumpeterian and Marxist work on innovation and capitalist dynamics, upon the product cycle theories of business economists, and upon theories of oligopolistic behavior. Markusen argues that changing sources of profitability along an industry's evolutionary path will first concentrate and later disperse production geographically, setting in motion a methodically destabilizing process for regional

economies. The profit-cycle theory is tested in depth against the steel sector's experience over a century, and against the experiences of sectors in different stages of development, ranging from innovative ones like semiconductors and computers, to mature and troubled sectors like automobiles, textiles, and lumber. The temporal and crosssectional data drawn from the census of manufactures support the theory and its spatial hypotheses. In a final chapter Markusen explores the implications of the research for regional development.

*Moon-face and Other Stories* Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, *The Call of the Wild* (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including *The Sea-Wolf* (1904), *White Fang* (1906), *South Sea Tales* (1911), and *Jerry of the South Seas* (1917). One of London's most interesting novels is the semi-autobiographical *Martin Eden* (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

**Nationalism and Identity** Stefano Harney, 1996 The nation-state of Trinidad and Tobago offers a unique case for the study of the forces and ideologies of nationalism. This book reveals how this ethnically diverse

nation (40% African origin, 40-45% East Indian origin, plus those of Syrian, Chinese, Portuguese, French and English descent), independent for less than forty years, has provided fertile ground for the creative tension between the imagination of the writer in his or her search for a habitable text of identity and the official discourse on nationalism in Trinidad and Tobago. This discourse has in turn been embedded in a struggle that propels the nation's story. Following on from this background, the study examines the changes and influences on the sense of nationalism and peoplehood caused by migration and the ethnicization of migrant communities in the metropolises.
