**Pretrial Services Programs** Barry Mahoney, 2002-04 Pretrial services (PS) programs can be valuable resources for making significant improvements in the criminal justice system because they are used in the early stages of the criminal case process. This report provides a review of issues and practices in the PS field. It describes how pretrial programs operate, discusses key policy issues, and outlines issues and challenges for the future. It pays particular attention to how PS programs obtain and convey information relevant to the pretrial release/detention decision. Describes how PS agencies, the court, and other criminal justice system agencies can work together to minimize the risks of nonappearance and pretrial crime.

**Statistical Abstract of the United States, 2012** Census Bureau, U. S. Department of Commerce, 2011-09 The Statistical Abstract of the United States, published since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source note appearing below each table, and Appendix I, which comprises the Guide to Sources of Statistics, the Guide to State Statistical Abstracts, and the Guide to Foreign Statistical Abstracts.

*Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles* National Research Council, Transportation Research Board, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee to Assess Fuel Economy Technologies for Medium- and Heavy-Duty Vehicles, 2010-08-30 *Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles* evaluates various technologies and methods that could improve the fuel economy of medium- and heavy-duty vehicles, such as tractor-trailers, transit buses, and work trucks. The book also recommends approaches that federal agencies could use to regulate these vehicles' fuel consumption. Currently there are no fuel consumption standards for such vehicles, which account for about 26 percent of the transportation fuel used in the U.S. The miles-per-gallon measure used to regulate the fuel economy of passenger cars is not appropriate for medium- and heavy-duty vehicles, which are designed above all to carry loads efficiently. Instead, any regulation of medium- and heavy-duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers, such as gallons per ton-mile, a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile. This is called load-specific fuel consumption (LSFC). The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types. For example, using advanced diesel engines in tractor-trailers could lower their fuel consumption by up to 20 percent by 2020, and improved aerodynamics could yield an 11 percent reduction. Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently, such as garbage trucks and transit buses, by as much as 35 percent in the same time frame.

**Gene Drives on the Horizon** National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Life Sciences, Committee on Gene Drive Research in Non-Human Organisms: Recommendations for Responsible Conduct, 2016-08-28 Research on gene drive systems is rapidly advancing. Many proposed applications of gene drive research aim to solve environmental and public health challenges, including the reduction of poverty and the burden of vector-borne diseases, such as malaria and dengue, which disproportionately impact low and middle income countries. However, due to their intrinsic qualities of rapid spread and irreversibility, gene drive systems raise many questions with respect to their safety relative to public and environmental health. Because gene drive systems are designed to alter the environments we share in ways that will be hard to anticipate and impossible to completely roll back, questions about the ethics surrounding use of this research are complex and will require very careful exploration. *Gene Drives on the Horizon* outlines the state of knowledge relative to the science,

ethics, public engagement, and risk assessment as they pertain to research directions of gene drive systems and governance of the research process. This report offers principles for responsible practices of gene drive research and related applications for use by investigators, their institutions, the research funders, and regulators.

**The orange juice business** Marcos Fava Neves,Vinicius Gustavo Trombin,Frederico Fonseca Lopes,Rafael Kalaki,Patrícia Milan,2012-04-07 The orange juice chain is unique, probably a sui generis commodity. Although several countries produce oranges and juices, two regions in the world are the responsible for around 80% of the production. These are the states of Sao Paulo in Brazil and Florida in the USA. Although the emerging countries are growing in production, the juice consumer is also concentrated in the USA and Europe where more than 90% of consumption takes place. The characteristics of this chain are so unique, that it makes a nice laboratory for academics and business people to exercise strategies, since risk is spread. Orange is a very sensitive plant, and fluctuations in production are notorious. The logistics of this chain are fascinating. The product travels great distances to reach the consumer in a generally safe and efficient way. The industry assets such as vessels and tanks are specific. By reading this book, business people, academics and chain practitioners have an opportunity to understand this chain. and can analyse all of its numbers and economics and exercise strategy building. This is needed since the orange juice market is a stable market in the world, growing only 1% per year, and the production costs of this chain are rising fast, due to structural changes faced by world food and agribusiness companies i.e. labour costs, energy costs, land costs, environmental costs and others. The book will be of interest to all those concerned with agri food chains.

**Moving Cooler** Cambridge Systematics,2009 Both the public and private sectors are grappling with decisions regarding policies that will lead to reductions in greenhouse gas (GHG) emissions. Moving Cooler analyzes and assesses the effectiveness and costs of almost 50 transportation strategies for reducing GHG emissions, as well as evaluates combinations of those strategies. The findings of this study can help decision makers coordinate and shape effective approaches to reducing GHG emissions at all levels - national, regional, and local - while also meeting broader transportation objectives. --Book Jacket.

**Greening Our Built World** Greg Kats,2013-03-05 “Green” buildings—buildings that use fewer resources to build and to sustain—are commonly thought to be too expensive to attract builders and

buyers. But are they? The answer to this question has enormous consequences, since residential and commercial buildings together account for nearly 50% of American energy consumption—including at least 75% of electricity usage—according to recent government statistics. This eye-opening book reports the results of a large-scale study based on extensive financial and technical analyses of more than 150 green buildings in the U.S. and ten other countries. It provides detailed findings on the costs and financial benefits of building green. According to the study, green buildings cost roughly 2% more to build than conventional buildings—far less than previously assumed—and provide a wide range of financial, health and social benefits. In addition, green buildings reduce energy use by an average of 33%, resulting in significant cost savings. Greening Our Built World also evaluates the cost effectiveness of “green community development” and presents the results of the first-ever survey of green buildings constructed by faith-based organizations. Throughout the book, leading practitioners in green design—including architects, developers, and property owners—share their own experiences in building green. A compelling combination of rock-solid facts and specific examples, this book proves that green design is both cost-effective and earth-friendly.

**Key Indicators for Asia and the Pacific 2021** Asian Development Bank, 2021-08-24 This publication provides updated statistics on a comprehensive set of economic, financial, social, and environmental measures as well as select indicators for the Sustainable Development Goals (SDGs). The report covers the 49 regional members of ADB. It discusses trends in development progress and the challenges to achieving inclusive and sustainable economic growth across Asia and the Pacific. This 52nd edition discusses how the COVID-19 pandemic has intensified the challenges of meeting development targets, which needed urgent attention even before the global health crisis began. To put into practice the leave no one behind principle of the SDGs, the availability of more detailed and informative data is crucial. With the pandemic intensifying society's reliance on digital platforms for remote working and learning, as well as for shopping and entertainment, the 2021 report features a special supplement, Capturing the Digital Economy: A Proposed Measurement Framework and Its Applications, which is rooted in input-output analysis and uses readily available national accounts data. The study provides a sound basis on which to assess the relative importance of the digital economy in national and global production processes.

**Urban Services to Ecosystems** Chiara Catalano, Maria Beatrice Andreucci, Riccardo Guarino, Francesca Bretzel, Manfredi Leone, Salvatore Pasta, 2021-09-15 The aim of this book is to bring together multidisciplinary research in the field of green infrastructure design, construction and ecology. The main core of the volume is constituted by contributions dealing with green infrastructure, vegetation science, nature-based solutions and sustainable urban development. The green infrastructure and its ecosystem services, indeed, are gaining space in both political agendas and academic research. However, the attention is focused on the services that nature is giving for free to and for human health and survival. What if we start to see things from another perspective? Our actions shall converge for instance to turn man-made environment like cities from heterotrophic to autotrophic ecosystems. From landscape ecology to urban and building design, like bricks of a wall, from the small scale to the bigger landscape scale via ecological networks and corridors, we should start answering these questions: what are the services that are we offering to Nature? What are we improving? How to implement our actions? This book contains three Open Access chapters, which are licensed under the terms of the Creative Commons Attribution 4.0 International License (CC BY 4.0).

**Ecological Wisdom Inspired Restoration Engineering** Varenayam Achal, Abhijit Mukherjee, 2018-08-24 This book focuses on ecological wisdom inspired restoration engineering through theories, hypotheses, policies, practical understanding, and case studies. Understanding nature's processes is a prerequisite for the healthy and sustainable functioning of a habitable Earth. As such, the book provides a guide for readers seeking to understand and build sustainable, urban socio-ecological systems using restoration technologies based on wisdom. Motivated by recent rapid advances in restoration engineering, such as the role of green building materials in urban

infrastructures, and developing sustainable landscapes to benefit the environment, economy and communities, it is an essential reference on the most promising innovative technologies. It discusses engineering methods and practices in the restoration of soil, water, heritage sites, and other ecosystems, as well as the development and applications of green building materials. *Vodou Nation* Michael Largey, 2006-05 While the Haitian musical tradition is probably best known for the Vodou-inspired roots music that helped topple the two-generation Duvalier dictatorship, the nation's troubled history of civil unrest and its tangled relationship with the United States is more intensely experienced through its art music, which combines French and German elements of classical music with Haiti's indigenous folk music. *Vodou Nation* examines art music by Haitian and African American composers who were inspired by Haiti's history as a nation created by slave revolt. Around the time of the United States's occupation of Haiti in 1915, African American composers began to incorporate Vodou-inspired musical idioms to showcase black artistry and protest white oppression. Together with Haitian musicians, these composers helped create what Michael Largey calls the "Vodou Nation," an ideal vision of Haiti that championed its African-based culture as a bulwark against America's imperialism. Highlighting the contributions of many Haitian and African American composers who wrote music that brought rhythms and melodies of the Vodou ceremony to local and international audiences, *Vodou Nation* sheds light on a black cosmopolitan musical tradition that was deeply rooted in Haitian culture and politics.

**Export Promotion** Ludo Cuyvers, Wilma Viviers, 2012-06-01 Governments are increasingly confronted with scarce resources, which force their export promotion organisations to seek more efficient ways and methods. At the same time, with the export successes of the emerging economies, public export promotion policies of countries are confronted with diminishing returns, particularly when the traditional export promotion instruments are used. The DSM (Decision Support Model) approach to export promotion, which is adopted and explained in the book, is deeply rooted in the international marketing research literature and allows to identify, in the rapidly changing international environment, the most promising realistic export opportunities for exporting countries.

*Deceptive Conducts Before the Patent Office* Eugenio Hoss, 2019-09-25 In an increasingly harmonized global patent landscape, few issues still distinguish the US patent system as much as its strict and often criticized duty of candor and its inequitable conduct doctrine. The EPO and most other countries around the world impose less burdensome disclosure duties upon patent applicants. What is there to learn from the experience in the US? Have these tools resulted in any benefit worth considering? Yet regardless of the disclosure duties imposed upon patent applicants, a deceptive conduct before the Patent Office could lead to unwarranted exclusive rights and have a negative impact on competition. Should antitrust law intervene? Is it a case of sham litigation? This work attempts to answer those questions through a comparative analysis, examining the law and case law in the US and in the EU from both a patent and a competition law perspective and seeking a

workable theory of harm.
