### **Uzbekistan Quality Job Creation as a Cornerstone for Sustainable Economic Growth**

Kym Anderson, Edimon Ginting, Kiyoshi Taniguchi, 2020-06-01 Uzbekistan has achieved sustained growth through its gradual transition to a market-based economy through cautious economic policy reforms. Despite its gradual approach to development challenges, the country experienced the smallest output decline among former Soviet economies and enjoyed high rates of economic growth from 2004 to 2015, largely driven by the high prices of its major export commodities. However, the drop in the global prices of many key commodities in recent years have severely impacted Uzbekistan's economy. Under these circumstances, the new government introduced major reforms. The pace of reform is unprecedented. The government has formulated its long-term economic strategy in its Vision 2030, which aims to double the country's gross domestic product by 2030 through a program of economic diversification. This book analyzes how Uzbekistan can boost sustainable economic growth to create more and better jobs. It considers how the country can consolidate achievements from recent policy reforms and maintain reform efforts to accelerate sustainable growth. Policy recommendations cover fostering macroeconomic stability, increasing investment in physical infrastructure, enhancing human capital, improving firms' access to finance, and lowering barriers to international trade and foreign investment inflows.

### **Africa's Population: In Search of a Demographic Dividend** Hans Groth, John F.

May, 2017-05-23 This book examines the promises as well as the challenges the demographic dividend brings to sub-Saharan Africa as fertility rates in the region fall and the labor force grows. It offers a detailed analysis of what conditions must be met in order for the region to take full economic advantage of ongoing population dynamics. As the book makes clear, the region will need to accelerate reforms to cope with its demographic transition, in particular the decline of fertility. The continent will need to foster human capital formation through renewed efforts in the areas of education, health and employment. This will entail a true vision and determination on the part of African leaders and their development partners. The book will help readers to gain solid knowledge of the demographic trends and provide insights into socioeconomic policies that eventually might lead sub-Saharan Africa into a successful future.

### **Toward a Theory of Spacepower** Charles D. Lutes, Peter L. Hays, 2015-03-18

This volume is a product of the efforts of the Institute for National Strategic Studies Spacepower Theory Project Team, which was tasked by the Department of Defense to create a theoretical framework for examining spacepower and its relationship to the achievement of national objectives. The team was charged with considering the space domain in a broad and holistic way, incorporating a wide range of perspectives from U.S. and international space actors engaged in scientific, commercial, intelligence, and military enterprises. This collection of papers commissioned by the team serves as a starting point for continued discourse on ways to extend, modify, refine, and integrate a broad range of viewpoints about human-initiated space activity, its relationship to our globalized society, and its economic, political, and security interactions. It will equip practitioners, scholars, students, and citizens with the historical background and conceptual framework to navigate through and assess the challenges and opportunities of an increasingly complex space environment.

**Geographic Information Science at the Heart of Europe** Danny Vandenbroucke, Bénédicte Bucher, Joep Crompvoets, 2013-05-13 For the seventh consecutive year, the AGILE promotes the publication of a book collecting high-level scientific papers from unpublished fundamental scientific research in the field of Geographic Information Science. As the agenda for Europe 2020 is currently being set, this book demonstrates how geographic information science is at the heart of Europe. The contributions open perspectives for innovative services that will strengthen our European economy, and which will inform citizens about their environment while preserving their privacy. The latest challenges of spatial data infrastructures are addressed, such as the connection with the Web vocabularies or the representation of genealogy. User generated data (through social networks or through interactive cameras and software) is also an important breakthrough in our domain. A trend to deal more and more with time, events, ancient data, and activities is noticeable this year as well. This volume collects the 23 best full papers presented during the 16th AGILE Conference on Geographic Information Science, held between 14 and 17 May 2013 in Leuven, Belgium.

**UNESCO science report** UNESCO, 2015-11-09 There are fewer grounds today than in the past to deplore a North-South divide in research and innovation. This is one of the key findings of the UNESCO Science Report: towards 2030. A large number of countries are now incorporating science, technology and innovation in their national development agenda, in order to make their economies less reliant on raw materials and more rooted in knowledge. Most research and development (R&D) is taking place in high-income countries, but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report. For many lower-income countries, sustainable development has become an integral part of their national development plans for the next 10-20 years. Among higher-income countries, a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards 'green' technologies. The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries. Written by more than 50 experts who are each covering the country or region from which they hail, the

UNESCO Science Report: towards 2030 provides more country-level information than ever before. The trends and developments in science, technology and innovation policy and governance between 2009 and mid-2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come.

Principles of Coding and Reimbursement for Surgeons Mark Savarise, Christopher Senkowski, 2016-12-30 This text provides the in-depth understanding of the mechanisms that guide coding and reimbursement. The text is meant to be useful to surgeons in practice, both in general surgery and in surgical subspecialties; practice management teams of surgical practices and to resident physicians in surgery. Part 1 of the text addresses the CPT coding process, the relative valuation system (RVU), the ICD-9 and ICD-10 systems of classification, Medicare Part B payment rules for physicians, the DRG system and Medicare Part A payment for hospitals, alternative payment models, and the myriad of quality measures of importance to surgeons. Part 2 of the text addresses specific coding in areas where surgeons historically have had the most difficulty. This is not meant to substitute for the available texts, software or courses on coding, but to provide the historical background and rationale for the specific coding rules. Principles of Coding and Reimbursement for Surgeons will be of great value to general surgeons and surgical subspecialists in private practice, academic institutions, and employed positions. It will provide direction to management teams from practice and institutional levels. It is also of use to surgical trainees and to researchers in health policy issues.

**The Brand IDEA** Nathalie Laidler-Kylander, Julia Shepard Stenzel, 2013-11-08 Offering a new framework for nonprofit brand management, this book presents the Brand IDEA (Integrity, Democracy, and Affinity). The framework eschews traditional, outdated brand tenets of control and competition largely adopted from the private sector, in favor of a strategic approach centered on the mission and based on a participatory process, shared values, and the development of key partnerships. The results are nonprofit brands that create organizational cohesion and generate trust in order to build capacity and drive social impact. The book explores in detail how nonprofit organizations worldwide are developing and implementing new ways of thinking about and managing their organizational brands.
