Managing the Undesirables Michel Agier,2011-01-25 Official figures classify some fifty million of the world's people as 'victims of forced displacement'. Refugees, asylum seekers, disaster victims, the internally displaced and the temporarily tolerated - categories of the excluded proliferate, but many more are left out of count. In the face of this tragedy, humanitarian action increasingly seems the only possible response. On the ground, however, the 'facilities' put in place are more reminiscent of the logic of totalitarianism. In a situation of permanent catastrophe and endless emergency, 'undesirables' are kept apart and out of sight, while the care dispensed is designed to control, filter and confine. How should we interpret the disturbing symbiosis between the hand that cares and the hand that strikes? After seven years of study in the refugee camps, Michel Agier reveals their 'disquieting ambiguity' and stresses the imperative need to take into account forms of improvisation and challenge that are currently transforming the camps, sometimes making them into towns and heralding the emergence of political subjects. A radical critique of the foundations, contexts, and political effects of humanitarian action.

A Frequency Dictionary of Portuguese Mark Davies,Ana Maria Raposo Preto-Bay,2007-11-29 An invaluable tool for learners of Portuguese, this Frequency Dictionary provides a list of the 5000 most commonly used words in the language. Based on a twenty-million-word collection of Portuguese (taken from both Portuguese and Brazilian sources), which includes both written and spoken material, this dictionary provides detailed information for each of the 5000 entries, including the English equivalent, a sample sentence, and an indication of register and dialect variation. Users can access the top 5000 words either through the main frequency listing or through an alphabetical index. Throughout the frequency listing there are also thirty thematically-organized 'boxed' lists of the top words from a variety of key topics such as sports, weather, clothing and relations. An engaging and highly useful resource, A Frequency Dictionary of Portuguese will enable students of all levels to get the most out of their study of Portuguese vocabulary. Former CD content is now available to access at www.routledge.com/9780415419970 as support material. Designed for use by corpus and computational linguists it provides the full text in a format that researchers can process and turn into suitable lists for their own research work.

Pig Health John Carr,Shih-Ping Chen,Joseph F. Connor,Roy Kirkwood,Joaquim Segalés,2018-04-17 Maintaining the health of pigs is vital in pig farming and production. This new book written by experts from around the world focuses on the health of pigs, first with coverage of the disorders of pigs organised by clinical sign and body system. The book explores environmental medicine and then health maintenance. Treatment options are discussed, emphasizing a reduction in antimicrobial use and an increased awareness of a holistic approach to treatment. The book includes over 1,500 high-quality illustrations to enhance the clinical description, as well as a wealth of high-quality videos to test the reader in making differential diagnoses with treatment options. Quizzes at the end of each section also encourage reflective learning. International experts from the UK, USA, Australia, Spain and Taiwan cover clinical examination of the individual pig and groups along with environmental medicine, making this the ideal reference for veterinary practitioners and students. Those interested in population medicine (poultry, aquaculture, cattle and small ruminant and apiaries) will particularly enjoy the holistic approach to veterinary medicine. All those who appreciate the many talents of pigs will enjoy the practical approach to managing the health of their animals. This book moves veterinary science forward, promoting health rather than treating disease. It will be your number one reference for keeping your pigs healthy.

Trends in Vocational Education and Training Research Vocational Education Vocational Education and Training Network,2018-08-31 For the first time in many years, VETNET publishes a collection of short papers in an edited book of proceedings, which is available online and as a printed version. VETNET has had a long tradition in making ECER presentations and full papers open to a broader public. So, what's the purpose of having a real book? We see it as an opportunity for VETNET to increase the visibility of current research in vocational education and training - and as an opportunity for its researchers to talk about planned, ongoing and finalised pieces of work. VETNET lives, if knowledge is shared, discussed and challenged by others. The people involved are ready to cross boundaries in their theoretical and methodological thinking and acting.

Handbook of Hazards and Disaster Risk Reduction Ben Wisner,J.C. Gaillard,Ilan Kelman,2012-03-29 The Handbook provides a comprehensive statement and reference point for hazard and disaster research, policy making, and practice in an international and multi-disciplinary context. It offers critical reviews and appraisals of current state of the art and future development of conceptual, theoretical and practical approaches as well as empirical knowledge and available tools. Organized into five inter-related sections, this Handbook contains sixty-five contributions from leading scholars. Section one situates hazards and disasters in their broad political, cultural, economic, and environmental context. Section two contains treatments of potentially damaging natural events/phenomena organized by major earth system. Section three critically reviews progress in responding to disasters including warning, relief and recovery. Section four addresses mitigation of potential loss and prevention of disasters under two sub-headings: governance, advocacy and self-help, and communication and participation. Section five ends with a concluding chapter by the editors. The engaging international contributions reflect upon the politics and policy of how we think about and practice applied hazard research and disaster risk reduction. This Handbook provides a wealth of interdisciplinary information and will appeal to students and practitioners interested in Geography, Environment Studies and Development Studies.

A Cultural Interpretation of the Genocide Convention Kurt Mundorff,2020-08-25 This book critiques the dominant physical and biological interpretation of the Genocide Convention and argues

that the idea of culture is central to properly understanding the crime of genocide. Using Raphael Lemkin's personal papers, archival materials from the State Department and the UN, as well as the mid-century secondary literature, it situates the convention in the longstanding debate between Enlightenment notions of universality and individualism, and Romantic notions of particularism and holism. The author conducts a thorough review of the treaty and its preparatory work to show that the drafters brought strong culturalist ideas to the debate and that Lemkin's ideas were held widely in the immediate postwar period. Reconstructing the mid-century conversation on genocide and situating it in the much broader mid-century discourse on justice and society he demonstrates that culture is not a distraction to be read out of the Genocide Convention; it is the very reason it exists. This volume poses a forceful challenge to the materialist interpretation and calls into question decades of international case law. It will be of interest to scholars of genocide, human rights, international law, the history of international law and human rights, and treaty interpretation.

Licht - Raum Wolfgang Rang,Christian Bartenbach,2014 The goal of this book is to develop temporary light spaces that re-interpret the existing urban environment on a seasonal basis or over a cycle of several years. As a result, the city will literally appear in a new light. Strollers in the city streets will experience their familiar environment in a new way. Illuminated planes interlacing with planes made by linear fields of light beams will create immaterial material space experiences: still lifes of light within which one can move about and light choreographies that move barely noticeably, creating still lifes in motion. The discourse in this book starts with essays introducing aspects of light spaces and concludes with documents on light spaces by Wolfgang Rang collected over a period of 30 years showing how these light spaces were regarded in the writings of contemporaries.

Xchg Rax, Rax Xorpd,2014-12-09 ; 0x40 assembly riddles xchg rax, rax is a collection of assembly gems and riddles I found over many years of reversing and writing assembly code. The book contains 0x40 short assembly snippets, each built to teach you one concept about assembly, math or life in general. Be warned - This book is not for beginners. It doesn't contain anything besides assembly code, and therefore some x86_64 assembly knowledge is required. How to use this book? Get an assembler (Yasm or Nasm is recommended), and obtain the x86_64 instruction set. Then for every snippet, try to understand what it does. Try to run it with different inputs if you don't understand it in the beginning. Look up for instructions you don't fully know in the Instruction sets PDF. Start from the beginning. The order has meaning. As a final note, the full contents of the book could be viewed for free on my website (Just google xchg rax, rax).
