Choosing Chinese Universities Alice Y.C. Te, 2022-10-07 This book unpacks the complex dynamics of Hong Kong students' choice in pursuing undergraduate education at the universities of Mainland China. Drawing on an empirical study based on interviews with 51 students, this book investigates how macro political/economic factors, institutional influences, parental influence, and students' personal motivations have shaped students' eventual choice of university. Building on Perna's integrated model of college choice and Lee's push-pull mobility model, this book conceptualizes that students' border crossing from Hong Kong to Mainland China for higher education is a trans-contextualized negotiated choice under the One Country, Two Systems principle. The findings reveal that during the decision-making process, influencing factors have conditioned four archetypes of student choice: Pragmatists, Achievers, Averages, and Underachievers. The book closes by proposing an enhanced integrated model of college choice that encompasses both rational motives and sociological factors, and examines the theoretical significance and practical implications of the qualitative study. With its focus on student choice and experiences of studying in China, this book's research and policy findings will interest researchers, university administrators, school principals, and teachers.

Promoting Democracy and Human Rights in Russia Sinikukka Saari, 2009-12-04 European regional organisations have spent significant amount of time, energy and money in supporting Russia's transition towards the western liberal-democratic model since the end of the cold war. This book explores the role the Council of Europe, European Union and Organisation for Security and Cooperation in Europe have played in Russia's post-Soviet transition in the field of human rights and democracy. The book argues that the organisations have played an important initial role in setting the reform agenda and in providing a general framework for interaction in the field of human rights and democracy. However, since the mid-1990s the impact of regional organisations has been slipping. Lately Russia has challenged the European human rights and democracy norms and now it threatens the whole framework for regional normative cooperation. Russia's attitude towards western liberal order has become more assertive and its defiance increasingly concerted even internationally. The main finding is that democracy and human rights promotion is not a one-way transference of norms like much of the theoretical literature and European practices presume. The Russian case demonstrates that the so-called target state can influence the norm promoters and the interpretation of the norms in a fundamental way. This is a finding that has significant implications both for theory and practice.

Plastics Process Analysis, Instrumentation, and Control Johannes Karl Fink, 2021-03-09 This book focuses on plastics process analysis, instrumentation for modern manufacturing in the plastics industry. Process analysis is the starting point since plastics processing is different from processing of metals, ceramics, and other materials. Plastics materials show unique behavior in terms of heat transfer, fluid flow, viscoelastic behavior, and a dependence of the previous time, temperature and shear history which determines how the material responds during processing and its end use. Many of the manufacturing processes are continuous or cyclical in nature. The systems are flow systems in which the process variables, such as time, temperature, position, melt and hydraulic pressure, must be controlled to achieve a satisfactory product which is typically specified by critical dimensions and physical properties which vary with the processing conditions. Instrumentation has to be selected so that it survives the harsh manufacturing environment of high pressures, temperatures and shear rates, and yet it has to have a fast response to measure the process dynamics. At many times the measurements have to be in a non-contact

mode so as not to disturb the melt or the finished product. Plastics resins are reactive systems. The resins will degrade if the process conditions are not controlled. Analysis of the process allows one to strategize how to minimize degradation and optimize end-use properties.

Origins of the Organic Agriculture Debate Thomas R. DeGregori, 2008-02-28 *Origins of the Organic Agriculture Debate* takes an historical look at two contrasting streams of ideas. The first view comprises the flow of ideas in chemistry and biology that have created the conditions for modern medicine, modern food production and the biotechnological revolution. The second view is the vitalist reaction to the rise of modern science and the resulting rejection of modern agriculture. Contemporary proponents of organic agriculture and the anti-genetically modified food movement believe that pure food confers some special kind of virtue both on those who produce it and those who consume it. They fail to acknowledge that organic chemistry, genetics, and molecular biology have been as essential to twentieth century advances in agriculture such as plant breeding, and are instrumental to ensuring that there is enough food for everyone. *Origins of the Organic Agriculture Debate* Begins with an exploration of the factors involved in our modern fear of technology, a fear which forms the foundation for anti-technology beliefs and practices. Argues that vitalism is at the core of an array of contemporary anti-science and anti-technology movements. Helps readers fully understand the ferocity with which certain beliefs about homeopathic medicine and the organic are held against all evidence to the contrary. Explains the history of nitrogen in life and in agriculture, countering myths of scarce resources and beliefs about the sufficiency of organic nitrogen to feed the world's population. Purports that technology creates resources, debunking the idea that resources are natural, fixed and finite. Updates and clarifies issues discussed in the author's previous works: *A Theory of Technology* (1985), *Agriculture and Modern Technology* (2001) and *The Environment, Our Natural Resources and Modern Technology* (2002). We need to better understand the forces of scientific and technological change if we are to control the negative elements of these forces, continue to advance the development of science and technology, and facilitate fuller participation in the benefits of our advancing capability to further the human endeavor. *Origins of the Organic Agriculture Debate* will provide a basis for this understanding.

Globalization JoAnn Chirico, 2013-08-01 *Globalization: Prospects and Problems*, by JoAnn Chirico, provides a comprehensive and enlightening overview of globalization issues and topics. Emphasizing the theory and methods that social scientists employ to study globalization, the text reveals how macro globalization processes impact individual lives—from the spread of scientific discourse to which jobs are more or less likely to be offshored. The author presents a clear image of “the big globalization picture” by skillfully exploring, piece by piece, a myriad of globalization topics, debates, theories, and empirical data. Compelling chapters on theory, global civil society, democracy, cities, religion, institutions (sports, education, and health care), along with three chapters on global challenges, help readers develop a broad understanding of key topics and issues. Throughout the text, the author encourages readers to relate their personal experiences to globalization processes, allowing for a more meaningful and relevant learning experience.

Cultural History of Reading [2 volumes] Sara E. Quay, Gabrielle R. Watling, 2008-11-30 What is it about some books that makes them timeless? *Cultural History of Reading* looks at books from their earliest beginnings through the present day, in both the U.S. and regions all over the world. Not only fiction and literature, but religious works, dictionaries, scientific works, and home guides such as Mrs. Beeton's all have had an impact on not only their own time and place, but continue to capture the attention of readers today. Volume 1 examines the history of books in regions throughout the world, identifying both literature and nonfiction that was influenced by cultural

events of its time. Volume 2 identifies books from the pre-colonial era to the present day that have had lasting significance in the United States. History students and book lovers alike will enjoy discovering the books that have impacted our world.

Climate Change and Power Christiaan Vrolijk, 2010-09-23 'This book provides an essential guide to the challenges facing the power sector, but is equally enlightening to other industrial emitters, policy-makers and non-governmental organizations.' Charles Nicholson, Group Senior Advisor, BP The electricity industry is one of the main contributors of carbon to the atmosphere. Reducing these emissions is critical to achieving international targets and mitigating climate change. Economic instruments, including emissions trading, taxes and voluntary agreements, will be crucial. However, across Europe there are widely different electricity systems and policies will have different effects. This book describes the characteristics of the main European electricity regimes, defining the range of instruments available and assessing the potential of each in each regime and for Europe as a whole.

International Organizations and Internal Conditionality R. Fawn, 2013-11-12 This book explores how norms-based international organizations, namely the Council of Europe and the OSCE, are still able to win in world politics. Fawn uses the concept of internal conditionality to explain how these organizations have been able to respond to members with a lack of material incentives or instruments of coercion.

Ageing, Wellbeing and Climate Change in the Arctic Paivi Naskali, Marjaana Seppänen, Shahnaj Begum, 2015-11-19 The Arctic and its unique natural resources have become objects of increasing concern. Rapid climate change and ageing of the population are transforming the living conditions in the region. This translates into an urgent need for information that will contribute to a better understanding of these issues. Ageing, Wellbeing and Climate Change in the Arctic addresses the important intersection of ageing, wellbeing and climate change in the Arctic region, making a key interdisciplinary contribution to an area of research on which little has been written, and limited sources of information are currently available. The book explores three key areas of discussion. First, various political issues that are currently affecting the Arctic, such as the social categorisation of elderly people. Second, the living conditions of the elderly in relation to Arctic climate change. Third, the wellbeing of elderly people in terms of traditional knowledge and lifestyles. The book also features contributions from a number of key researchers in the field which examine a broad range of case studies, including the impact of climate change on health in Lapland and elderly people and geographical mobility in Norway. This book will be of great interest to scholars of climate change, gerontology and social policy.

The Identification of Vat Dyes on Cellulosic Materials D. A. Derrett-Smith, J. Gray, 2013-10-22 The Identification of Vat Dyes on Cellulosic Materials focuses on the determination of the dyeing class of all the dyes usually found on cellulosic materials, which is another method of distinguishing between reactive and other classes of dyes on these materials. This book discusses the characteristics of vat and soluble vat dyes. Organized into six chapters, this book starts with an overview of the various methods of preparing the five reagents used in the tests, namely, alkaline hydrosulfite, acid hydrosulfite, nitric acid, sulfuric acid, and acid potassium permanganate. This text then describes the various tests that are found reliable in determining the different types of dyes. Other chapters examine the rate of oxidation of all the available blue dyes, which are classified into four major subdivisions. The final chapter deals with the identification of indigo blue dyes wherein the distinctions can be made by means of nitric acid in a similar manner. This book is a valuable resource for dye manufacturers.

Cold, Hungry and in the Dark Bill Powers, 2013-07-02 Examines the natural gas industry, arguing that the

declining productivity and increasing demand will trigger a crisis that will cause prices to rise and more damage to the economy.

Term Paper Resource Guide to Nineteenth-Century U.S. History Kathleen W. Craver, 2008-06-30 Major help for those inevitable American History term paper projects has arrived to enrich and stimulate students in challenging and enjoyable ways. Students from high school age to undergraduate will be able to get a jumpstart on assignments with the hundreds of term paper projects and research information offered here in an easy-to-use format. Users can quickly choose from the 100 important events of the nineteenth century, carefully selected to be appealing to students, and delve right in. Each event entry begins with a brief summary to pique interest and then offers original and thought-provoking term paper ideas in both standard and alternative formats that incorporate the latest in electronic media, such as iPod and iMovie. The best in primary and secondary sources for further research are then annotated, followed by vetted, stable Web site suggestions and multimedia resources for further viewing and listening. Librarians and faculty will want to use this as well. Students dread term papers, but with this book, the research experience is transformed and elevated. *Term Paper Resource Guide to Nineteenth-Century U.S. History* is a superb source to motivate and educate students who have a wide range of interests and talents. The provided topics on events, people, inventions, cultural contributions, wars, and technological advances reflect the country's nineteenth-century character and experience. Some examples of the topics are Barbary Pirate Wars, the Thomas Jefferson and Sally Hemings liaison, Tecumseh and the Prophet, the Santa Fe Trail, Immigration in the 1840s, the Seneca Falls Convention, the Purchase of Alaska, Boss Tweed's Ring, Wyatt Earp and the Gunfight at O.K. Corral, United States v. Wong Kim Ark, and Scott Joplin and Ragtime Music.

In Vivo Models of Inflammation Lisa A. Marshall, Douglas W. Morgan, 2013-11-11 The purpose of this volume in the series *Progress in Inflammation Research* is to provide the biomedical researcher with a description of the state of the art of the development and use of animal models of diseases with components of inflammation. Particularly highlighted are those models which can serve as in vivo correlates of diseases most commonly targeted for therapeutic intervention. The format is designed with the laboratory in mind; thus it provides detailed descriptions of the methodologies and uses of the most significant models. Also, new approaches to the development of future models in selected therapeutic areas have been highlighted. While emphasis is on the newest models, new information broadening our understanding of several well-known models of proven clinical utility is included. In addition, we have provided coverage of transgenic and gene transfer technologies which will undoubtedly serve as tools for many future approaches. Provocative comments on the cutting edge and future directions are meant to stimulate new thinking. Of course, it is important to recognize that the experimental use of animals for human benefit carries with it a solemn responsibility for the welfare of these animals. The reader is referred to the section on current regulations governing animal use which addresses this concern. To fulfill our purpose, the content is organized according to therapeutic areas with the associated models arranged in subcategories of each therapeutic area.

The End of the West David Marquand, 2012-08-26 Why Europe is on the decline—and what can be done about it Has Europe's extraordinary postwar recovery limped to an end? It would seem so. The United Kingdom, Belgium, France, Italy, and former Soviet Bloc countries have experienced ethnic or religious disturbances, sometimes violent. Greece, Ireland, and Spain are menaced by financial crises. And the euro is in trouble. In *The End of the West*, David Marquand, a former member of the British Parliament, argues that Europe's problems stem from outdated perceptions of global power, and calls for a drastic change in European governance to halt the continent's slide

into irrelevance. Taking a searching look at the continent's governing institutions, history, and current challenges, Marquand offers a disturbing diagnosis of Europe's ills to point the way toward a better future. Exploring the baffling contrast between postwar success and current failures, Marquand examines the rebirth of ethnic communities from Catalonia to Flanders, the rise of xenophobic populism, the democratic deficit that stymies EU governance, and the thorny questions of where Europe's borders end and what it means to be European. Marquand contends that as China, India, and other nations rise, Europe must abandon ancient notions of an enlightened West and a backward East. He calls for Europe's leaders and citizens to confront the painful issues of ethnicity, integration, and economic cohesion, and to build a democratic and federal structure. A wake-up call to those who cling to ideas of a triumphalist Europe, *The End of the West* shows that the continent must draw on all its reserves of intellectual and political creativity to thrive in an increasingly turbulent world, where the very language of East and West has been emptied of meaning. In a new preface, Marquand analyzes the current Eurozone crisis—arguing that it was inevitable due to the absurdity of combining monetary union with fiscal disunion—and raises some of the questions Europe will have to face in its recovery.

Design research in software development: Constructing and Linking Research Questions, Objectives, Methods and Outcomes (UUM Press) Norshuhada Shiratuddin ,Shahizan Hassan,2010-01-01 Design research is grounded on the iterative Triangulation Methodology (ITM), where theoretical, development and empirical research approaches are triangulated to accomplish the design research objectives. Constructing and associating research gaps, questions, objectives, methods and outcomes are imperative in a research. However, not linking all these and choosing the wrong and poorly designed methods are common especially among inexperienced researchers and students. Therefore, researchers should practice strategies in identifying the right methods to collect data or perform experiment that can meet the predefined objectives and determined research problems. This book is aimed at providing some of the likely strategies. It contains personalized strategies and examples that are useful for starting a design research in any field particularly in software and application development. The examples described are real studies that we conducted together with our research team members.

Codifying Choice of Law Around the World Dean Symeon C. Symeonides,2014-04-30 Codifying Choice of Law Around the World chronicles, documents, and celebrates the extraordinary, massive codification of Private International Law (PrIL), or Conflict of Laws that has taken place in the last 50 years, from 1962-2012. During this period, the world has witnessed the adoption of nearly 200 PrIL codifications, EU Regulations, and international conventions--more than in all preceding years since the inception of PrIL. This book provides a horizontal comparison and discussion of these codifications and conventions, first by comparing the way they resolve tort and contract conflicts, and then by comparing the answers of these codifications to the fundamental philosophical and methodological dilemmas of PrIL. In the process, this book re-examines and dispels certain widely held assumptions about choice of law, and the art and science of codification in general. Written by Symeon C. Symeonides, a renowned PrIL and comparative law expert with extensive first-hand experience in drafting codifications and advising other drafters, *Codifying Choice of Law Around the World* will serve as an indispensable point of reference for any serious study or discussion of PrIL, and comparative law.

Plastic Capitalism Sean H Vanatta,2024-05-21 How bankers created the modern consumer credit economy and destroyed financial stability in the process American households are awash in expensive credit card debt. But where did all this debt come from? In this history of the rise of postwar American finance, Sean H. Vanatta shows how bankers created our credit card economy and, with it, the indebted nation we know today. America's consumer

debt machine was not inevitable. In the years after World War II, state and federal regulations ensured that many Americans enjoyed safe banks and inexpensive credit. Bankers, though, grew restless amid restrictive rules that made profits scarce. They experimented with new services and new technologies. They settled on credit cards, and in the 1960s mailed out reams of high-interest plastic to build a debt industry from scratch. In the 1960s and '70s consumers fought back, using federal and state policy to make credit cards safer and more affordable. But bankers found ways to work around local rules. Beginning in 1980, Citibank and its peers relocated their card plans to South Dakota and Delaware, states with the weakest consumer regulations, creating on-shore financial havens and drawing consumers into an exploitative credit economy over which they had little control. We live in the world these bankers made.

Words of the Founding Fathers Steve Coffman, 2012-08-02 This collection gathers quotations, passages and documents attributed to America's six essential founders. Topics include liberty, religion, revolution, republican government, the constitution, education, commerce, class, war and peace, and the disenfranchised (slaves, Native Americans and women). Each quotation is sourced and quoted fully enough for the reader to discern its historical and philosophical context.

Advancing East Asian Regionalism Melissa Curley, Nicholas Thomas, 2012-10-12 Developments in East Asia have progressed rapidly in terms of regionalism since the 1997 crisis. The end of the Asian miracle called into question not only the capacity of regional states to meet the needs of their attendant peoples, but also challenged the viability of regional organizations, such as ASEAN, to adapt and respond to the changing circumstances. *Advancing East Asian Regionalism* looks at the ways in which ASEAN has expanded since the crisis, and evaluates the potential of East Asia to come together in a regional formation – one capable of representing the region as a whole – akin to the European Community. It draws upon the knowledge and perspectives of academics and policy makers actively engaged in the contradictory issues of regionalism. Coupling case study material on regionalism, institutions, and sectoral cooperation, with theoretical debates on regionalization, this book is an invaluable resource that pushes our understanding of East Asian regionalism forward.
