James Vicars

The Creation of Modern Buenos Aires Joel

Horowitz, 2024-04-01 The Creation of Modern Buenos Aires examines the impact of civic associations on the culture and the society of Buenos Aires and their ties to politics in the first decades of the twentieth century. The period saw the emergence of the modern political system with true appeals to the voters, tremendous urban growth, and the solidification of a barrio identity. Historian Joel Horowitz examines four types of organizations: football clubs, bibliotecas populares (popular libraries), sociedades de fomento (development societies that pushed for barrio improvements), and universidades populares (popular universities that provided practical training beyond the primary school level). All four types became important social centers and were connected to the political world. The book focuses on the period from the passage of a voting reform law in 1912, which made male-citizen voting obligatory and fraud more difficult, to the military coup of 1943. The book shows how civic associations helped create the social world of the city, focusing especially on the part they played in the development of the sense of barrio. It demonstrates how civic associations became vital links in the system of politics that emerged, creating spaces for politicians to build connections to different communities.

Participatory Design and Self-building in Shared Urban Open Spaces Carolin Mees, 2018-04-12 The book investigates the development of community gardens with self-built structures, which have existed as a shared public open space land use form in New York City's low-income neighborhoods like the South Bronx since the 1970s. These gardens have continued to be part of the urban landscape until today, despite conflicting land use interests, changing residents groups and contradictory city

planning. Both community gardens and self-built structures are created in a participatory design and self-built effort by urban residents and are an expression of the individual gardeners' preferences, their cultural background and the decisions made by the managing residents' group in regards to the needs of their neighborhood. Ultimately community gardens with self-built structures are an expression of the people's will to commonly use this land for open and enclosed structures next to their homes in the city and need to be included in future urban planning.

Green Is the New Red Will Potter, 2011-04-12 An insider tells how environmentalists and animal rights activists have become the number one domestic terrorism threat.

The Arts ,

Hong Kong and Bollywood Joseph Tse-Hei Lee, Satish Kolluri, 2016-09-27 This volume examines the transmission, reception, and reproduction of new cinematic styles, meanings, practices, and norms in early twenty-first-century Asia. Hong Kong and Bollywood offers new answers to the field of inter-Asian cultural studies, which has been energized by the trends towards transnationalism and translatability. It brings together a team of international scholars to capture the latest development in the film industries of Hong Kong and Mumbai, and to explore similar cross-cultural, political, and socioeconomic issues. It also explains how Hong Kong and Bollywood filmmakers have gone beyond the traditional focus on nationalism, urbanity and biculturalism to reposition themselves as new cultural forces in the pantheon of global cinema.

Wind Power in China Julia Kirch Kirkegaard, 2018-11-12 Whilst China's growing economy is widely regarded as being responsible for severe environmental degradation and a high reliance on energy from fossil fuels, China is

emerging as a potential leader in new green energy technologies. Outlining the extraordinary growth in China's wind power capacity since 2005, this book explores the deliberate creation of a whole industry and the strategy of transitioning the power sector to renewable energy by accelerated experimentation and through literally pushing the emerging wind power sector to its limits.

Investigating how wind power may not always be considered as sustainable in a wider Chinese developmental context, the book traces the struggle China has had in getting this high technology sector to qualify as truly Chinese scientific development, whilst often being opaquely at the mercy of foreign expertise, technology, and certification. The book furthermore exposes the surprising nuances, dynamics, and potency of unexpected players in Chinese wind power marketisation. Complex interplays are revealed between wind turbine control systems, algorithms in critical software technology, relationships between suppliers, wind farm developers, financiers, the electrical grid itself, the coal lobby, the broader Chinese state, and much more. The book has important implications far beyond wind power and contemporary China studies, highlighting the much wider story of China's fragmented and experimental style of innovating, upgrading, and greening.

Transboundary Water Disputes Itzchak E.

Kornfeld, 2019-02-21 A thorough analysis of how effectively international courts and tribunals adjudicate transboundary water disputes, using detailed case studies.

The State of the Field David

Kilpatrick, 2018-12-07 The study of association football has recently emerged as vibrant field of inquiry, attracting scholars worldwide from a variety of disciplinary backgrounds. Soccer As the Beautiful Game: Football's Artistry, Identity and

Politics, held at Hofstra University in April 2014, gathered together scholars, media, management, and fans in the largest ever conference dedicated to the game in North America. This collection of essays provides a comprehensive view of the academic perspectives on offer at the conference, itself a snapshot of the state of this increasingly rich scholarly terrain. The diversity of approaches range from theory to pedagogy to historical and sociological engagements with the game at all levels, from the grassroots to the grand spectacle of the World Cup, while the international roster of authors is testimony to the game's global reach. This collection of essays therefore offers a state of the field for soccer studies and a road map for further exploration. The chapters originally published as a special issue in Soccer & Society.

Beyond the Sky James Vicars, 2020-09-28 The first woman to gain a pilot's licence in the Commonwealth outside Britain, Millicent Bryant steps onto the Sydney Harbour Ferry, Greycliffe, to return home on a sunny November afternoon in 1927. But just off Bradley's Head, the Greycliffe is rammed and sunk by a passenger ship and, in the moments of her drowning, Millicent's recent life and flying achievements rise like final bubbles of breath from the wreckage. Ninety years later, this innovative biographical work, based on Millicent's rediscovered letters and writings, tells the 'lost' life of a highly individual, modern woman whose passions took her not only to the sky but beyond it. Entrepreneur, student of Japanese, early motorist, mother of three, would-be novelist, politically engaged citizen - and woman with a hidden love - this was Millicent Bryant, aviator.

Chinese Politics in the Hu Jintao Era: New Leaders, New Challenges Willy Lam, 2016-07-01 Drawing on hundreds of interviews with top Chinese

officials, parliamentarians, scholars, and businessmen, Willy Lam, a renowned journalist and writer on Chinese affairs, presents a first-hand, multi-dimensional account of twenty-first century China and the impact of fourth generation leaders, including President Hu Jintao and Premier Wen Jiabao. Lam goes behind the glitzy facade of nouveau-riche Beijing and Shanghai to examine how the Hu leadership has tried to extend the Communist Party's mandate of heaven by tackling an array of daunting problems: the weakening legitimacy of the Party's leadership; restive peasants; angry workers; political stagnation over the lack of reform; foreign relations difficulties; unreliable energy supplies; resurgent nationalism; and the increasingly dubious Chinese model of development. The author assesses possible contributions that the new classes of private businessmen, professionals, and intellectuals - as well as new ideas such as nationalism, globalization, and federalism - will make to economic prosperity and political liberalization. The book also includes a chapter on foreign policy, which contains an insightful account of Beijing's evolving and sometimes difficult relations with the United States, Europe, Japan, and other major countries and blocs, as well as the role of the People's Liberation Army.

The Impact of Information on Modern Humans Elena G. Popkova, 2018-03-06 This book features contributions from various spheres of socio-humanitarian sciences presented at the scientific and practical conference on "Humans as an Object of Study by Modern Science," which took place in Nizhny Novgorod (Russian Federation) on November 23-24, 2017. The conference was organized by Kozma Minin Nizhny Novgorod State Pedagogical University and the non-profit organization "Institute of Scientific Communications." Presenting the results

of multidisciplinary studies as well as new approaches, the target audience of the book includes postgraduates, lecturers at higher educational establishments, and researchers studying socio-humanitarian sciences. The complex study of humans by representatives of various socio-humanitarian sciences (philosophy, pedagogics, jurisprudence, social sciences, and economics) allows a comprehensive concept of the field to be developed. Selecting humans as an object of research opens wide possibilities for studying various issues related to their activities, while considering humans within multiple sciences means that the methods of induction and deduction can be combined to achieve precise results. This book includes the results of leading scientific studies on the following key issues: establishment of an information economy under the influence of scientific and technical progress; new challenges and opportunities; information and communication technologies as a new vector of development of the modern world economy; specifics and experience of using new information and communication technologies in developed and developing countries; problems of implementing new information and communication technologies in the modern economy; and priorities of using new information and communication technologies in the modern economy.

Handbook of Research on Cyber Crime and Information Privacy Cruz-Cunha, Maria Manuela, Mateus-Coelho, Nuno Ricardo, 2020-08-21 In recent years, industries have transitioned into the digital realm, as companies and organizations are adopting certain forms of technology to assist in information storage and efficient methods of production. This dependence has significantly increased the risk of cyber crime and breaches in data security. Fortunately, research in the area of cyber security and information protection is

flourishing; however, it is the responsibility of industry professionals to keep pace with the current trends within this field. The Handbook of Research on Cyber Crime and Information Privacy is a collection of innovative research on the modern methods of crime and misconduct within cyber space. It presents novel solutions to securing and preserving digital information through practical examples and case studies. While highlighting topics including virus detection, surveillance technology, and social networks, this book is ideally designed for cybersecurity professionals, researchers, developers, practitioners, programmers, computer scientists, academicians, security analysts, educators, and students seeking up-to-date research on advanced approaches and developments in cyber security and information protection.

The Calendar Question J.Gabriel Koestel,

The Siege of Tsingtau Charles

Stephenson, 2017-06-30 "A well-written, modern narrative of the political and military events leading up to, during and after the German-Japanese War of 1914."—The Australian Naval Institute The German-Japanese War was a key, yet often neglected, episode in the opening phase of the First World War. It had profound implications for the future, particularly in respect of Japan's acquisition of Germany's Micronesian islands. Japan's naval perimeter was extended and threatened the United States naval strategy of projecting force westward. The campaign to relieve Germany of Tsingtau, the port and naval base in China, and its hinterland posed a grave threat to Chinese independence. The course of the Second World War in China and the Pacific cannot be explained without reference to these events. Charles Stephenson's account makes fascinating reading. The siege of Tsingtau by the Japanese, with token British participation, forms the core

of his story. He draws on Japanese and German primary sources to describe the defenses, the landings, the course of the siege, and eventual German surrender. His study will be absorbing reading for anyone interested in the campaigns of the First World War outside of Europe, in German colonial expansion and the rise to power of Japan. "Overall the volume delivers a much needed, interesting and often highly detailed overview of operations in the Pacific and the siege of Tsingtau. The volume excels especially in its detailed narrative of naval and land operations in the Pacific and in China. The geopolitical background provides a most useful introduction to the history of the region."—International Journal of Maritime History

The Texas Rangers Darren L. Ivey, 2010-03-18 The Texas Ranger law enforcement agency features so prominently in Texan and Wild West folklore that its accomplishments have been featured in everything from pulp novels to popular television. After a brief overview of the Texas Rangers' formation, this book provides an exhaustive account of every known Ranger unit from 1823 to present. Each chapter provides a brief contextual explanation of the time period covered and features entries on each unit's commanders, periods of service, activities, and supervising authorities. Appendices include an account of the Rangers' battle record, a history of the illustrious badge, documents relating to the Rangers, and lists of Rangers who have died in service, been inducted into the Texas Ranger Hall of Fame, or received the Texas Department of Public Safety's Medal of Valor.

Business Information Systems Workshops Witold Abramowicz, Sören Auer, Milena Stróżyńska, 2022-04-05 This book constitutes revised papers from the eight workshops which were held during June 2021 at the 24th International Conference on Business

Information Systems, BIS 2021. The conference was planned to take place in Hannover, Germany, and changed to a fully online event due to the COVID-19 pandemic. There was a total of 67 submissions to all workshops of which 31 papers were accepted for publication. The workshops included in this volume are: AKTB 2021: 12th Workshop on Applications of Knowledge-Based Technologies in Business BisEd 2021: BIS Education: Trends and Challenges DigBD 2021: 1st Workshop on Digitization in the Flux of Big Data Scenarios DigEx 2021: 3rd International Workshop on transforming the Digital Customer Experience iCRM 2021: 6th International Workshop on Integrated Social CRM QOD 2021: 4th Workshop on Quality of Open Data BITA 2021: 12th Workshop on Business and IT Alignment BSCT 2021: 4th Workshop on Blockchain and Smart Contract Technologies

Unconventional Monetary Policy and Financial Stability Alexis Stenfors, Jan

Toporowski, 2020-07-15 Since the financial crisis of 2008-09, central bankers around the world have been forced to abandon conventional monetary policy tools in favour of unconventional policies such as quantitative easing, forward guidance, lowering the interest rate paid on bank reserves into negative territory, and pushing up prices of government bonds. Having faced a crisis in its banking sector nearly a decade earlier, Japan was a pioneer in the use of many of these tools. *Unconventional Monetary Policy and Financial Stability* critically assesses the measures used by Japan and examines what they have meant for the theory and practice of economic policy. The book shows how in practice unconventional monetary policy has worked through its impact on the financial markets. The text aims to generate an understanding of why such measures were introduced and how the Japanese system has subsequently changed regarding aspects such as governance and

corporate balance sheets. It provides a comprehensive study of developments in Japanese money markets with the intent to understand the impact of policy on the debt structures that appear to have caused Japan's deflation. The topics covered range from central bank communication and policymaking to international financial markets and bank balance sheets. This text is of great interest to students and scholars of banking, international finance, financial markets, political economy, and the Japanese economy.

Rediscovering Fire Guinevere Liberty Nell, 2010
In this book, Guinevere Liberty Nell visits this historical laboratory of social science to study the lessons in basic economics that it teaches. Nell observes that the founders of the Soviet experiment, Lenin and other Bolshevik leaders, wrote volumes of articles and books on Marxist theory and then proceeded to enact the very policies that they promised. Therefore the Soviet experiment provides an ideal lens through which to view the consequences of various interpretations of economic theories and Marxist theories. However, despite the wealth of information available on the Soviet experiment, few writers have closely analyzed this historical process and what lessons it might offer for market economies. In this book, Nell carefully considers Soviet theory and practice, and draws out the lessons that Soviet planners learned. Each chapter considers one theory; the experience in the Soviet Union of policies based on this theory, and the reforms that planners implemented as the system evolved as well as in response to changes in the local and international conditions; and the lessons for market economies that this experience offers. Nell's lessons capture the dynamic nature of the economy and illustrate insights from the debate between socialists and Austrian economists.

They should be useful and informative not only for readers interested in basic economics, but also for economists interested in heterodox approaches to economic modeling and theory, as well as for the citizen interested in rethinking the assumptions underlying mainstream policy debates.

Being and Creation in the Theology of John Scottus Eriugena Sergei N. Sushkov, 2017-08-09
Despite his prominent role in the formation of Christian thought, John Scottus Eriugena still remains an enigmatic figure whose background and potential arouse a great deal of scholarly interest. This is true especially today, when faith seeks to regenerate: his honesty and profundity encourage us in our search for the authentic teaching of Christ. As a theologian who strongly believes in human dignity as equal to that of the imago dei, Eriugena helps us meet Christ again and follow him towards a new horizon of being. What makes Eriugena's theology unique is his innovative approach to theological thinking, which is to be properly understood, as argued in this book, in terms of the paradigmatic shift from metaphysics to dialectic. The way we think, while trying to adopt and follow the truth of revelation so as to get freed from the world of finite things, cannot actually dispense with a dialectical treatment of contradiction. And Eriugena is explicit about this, which allows him to win a reputation as the "Hegel of the ninth century" and to make us look at our faith anew in coherence with such pivotal ideas as the divine unity, right reason, and return to the reality of creation.

Urban Displacements Susanne Soederberg, 2020-12-31
With an eye to further our understanding of everyday life in global capitalism, *Urban Displacements* provides the first systemic critical political economy analysis of low-income rental housing and social dislocations,

combining both theoretical advancements and detailed empirical studies, centering on Berlin, Dublin and Vienna. Soederberg pushes beyond dominant debates by treating low-rent housing as a unique commodity that provides a necessary place for the societal reproduction of labour power whilst being integrated into the global dynamics of capitalism. She argues that historical and geographical configurations of monetized governance, including landlords, employers and inter-scalar state practices, have served to reproduce urban displacements and obfuscate their gendered, class and racialized underpinnings. The outcome is the everyday facilitation and normalization of urban poverty and social marginalization on one side, and capital accumulation on the other. Building on Soederberg's previous book *Debtfare States and the Poverty Industry*, this accessible and interdisciplinary text will be useful to academics and students in political science, sociology, geography, urban studies, labour studies, European studies and gender studies.

Reviewing **Printfriendly1911.htm**: Unlocking the Spellbinding Force of Linguistics

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence. Its capacity to evoke emotions, stimulate contemplation, and stimulate metamorphosis is actually astonishing. Within the pages of **"Printfriendly1911.htm,"** an enthralling opus penned by a highly acclaimed wordsmith, readers attempt an immersive expedition to unravel the intricate significance of language and its indelible imprint on our lives. Throughout this assessment, we shall delve in to the book is

central motifs, appraise its distinctive narrative style, and gauge its overarching influence on the minds of its readers.
