*Foundations of EU Food Law and Policy* Alberto Alemanno, Simone Gabbi, 2016-04-15 This volume presents the viewpoints of academics, food lawyers, industry and consumer representatives as well as those of EU policymakers on the first ten years of activity of one of the most prominent European agencies. Its broader purpose, however, is to discuss the future role played by EFSA within the rapidly-evolving area of EU food law and policy. By revisiting and discussing the milestones in the history of EFSA, the collection provides forward-looking views of food leaders and practitioners on the future scientific and regulatory challenges facing the European Union. In particular, by presenting a critical assessment of the agency's activities within its different areas of work, the book offers readers a set of innovative tools for evaluating policy recommendations and better equips experts and the public to address pressing regulatory issues in this emotive area of law and policy. Despite its celebratory mood, the book's focus is more about the future than the past of EU food law and policy. Each chapter discusses how EFSA's role has evolved and identifies what it should have done differently while presenting an overall assessment of how the agency has discharged its mandate.

*China in the Global Economy Rural Finance and Credit Infrastructure in China* OECD, 2004-04-23 This publication presents the proceedings of a conference that took stock of achievements China has made in agricultural finance and credit infrastructure and discussed how China could best address future challenges in this area.

**Reset for Parents** Todd Friel, 2017-01-26 Raising a prodigal is every Christian parent's worst nightmare. Horrifyingly, George Barna contends that over 60 percent of Christian kids will run off to university and "lose their faith." Some pollsters believe the number is as high as 80 percent. But there is great news! Your child doesn't have to become a statistic. Your child can become an adult who loves the Lord the same way you do – but this will likely require a radical parenting reset on your part. Todd Friel has witnessed to hundreds of university students, most of whom are Bible-belt backsliders. *Reset for Parents* gets to the heart of the issue and presents a solid, biblical roadmap for parents to avoid the pain and heartache of raising a prodigal.

**Rural Finance and Credit Infrastructure in China** Organisation for Economic Co-operation and Development, 2004 Although China's rural economy has made significant progress over the last twenty-five years, rural finance and institutional reforms are still lagging behind. This publication reviews the findings of an OECD meeting held in October 2003 and organised with the Chinese Government (with participants including Chinese policy makers and industry experts, as well as representatives from the World Bank, the FAO, the European Bank for Reconstruction and Development and the Asian Development Bank). The meeting discussed options for improving the country's rural finance and institutional framework, as well as considering the role that the Chinese government could play within the reform process.

**Latex 2002** , 2002-12 Both synthetic and natural latices were covered in this conference, including natural rubber latex, high volume synthetic emulsions, such as SBR, as well as specialty products, such as acrylics. Application

markets addressed included adhesives and sealants, carpet backing, paper coatings, construction, fabrics, foamed articles, medical gloves, medical devices, textile threads, condoms and others. The latex industry is in dynamic flux at the present time. The supply side has undergone major restructuring. Inter-materials competition has intensified as improved materials become capable of challenging incumbent materials. Many serious issues face the latex industry, such as continuing price depression in some sectors, rising technical demands as well as substantial legislative and environmental pressure. Despite the challenging times facing the industry, the overall prospects for latex are very positive. Substitution of solvent based products continues, the performances of latices continues to improve in such applications as adhesives and the glove industry is responding positively to the setbacks of the allergy controversy. 9 million dry tons and has spread across a wide range of industrial and consumer markets. Growing demand in medical and strong prospects in construction are just two of the positive trends that will continue to fuel the market growth of both natural and synthetic latices. As last year's conference demonstrated, the Rapra International Latex Conference is an unparalleled forum for developing understanding of the latex industry, technical trends and market driving forces, such as new legislation. The 2002 event provided a vital meeting point for the synthetic and natural latex communities of Europe, Asia and America. This conference will be of interest to all latex stakeholders, including: feedstock suppliers, latex producers, compounders, fabricators of consumer, medical and industrial articles based on latex, traders and distributors, machine and equipment suppliers, legislators, healthcare professionals and users of latex based products.

**The American Byron** John W. M. Hallock, 2000 Hailed in the mid-19th century as the most important American poet of the period, Fitz-Greene Halleck was dubbed the American Byron and had a large general readership despite his work's infusion of homosexual themes. This biography portrays him as a prophet of the literary and sexual revolution.

*On Dangerous Ground* Gregory B. Poling, 2022-07-01 A robust yet accessible history of US involvement in the world's most dangerous waterway, and a guide for what to do about it. Lamentations that the United States is losing the South China Sea to China are now common. China has rapidly militarized islands and reefs, projects power across the disputed waterway, and freely harasses US allies and partners. The US has been unable to halt

these processes or convince Beijing to respect the rights of smaller neighbors. But what exactly would losing mean? In *On Dangerous Ground*, Gregory B. Poling evaluates US interests in the world's most complex and dangerous maritime disputes by examining more than a century of American involvement in the South China Sea. He focuses on how the disputes there intersected and eventually intertwined with the longstanding US commitment to freedom of the seas and its evolving alliance network in Asia. He shows that these abiding national interests--defense of maritime rights and commitment to allies, particularly the Philippines--have repeatedly pulled US attention to the South China Sea. Understanding how and why is critical if the US and its allies hope to chart a course through the increasingly fraught disputes, while facing a more assertive, more capable, and far less compromising China. With an emphasis on decisions made not just in Washington and Beijing, but also in Manila and other Southeast Asian capitals, *On Dangerous Ground* seeks to correct the record and balance the China-centric narrative that has come to dominate the issue. It not only provides the most comprehensive account yet of America's history in the South China Sea, but it also demonstrates how that history should inform US national security policy in one of the most important waterways in the world.

Bosnia and the Destruction of Cultural Heritage Helen Walasek, contributions by Richard Carlton, Amra Hadžimuhamedović, Valery Perry, Tina Wik, 2016-03-03 The massive intentional destruction of cultural heritage during the 1992-1995 Bosnian War targeting a historically diverse identity provoked global condemnation and became a seminal marker in the discourse on cultural heritage. It prompted an urgent reassessment of how cultural property could be protected in times of conflict and led to a more definitive recognition in international humanitarian law that destruction of a people's cultural heritage is an aspect of genocide. Yet surprisingly little has been published on the subject. This wide-ranging book provides the first comprehensive overview and critical analysis of the destruction of Bosnia-Herzegovina's cultural heritage and its far-reaching impact. Scrutinizing the responses of the international community during the war (including bodies like UNESCO and the Council of Europe), the volume also analyses how, after the conflict ended, external agendas impinged on heritage reconstruction to the detriment of the broader peace process and refugee return. It assesses implementation of Annex 8 of the Dayton Peace Agreement, a unique attempt to address the devastation to Bosnia's cultural heritage, and examines the treatment of war crimes involving cultural property at the International Criminal Tribunal for the former Yugoslavia (ICTY). With numerous case studies and plentiful illustrations, this important volume considers questions which have moved to the foreground with the inclusion of cultural heritage preservation in discussions of the right to culture in human rights discourse and as a vital element of post-conflict and development aid.

**Clay's Handbook of Environmental Health** Stephen Battersby, 2016-07-01 Clay's Handbook of Environmental Health, since its first publication in 1933, has provided a definitive guide for the environmental health practitioner, or reference for the consultant or student. This 21th edition continues as a first point of reference, reviewing the

core principles, techniques and competencies, and then outlining the specialist subjects. It has been refocused on the current curriculum of the UK's Chartered Institute of Environmental Health but should also readily suit the generalist or specialist working outside the UK.
