The Life of Milarepa ,1992-02-01 The Life of Milarepa is the most beloved story of the Tibetan people and one of the greatest source books for the contemplative life in all world literature. This biography, a true folk tale from a culture now in crisis, can be read on several levels: a personal and moving introduction to Tibetan Buddhism, it is also a profoundly detailed guidebook in the search for consciousness. It presents the quest for spiritual perfection, tracing the path of a great sinner who became a great saint. But it is also a powerful and graphic folk tale, full of magic, disaster, feuds, deceptions, and humor. This definitive translation, originally published in 1977, was the first to appear in any Western language in half a century and renders this classic of spiritual literature into a simple modern English that reflects the direct power of the original.

Economics, Aid and Education Suzanne Majhanovich, Macleans A. Geo-Jaja, 2013-11-04 It is impossible to discuss economics, development or education in a world-wide context without considering the effects of markets or globalization on these issues that have such an impact on humanity. Neoliberalism has had profound consequences for education worldwide, particularly in the developing world. The chapters in this volume include both case studies for specific countries as well as reflections on economic and educational priorities in a globalized world. How development aid is delivered, provisioned and under what conditions is debated in several chapters. Similarly, development as well as poverty are conceived in multi-dimensionalities depending on the context. In addition, the issue of what quality education has come to mean in a globalized age is also addressed. The contrast between discourses of humanistic approaches to education and those of neoliberalism as propounded by the World Bank informs discussions throughout the volume. The collection of papers in Economics, Aid and Education: Implications for Development provides a roadmap for policy makers in developing countries as well as for comparativists to the key issues and challenges of globalization, marketization and internationalization of education in a period of economic crisis. This book explores the contributions of globalization and the roadmaps developed as vehicles for societal transformation. Contributors from all parts of the globe discuss the expanding role of the World Bank's market reforms in education in developing countries. In a detailed and practical way, the authors question false assumptions of education aid and underline the challenges of funding gaps related to development in education.

WHO Expert Committee on Biological Standardization World Health Organization, 2018-07-18 This report presents the recommendations of a WHO Expert Committee commissioned to coordinate activities leading to the adoption of international recommendations for the production and control of vaccines and other biological substances and the establishment of international biological reference materials. Following a brief introduction the report summarizes a number of general issues brought to the attention of the Committee. The next part of the report of particular relevance to manufacturers and national regulatory authorities outlines the discussions held on the development and adoption of new and revised WHO Recommendations Guidelines and guidance documents. Following these discussions WHO Guidelines on the quality safety and efficacy of Ebola vaccines and WHO Guidelines on procedures and data requirements for changes to approved biotherapeutic products were adopted on the recommendation of the Committee. In addition the following two WHO guidance documents on the WHO prequalification of in vitro diagnostic medical devices were also adopted: (a) Technical Specifications Series (TSS) for WHO Prequalification - Diagnostic Assessment: Human immunodeficiency virus (HIV) rapid diagnostic tests for professional use and/or self-testing; and (b) Technical Guidance Series (TGS) for WHO Prequalification - Diagnostic Assessment: Establishing stability of in vitro diagnostic medical devices. Subsequent sections of the report provide information on the current status proposed development and establishment of international reference materials in the areas of: antibiotics biotherapeutics other than blood products; blood products and related substances; in vitro diagnostics; and vaccines and related substances. A series of annexes are then presented which include an updated list of all WHO Recommendations Guidelines and other documents on biological substances used in medicine (Annex 1). The above four WHO documents adopted on the advice of the Committee are then published as part of this report (Annexes 2-5). Finally all additions and discontinuations made during the 2017 meeting to the list of International Standards Reference Reagents and Reference Panels for biological substances maintained by WHO are summarized in Annex 6. The updated full catalogue of WHO International Reference Preparations is available at: <http://www.who.int/bloodproducts/catalogue/en/>.

Human Immunodeficiency Virus (HIV) rapid diagnostic tests for professional use and/or self-testing ,2021-06-08 The purpose of this document is to provide technical guidance to in vitro diagnostic medical device (IVD) manufacturers that intend to seek WHO prequalification of rapid diagnostic tests (RDTs) for the detection of human immunodeficiency virus (HIV). The minimum performance requirements for WHO prequalification are summarized in this document, and apply equally to RDTs intended solely for HIV detection and those in which HIV detection is one component of a multi-detection assay (for example, an HIV/syphilis dual-detection RDT). This document applies to RDTs intended to be used as an aid to diagnosis of HIV infection. The current version of this document does not address IVDs that discriminate between the detection of HIV-1 and HIV-2 infection, IVDs intended as confirmatory tests, or the requirements for accompanying quality control materials.

Springboard G. Richard Shell, 2013-08-15 Everyone knows that you are supposed to “follow your dream.” But where is the road map to help you discover what that dream is? You have just found it. In Springboard, award-winning author and teacher G. Richard Shell helps you find your future. His advice: Take an honest look inside and then answer two questions: What, for me, is success? How will I achieve it? You will begin by assessing your current beliefs about success, including the hidden influences of family, media, and culture. These are where the pressures to live “someone else’s life” come from. Once you gain perspective on these outside forces, you will be ready to look inside at your unique combination of passions and capabilities. The goal: to focus more on what gives meaning and excitement to your life and less on what you are “supposed” to want. Drawing on his decades of research, Shell offers personalized assessments to help you probe your past, imagine your future, and measure your strengths. He then combines these with the latest scientific insights on everything from self-confidence and happiness to relationships and careers. Throughout, he shares inspiring examples of people who found what they were meant to do by embracing their own true measure of success. Eric Adler: one of Shell’s former students who walked away from a conventional business career to help launch a revolutionary new concept in public education that has placed hundreds of inner-city high school students in top colleges. Kurt Timken: a Harvard-educated son of a Fortune 500 CEO who found his true calling as a hard-charging police officer fighting drug lords in southern California. Cynthia Stafford: an office worker who became one of her community’s leading promoters of theater and the arts. Get ready for the journey of a lifetime—one that will help you reevaluate your future and envision success on your own terms. Students and executives say that Richard Shell’s courses have changed their lives. Let this book change yours.

Angle of Repose Wallace Stegner, 2014-11-04 An American masterpiece and iconic novel of the West by National Book Award and Pulitzer Prize winner Wallace Stegner—a deeply moving narrative of one family and the traditions of our national past. Lyman Ward is a retired professor of history, recently confined to a wheelchair by a crippling bone disease and dependant on others for his every need. Amid the chaos of 1970s counterculture he retreats to his ancestral home of Grass Valley, California, to write the biography of his grandmother: an elegant and headstrong artist and pioneer who, together with her engineer husband, made her own journey through the hardscrabble West nearly a hundred years before. In discovering her story he excavates his own, probing the shadows of his experience and the America that has come of age around him.

[Propriedade Intelectual e Inovação no Setor de Defesa](#) Ana Carolina de Souza Pereira,Mauro Catharino Vieira da Luz,Sergio Medeiros Paulino de Carvalho,Bruno Costa Marinho,Andrea Drumond de Meireles Seyller,2022-06-24 Ciência e tecnologia são agentes de mudança, que oferecem novas possibilidades para produzir e difundir bens e serviços, influenciando transformações e evoluções socioeconômicas. Também na área militar, ciência e tecnologia são reconhecidamente aspectos críticos, tanto para a estratégia, quanto para o próprio poderio militar dos países. O sistema de propriedade intelectual, por sua vez, é uma instituição fundamental para transformação das criações humanas - incluindo as tecnologias - em progresso e poder, por meio das inovações, que alcançam os mercados sob a forma de bens e serviços. O mesmo vale para as tecnologias de interesse da defesa e para própria indústria militar. Nesse contexto, os artigos desta publicação investigam de que forma as novas tecnologias e possíveis inovações na área da defesa relacionam-se com configuração e características do Sistema de Propriedade Intelectual e podem influenciar a formação de competências, o desenvolvimento e a própria estrutura do novo teatro de operações no Brasil e no mundo.

[The Great Influenza](#) John M. Barry,2005-10-04 #1 New York Times bestseller “Barry will teach you almost everything you need to know about one of the deadliest outbreaks in human history.”—Bill Gates Monumental... an authoritative and disturbing morality tale.—Chicago Tribune The strongest weapon against pandemic is the truth. Read why in the definitive account of the 1918 Flu Epidemic. Magisterial in its breadth of perspective and depth of research, The Great Influenza provides us with a precise and sobering model as we confront the epidemics looming on our own horizon. As Barry concludes, The final lesson of 1918, a simple one yet one most difficult to execute, is that...those in authority must retain the public's trust. The way to do that is to distort nothing, to put the best face on nothing, to try to manipulate no one. Lincoln said that first, and best. A leader must make whatever horror exists concrete. Only then will people be able to break it apart. At the height of World War I, history’s most lethal influenza virus erupted in an army camp in Kansas, moved east with American troops, then exploded, killing as many as 100 million people worldwide. It killed more people in twenty-four months than AIDS killed in twenty-four years, more in a year than the Black Death killed in a century. But this was not the Middle Ages, and 1918 marked the first collision of science and epidemic disease.
