A Practical Introduction to Beam Physics and Particle Accelerators Santiago Bernal,2016-03-01 This book is a brief exposition of the principles of beam physics and particle accelerators with emphasis on numerical examples employing readily available computer tools. Avoiding detailed derivations, we invite the reader to use general high-end languages such as Mathcad and Matlab, as well as specialized particle accelerator codes (e.g. MAD, WinAgile, Elegant, and others) to explore the principles presented. This approach allows the student to readily identify relevant design parameters and their scaling and easily adapt computer input files to other related situations.

Materiality in Religion and Culture Saburo Shawn Morishita,2017 This book examines the significance of the material dimensions of religion and culture. By looking at how scholars have researched religious materiality in the past, and focusing especially upon the variety of ways objects are handled in contemporary religious life, the reader will discover some insight into the interplay between the material and the immaterial. Case studies analyze the use of things in rituals and sacred places as well as ways in which they are appropriated for religious and academic instruction. The book attempts to reinterpret what the materiality in religion and culture might signify in light of multidisciplinary methodological approaches and helps to gain some ground on the abstract perspective of religions. Digital Scholarship 2009 Charles W Bailey Jr,Charles Wesley Bailey,2010 Digital Scholarship 2009 includes four bibliographies: the Scholarly Electronic Publishing Bibliography: 2009 Annual Edition, the Institutional Repository Bibliography, the Electronic Theses and Dissertations Bibliography, and the Google Book Search Bibliography. The longest bibliography, the Scholarly Electronic Publishing Bibliography: 2009 Annual Edition, presents selected English-language articles, books, and other printed and electronic sources that are useful in understanding scholarly electronic publishing efforts on the Internet. Most sources have been published between 1990 and 2009; however, a limited number of key sources published prior to 1990 are also included. Peter Jacso said in ONLINE (vol. 27, no. 3 2003, pp. 73-76): SEP [Scholarly Electronic Publishing Bibliography] is compiled with utter professionalism. It reminds me of the work of the best artisans who know not only every item that leaves their workshops, but each component used to create them--providing the ideal quality control. . . . The selection of items is impeccable. I have yet to find journal articles irrelevant to the scope of the bibliography. SEP could be used as a benchmark in evaluating abstracting/indexing databases that proudly claim to have coverage of electronic publishing, but do not come close to SEP.
