New Venture Creation Jeffrey A. Timmons, Stephen Spinelli, 2007 This new 7th Edition of *New Venture Creation: Entrepreneurship for the 21st Century*, is the most heavily revised edition since its existence, yet it still maintains the market defining Timmons Model of the Entrepreneurial Process. As always, Timmons & Spinelli cover the process of getting a new venture started, growing the venture, and successfully harvesting it. Through text, case studies, and hands-on exercises, this how-to text guides students in discovering the concepts of entrepreneurship and the competencies, skills, tools, and experience to equip students to successfully launch a new venture and recognize entrepreneurial opportunities.

Human-Computer Interaction. Applications and Services Masaaki Kurosu, 2014-06-09 The 3-volume set LNCS 8510, 8511 and 8512 constitutes the refereed proceedings of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas.

Design, User Experience, and Usability: Theories, Methods, and Tools for Designing the User Experience Aaron Marcus, 2014-07-24 The four-volume set LNCS 8517, 8518, 8519 and 8520 constitutes the proceedings of the Third International Conference on Design, User Experience and Usability, DUXU 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014, jointly with 13 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences were carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 256 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 66 papers included in this volume are organized in topical sections on design theories, methods and tools; user experience evaluation; heuristic evaluation; media and design; design and creativity.

Supporting Users in Password Authentication with Persuasive Design Tobias Seitz, 2018-08-03

Activities like text-editing, watching movies, or managing personal finances are all accomplished with web-based solutions nowadays. The providers need to ensure security and privacy of user data. To that end, passwords are still the most common authentication method on the web. They are inexpensive and easy to implement. Users are largely accustomed to this kind of authentication but passwords represent a considerable nuisance, because they are tedious to create, remember, and maintain. In many cases, usability issues turn into security problems, because users try to work around the challenges and create easily predictable credentials. Often, they reuse their passwords for many purposes, which aggravates the risk of identity theft. There have been numerous attempts to remove the root of the problem and replace passwords, e.g., through biometrics. However, no other authentication strategy can fully replace them, so passwords will probably stay a go-to authentication method for the foreseeable future. Researchers and practitioners have thus aimed to improve users' situation in various ways. There are two main lines of research on helping users create both usable and secure passwords. On the one hand, password policies have a notable impact on password practices, because they enforce certain characteristics. However, enforcement reduces users' autonomy and often causes frustration if the requirements are poorly communicated or overly complex. On the other hand, user-centered designs have been proposed: Assistance and persuasion are typically more user-friendly but their influence is often limited. In this thesis, we explore potential reasons for the inefficacy of certain persuasion strategies. From the gained knowledge, we derive novel persuasive design elements to support users in password authentication. The exploration of contextual factors in password practices is based on four projects that reveal both psychological aspects and real-world constraints. Here, we investigate how mental models of password strength and password managers can provide important pointers towards the design of persuasive interventions. Moreover, the associations between personality traits and password practices are evaluated in three user studies. A meticulous audit of real-world password policies shows the constraints for selection and reuse practices. Based on the review of context factors, we then extend the design space of persuasive password support with three projects. We first depict the explicit and implicit user needs in password support. Second, we craft and evaluate a choice architecture that illustrates how a phenomenon from marketing psychology can provide new insights into the design of nudging strategies. Third, we tried to empower users to create memorable passwords with emojis. The results show the challenges and potentials of emoji-passwords on different platforms. Finally, the thesis presents a framework for the persuasive design of password support. It aims to

structure the required activities during the entire process. This enables researchers and practitioners to craft novel systems that go beyond traditional paradigms, which is illustrated by a design exercise.

The papers included in the first volume are organized in the following topical sections: Art Karshmer lectures in access to mathematics, science and engineering; technology for inclusion and participation; mobile apps and platforms; accessibility of web and graphics; ambient assisted living (AAL) for aging and disability; the impact of PDF/UA on accessible PDF; standard tools and procedures in accessible e-book production; accessible e-learning – e-learning for accessibility/AT; inclusive settings, pedagogies and approaches in ICT-based learning for disabled and non-disabled people; digital games accessibility; user experience and emotions for accessibility (UEE4A).

First Do No Self Harm Charles Figley, Peter Huggard, Charlotte Rees, 2013-08-05 Keeping doctors happy and productive requires a thorough understanding of the systemic causes and consequences of physician stress, as well as the role of resilience in maintaining a healthy mental state. The

pressure of making life-or-death decisions along with those associated with the day-to-day challenges of doctoring can lead to poor patient care and communication, patient dissatisfaction, absenteeism, reductions in productivity, job dissatisfaction, and lowered retention. This edited volume will provide a comprehensive tool for understanding and promoting physician stress resilience. Specifically, the book has six interrelated objectives that, collectively, would advance the evidence-based understanding of (1) the extent to which physicians experience and suffer from work-related stress; (2) the various manifestations, syndromes, and reaction patterns directly caused by work-related stress; (3) the degree to which physicians are resilient in that they are successful or not successful in coping with these stressors; (4) the theories and direct evidence that account for the resilience; (5) the programs during and following medical school which help to promote resilience; and (6) the agenda for future theory, research, and intervention efforts for the next generation of physicians.

The Entrepreneurial Mind Jeffry A. Timmons, 1989 THE ENTREPRENEURIAL MIND, Jeffry A. Timmons, Harvard Business School A well-written & practical book designed to aid persons contemplating an entrepreneurial venture. Timmons, a specialist in entrepreneurship, has done an excellent job covering the field. Starting with a broad overview of what entrepreneurship is, he concludes with an assessment aimed at summing up the strengths &

weaknesses of a new enterprise in advance. In between, he provides sound advice on necessary managerial skills; how to form, build, & reward a new venture team; planning & goal-setting; & the pros & cons of family businesses. Particular attention is also given to the need for ethical standards. Recommended. -- Library Journal. A close look at the psychology of the entrepreneur & how that type of personality reacts with people & the world at large. Timmons does a good job of exploding myths & misconceptions, offering a wealth of insight into success, failure, & the hard work it takes to succeed in starting up a business or taking over the reins of an established or family-owned enterprise. The pitfalls of entrepreneurial life are analyzed, but more importantly, the positive attributes of the entrepreneur are emphasized. Numerous real-life case studies supplement the coverage. -- Booklist.

Collaboration in Creative Design Panos Markopoulos, Jean-Bernard Martens, Julian Malins, Karin Coninx, Aggelos Liapis, 2016-05-11 This book presents a number of new methods, tools, and approaches aimed to assist researchers and designers during the early stages of the design process, focusing on the need to approach the development of new interactive products, systems and related services by closely observing the needs of potential end-users through adopting a design thinking approach. A wide range of design approaches are explored, some emphasizing on the physicality of interaction and the products designed, others exploring interactive design and the emerging user experience (UX) with a focus on the value to the end-user. Contemporary design processes and the role of software tools to support design are also discussed. The researchers draw their expertise from a wide range of fields and it is this interdisciplinary approach which provides a unique perspective resulting in a flexible collection of methods that can be applied to a wide range of design contexts. Interaction and UX designers and product design specialists will all find *Collaboration in Creative Design* an essential read.

Never Bet the Farm Anthony Iaquinto, Stephen Spinelli, Jr., 2010-12-03 In *Never Bet the Farm* two leading entrepreneurs, Anthony Iaquinto and

Stephen Spinelli, turn much of the so-called expert advice for entrepreneurs on its head. They show that by preparing for setbacks and using a framework that can help reduce risks and simplify decision making, entrepreneurs can increase their probability for success. They refute the idea that there is an ideal entrepreneurial “type,” and show that luck can be as important as a business plan in many enterprises. Above all, the authors emphasize that entrepreneurship is a career, not a one-time event, and winners are those who can keep themselves in the game. *Never Bet the Farm* is an easy-to-understand and attractive tool for anyone who has a business idea, but who might be wary of the risks implied in starting their own business.

The set therefore provides readers with a comprehensive overview of ongoing research and development within the broad field of Human-Computer Interaction.

Form and Style in Journalism Marcel Jeroen Broersma, 2007 This volume addresses the usefulness of journalistic forms and styles as leading concepts for the analysis of media history. The thirteen essays included discuss the emergence and adaptation of the Anglo-American news style in

Europe, and study the reflective journalistic style which preceded and accompanied it. They examine the journalistic, cultural and ideological frameworks which underlie the use of specific forms and they show that journalists and writers attempted to attain professional and political goals using journalistic strategies. The essays collected in this volume offer a stimulating overview of a new field of study. They deepen our understanding of how journalism works.
