Haunted Indiana 4 Mark Marimen,2005-09 Haunted Indiana 4 delves once more into the eerie side of Indiana history with new and old tales from across the state: * The spirit of America's most prolific female serial killer who is said to haunt her former home in La Porte; * The ghost of a grave robber said to walk the paths of a cemetery in New Albany; * A ghost town near Nashville that truly lives up to the term Ghost Town; * The gentle story of a grandfather's spirit who made a phone call from beyond the grave to aid his granddaughter when she needed it most; * Tales of enigmatic spirits of former prisoners who are serving a more than life sentence at the Old Jail Museum in Valparaiso; * A series of ghostly tales told within the ranks of the police from across the state; and many more. . Also included in Haunted Indiana 4 is an audio CD narrated by Mark Marimen with four stories - including one never before published.

Natural Bioactive Products in Sustainable Agriculture Joginder Singh,Ajar Nath Yadav,2020-05-11 This book discusses various aspects of bioactive natural products employed in the agrochemical and agriculture sectors. It covers the use of plants, microorganisms, and microbial metabolites as eco-friendly, cost-effective, and sustainable alternatives to chemicals in the field of agriculture. Written by active researchers and

academics, the book highlights state-of-art products in the field, as well as the gaps, challenges, and obstacles associated with the use of plants, microbes and their products. Given its scope, it is a valuable resource for the scientific community and professionals in enterprises wanting insights into the latest developments and advances in the context of biological products, including their applications, traditional uses, modern practices, and strategies to harness their full potential.

Emerging Technologies in Distance Education George Veletsianos,2010 Highlighted are the pedagogical, organizational, cultural, social, and economic factors that influence the adoption and integration of emerging technologies in distance education. Advice is offered on how educators can launch effective and engaging distance education initiatives, in response to technological advancements, changing mindsets, and economic and organizational pressures.

Information and Communications for Development 2018 World Bank,2018-11-08
The Information and Communications for Development series looks in depth at how information and communications technologies are affecting economic growth in developing countries. This new report, the fourth in the series, examines the topic of data-driven development, or how better information makes for better policies. The objective is to assist developing-country firms and governments in unlocking the value of the data they

hold for better service delivery and decision making and to empower individuals to take more control of their personal data. We are undoubtedly experiencing a data revolution in which our ability to generate, process, and utilize information has been magnified many times over by the machines that we increasingly rely upon. This report is about how the data revolution is changing the behavior of governments, individuals, and firms and how these changes affect the nature of development: economic, social, and cultural. How can governments extract value from data to improve service delivery in the same way that private companies have learned to do for profit? Is it feasible for individuals to take ownership of their own data and to use it to improve their livelihoods and quality of life? Can developing-country firms compete with the internet majors on their own turf and be even more innovative in their use of data to serve local customers better? Though the report is aimed primarily at government policy makers, it also has great relevance for individuals concerned about how their personal data is used and how the data revolution might affect their future job prospects. For private sector firms, particularly those in developing countries, the report suggests how they might expand their markets and improve their competitive edge. For development professionals, the report provides guidance on how they might use data more creatively to tackle long-standing global challenges, such as eliminating extreme poverty, promoting shared prosperity, or mitigating the effects of climate change. The report's chapters explore different themes associated with the supply of data, the technology underlying it, and the demand for it. An overview chapter focuses on government use of data and presentation of definitions. Part I of the report then looks at the "supply side" of the data sector, with chapters on data

connectivity and capacity (where data comes from, how it is stored, and where it goes) and data technology (specifically big data analytics and artificial intelligence) and how this is contributing to development. Part II looks at the sector's "demand side," with a chapter on people's use of data and another that examines how firms use digital platforms in the data economy and how that contributes to competitiveness. Part III brings together the policy implications for developing-country stakeholders, with a chapter considering government policies for data, including data protection and privacy. A closing Data Notes appendix looks at statistical indicators associated with the use of data and presents the 2018 update of the Digital Adoption Index (DAI), a composite indicator introduced in the 2016 World Development Report: Digital Dividends.

Made in Russia Carlos Whitlock Porter, 2013-12-21 A stumbling block for Revisionists, just as it was for the post-war German defendants, is the seeming wealth of documents and testimony assembled by Allied prosecutors for the Nuremberg trials. The more than sixty volumes of trial material which appeared in the wake of the Trial of the Major War Criminals and twelve subsequent trials before the (American) Nuremberg Military Tribunal have for many years supplied a massive compilation of apparently damning evidence against Germany's National Socialist regime. Most Exterminationists, academic and lay, believe that Germany's aggression in beginning the war, and the numerous atrocities and war crimes laid to the German account, above all the alleged Holocaust of European Jewry, are amply documented in the so-called Nuremberg record.

Percutaneous Image-Guided Biopsy Kamran Ahrar, Sanjay Gupta, 2013-10-22 This book provides a comprehensive source for all aspects of percutaneous image-guided biopsy. A

synthesis of rationale, technique and evidence-based medicine, it offers a clear approach to imaging, devices, procedures and patient care. Replete with case studies, radiological images, illustrative diagrams and tables, this valuable reference is an indispensable addition to the bookshelves of all radiologists in training as well as practicing radiologists who would like to expand their biopsy service and refine their skills. The easy to follow format, organization and graphic presentations create a high-yield approach to practical information such as indications, technical considerations, anatomical considerations, outcomes and complications. This timely compendium is a necessity in this rapidly progressing field.

Handbook of Energy Audits Albert Thumann, William J. Younger, 2003 Now there is a comprehensive reference to provide tools on implementing an energy audit for any type of facility. Containing forms, checklists and handy working aids, this book is for anyone implementing an energy audit. Accounting procedures, rate of return, analysis and software programs are included to provide evaluation tools for audit recommendations. Technologies for electrical, mechanical and building systems are covered in detail.

Garden Revolution Larry Weaner, Thomas Christopher, 2016-05-18 AHS Book Award winner This lushly-photographed reference is an important moment in horticulture that will be embraced by anyone looking for a better, smarter way to garden. Larry Weaner is an icon in the world of ecological landscape design, and now his revolutionary approach is available to all gardeners. Garden Revolution shows how an ecological approach to planting can lead to beautiful gardens that buck much of conventional gardening's counter-productive, time-consuming practices. Instead of picking the wrong plant and

then constantly tilling, weeding, irrigating, and fertilizing, Weaner advocates for choosing plants that are adapted to the soil and climate of a specific site and letting them naturally evolve over time. Allowing the plants to find their own niches, to spread their seed around until they find the microclimate and spot that suits them best, creates a landscape that is vibrant, dynamic, and gorgeous year after year.

The Complete Commodore Inner Space Anthology Hildon, Karl J. H, 1985

Building Old Cambridge Susan E. Maycock, Charles M. Sullivan, 2016-11-04 An extensively illustrated, comprehensive exploration of the architecture and development of Old Cambridge from colonial settlement to bustling intersection of town and gown. Old Cambridge is the traditional name of the once-isolated community that grew up around the early settlement of Newtowne, which served briefly as the capital of the Massachusetts Bay Colony and then became the site of Harvard College. This abundantly illustrated volume from the Cambridge Historical Commission traces the development of the neighborhood as it became a suburban community and bustling intersection of town and gown. Based on the city's comprehensive architectural inventory and drawing extensively on primary sources, *Building Old Cambridge* considers how the social, economic, and political history of Old Cambridge influenced its architecture and urban development. Old Cambridge was famously home to such figures as the proscribed Tories William Brattle and John Vassall; authors Henry Wadsworth Longfellow and William Dean Howells; publishers Charles C. Little, James Brown, and Henry O. Houghton; developer Gardiner Greene Hubbard, a founder of Bell Telephone; and Charles Eliot, the landscape architect. Throughout its history, Old Cambridge property owners have engaged some of

the country's most talented architects, including Peter Harrison, H. H. Richardson, Eleanor Raymond, Carl Koch, and Benjamin Thompson. The authors explore Old Cambridge's architecture and development in the context of its social and economic history; the development of Harvard Square as a commercial center and regional mass transit hub; the creation of parks and open spaces designed by Charles Eliot and the Olmsted Brothers; and the formation of a thriving nineteenth-century community of booksellers, authors, printers, and publishers that made Cambridge a national center of the book industry. Finally, they examine Harvard's relationship with Cambridge and the community's often impassioned response to the expansive policies of successive Harvard administrations.

Handbook of Mobile Learning Zane L. Berge, Lin Muilenburg, 2013-06-19 Winner of the AECT Division of Distance Learning (DDL) Distance Education Book Award! This handbook provides a comprehensive compendium of research in all aspects of mobile learning, one of the most significant ongoing global developments in the entire field of education. Rather than focus on specific technologies, expert authors discuss how best to utilize technology in the service of improving teaching and learning. For more than a decade, researchers and practitioners have been exploring this area of study as the growing popularity of smartphones, tablets, and other such devices, as well as the increasingly sophisticated applications for these devices, has allowed educators to accommodate and support an increasingly mobile society. This handbook provides the first authoritative account of the theory and research that underlies mobile learning, while also exemplifying models of current and future practice.
