The Science of Clays Swapna Mukherjee, 2013-10-09 This book is an attempt to provide a comprehensive and coherent description of three widely separated aspects of clays: the science of clays; the industrial uses of clays; and the role of clays in the environment. Most of the existing literature lacks such an integrated study and this work endeavours to fill that gap. An exhaustive account of the science of clays is presented in Part I of the book, which includes the classification, origin and evolution, composition and internal structure, chemical and physical properties of clays; soil mechanics; and analytical techniques for determining clay constituents. Part II provides a comprehensive description of the applications of clays and their derivatives in various industries, while Part III describes the role of clays in the environment; the pollution caused by clay minerals; and the application of clays in order to prevent environmental hazards. A principal feature of the book is its explanation of how the structure and composition of particular clay types facilitate their specific industrial or environmental applications, thus describing the interrelationship between three widely varying aspects of clay. A number of thought-provoking questions are raised at the end of the work in order to leave readers with a better insight in this regard.

The Routledge Companion to Remix Studies Eduardo Navas, Owen Gallagher, xtine burrough, 2014-11-27 The Routledge Companion to Remix Studies comprises contemporary texts by key authors and artists who are active in the emerging field of remix studies. As an organic international movement, remix culture originated in the popular music culture of the 1970s, and has since grown into a rich cultural activity encompassing numerous forms of media. The act of recombining pre-existing material brings up pressing questions of authenticity, reception, authorship, copyright, and the techno-politics of media activism.

This book approaches remix studies from various angles, including sections on history, aesthetics, ethics, politics, and practice, and presents theoretical chapters alongside case studies of remix projects. The Routledge Companion to Remix Studies is a valuable resource for both researchers and remix practitioners, as well as a teaching tool for instructors using remix practices in the classroom.

Preservation in Digital Cartography Markus Jobst, 2010-09-17 This book "Preservation in Digital Cartography: Archiving Aspects" should give an overview on how to preserve digital cartographic applications and geospatial data in a sustainable way. The intention of this book is to shape the opinion of affected parties and to bring together various disciplines. Therefore adjacent chapters will generally deal with information technologies, Service-Oriented Architectures, cybercartography, reproduction and historic cartography, which all together can be subsumed in perspective cartographic heritage. The survival of this digital cartographic heritage will base on long-term preservation strategies that make use of intensive dissemination on the one hand and sustainable digital archiving methods on the other. This includes a massive development of paradigm that expands from "store-and-save" to "keep-it-online". The paradigm "store-and-save" is mainly used for

analogue masters that consist of st- age media, like vellum, and their visible content. Avoiding the storage - dia from degeneration in climate-controlled areas will help to keep the content accessible. In the digital domain the high interdependency of st- age media, format, device and applications leads to the paradigm “keep-- online” which for example describes the migration to new storage devices. In fact this expansion of paradigm means that the digital domain calls for ongoing actions in order to preserve cartography for a long term.

Film and the Chinese Medical Humanities Vivienne Lo,Chris Berry,Guo

Liping,2019-12-06 *Film and the Chinese Medical Humanities* is the first book to reflect on the power of film in representing medical and health discourse in China in both the past and the present, as well as in shaping its future. Drawing on both feature and documentary films from mainland China, the chapters each engage with the field of medicine through the visual arts. They cover themes such as the history of doctors and their concepts of disease and therapies, understanding the patient experience of illness and death, and establishing empathy and compassion in medical practice, as well as the HIV/AIDs epidemic during the 1980s and 90s and changing attitudes towards disability. Inherently interdisciplinary in nature, the contributors therefore provide different perspectives from the fields of history, psychiatry, film studies, anthropology, linguistics, public health and occupational therapy, as they relate to China and people who identify as Chinese. Their combined approaches are united by a passion for improving the cross-cultural understanding of the body and ultimately healthcare itself. A key resource for educators in the Medical Humanities, this book will be useful to students and scholars of Chinese Studies and Film Studies as well as

global health, medical anthropology and medical history.

The Shriver Report Maria Shriver, The Center for American Progress, 2014-01-11 Facts, figures, and essays on women and poverty by Barbara Ehrenreich, Kirsten Gillibrand, LeBron James, and other high-profile contributors. Fifty years after President Lyndon B. Johnson called for a War on Poverty and enlisted Sargent Shriver to oversee it, the most important social issue of our day is once again the dire economic straits of millions of Americans. One in three live in poverty or teeter on the brink—and seventy million are women and the children who depend on them. The fragile economic status of millions of American women is the shameful secret of the modern era—yet these women are also our greatest hope for change, and our nation’s greatest undervalued asset. The Shriver Report: A Woman’s Nation Pushes Back from the Brink asks—and answers—big questions. Why are millions of women financially vulnerable when others have made such great progress? Why are millions of women struggling to make ends meet even though they are hard at work? What is it about our nation—government, business, family, and even women themselves—that drives women to the financial brink? And what is at stake? To forge a path forward, this book brings together a power-packed roster of big thinkers and talented contributors, in a volume that combines academic research, personal reflections, authentic photojournalism, groundbreaking poll results, and insights from frontline workers; political, religious, and business leaders; and major celebrities—all focused on a single issue of national importance: women and the economy. “A startling wake-up call for policymakers and anyone hoping to survive a culture that siphons wealth upward to a very powerful few.” —Booklist Contributors include: Carol Gilligan, PhD * Barbara Ehrenreich * Beyoncé

Knowles-Carter * LeBron James * Anne-Marie Slaughter * Kirsten Gillibrand * Hillary Rodham Clinton * Tory Burch * Sister Joan Chittister * Arne Duncan * Kathleen Sibelius * Howard Schultz * and more!

Not another one-size-fits-all marketing toolkit, *The Marketing Pathfinder* functions as a dynamic, interactive resource Each chapter presents a set of core concepts, frameworks, and tools, followed by five or more short, lively international case studies illustrating how the concepts and tools can be applied in the real world The case studies are specifically designed to encourage readers to pursue additional independent research and to encourage them to articulate and defend their decisions Throughout, the emphasis is on the reader as a marketing professional in the thick of it and responsible for the decisions they make

Work-Related Musculoskeletal Disorders Steering Committee for the Workshop on Work-Related Musculoskeletal Injuries: The Research Base, Committee on Human Factors, Board on Human-Systems Integration, Division of Behavioral and Social Sciences and Education, National Research Council, 1998-10-29 In May 1998 the National Institutes of Health asked the National Academy of Sciences/National Research Council to assemble a group of experts to examine the scientific literature relevant to work-related musculoskeletal disorders of the lower back, neck, and upper extremities. A steering committee was convened to design a workshop, to identify leading researchers on the topic to participate, and to prepare a report based on the workshop discussions and their own expertise. In addition, the steering committee was asked to address, to the extent possible, a set of seven questions posed by Congressman Robert Livingston on the topic of work-related musculoskeletal disorders. The steering committee includes experts in orthopedic surgery, occupational medicine, epidemiology, ergonomics, human factors, statistics, and risk analysis. This document is based on the evidence presented and discussed at the two-day Workshop on Work-Related Musculoskeletal Injuries: Examining the Research Base, which was held on August 21 and 22, 1998, and on follow-up deliberations of the steering committee, reflecting its own expertise.

Iranians in Texas Mohsen M. Mobasher, 2012-04-01 Thousands of Iranians fled their homeland when the 1978–1979 revolution ended the fifty-year reign of the Pahlavi Dynasty. Some fled to Europe and Canada, while others settled in the United States, where anti-

Iranian sentiment flared as the hostage crisis unfolded. For those who chose America, Texas became the fourth-largest settlement area, ultimately proving to be a place of paradox for any Middle Easterner in exile. Iranians in Texas culls data, interviews, and participant observations in Iranian communities in Houston, Dallas, and Austin to reveal the difficult, private world of cultural pride, religious experience, marginality, culture clashes, and other aspects of the lives of these immigrants. Examining the political nature of immigration and how the originating and receiving countries shape the prospects of integration, Mohsen Mobasher incorporates his own experience as a Texas scholar born in Iran. Tracing current anti-Muslim sentiment to the Iranian hostage crisis, two decades before 9/11, he observes a radically negative shift in American public opinion that forced thousands of Iranians in the United States to suddenly be subjected to stigmatization and viewed as enemies. The book also sheds light on the transformation of the Iranian family in exile and some of the major challenges that second-generation Iranians face in their interactions with their parents. Bringing to life a unique population in the context of global politics, *Iranians in Texas* overturns stereotypes while echoing diverse voices.
