Treetops at Risk Margaret Lowman, Soubadra Devy, T. Ganesh, 2013-06-22 Forest canopies not only support high terrestrial biodiversity but also represent a critical interface between the atmosphere and the earth. They provide goods and services to support diverse human communities and offer opportunities to explore sustainable use of these resources for many generations of local livelihoods. Forest canopies are important carbon sequestration units, and in this sense, serve as climate control for the planet. Canopies are important energy production centers for the planet, and serve as the basis for many food chains. The canopy can also act as a hook for education outreach and conservation, inspiring ecotourism through recreation and other sustainable uses such as treetop walks, zip lines, and birding. Despite these critical services provided by forest canopies, almost no dedicated research in the treetops was initiated until as recently as the late 1970s when single rope techniques were developed by mountaineering professionals and adapted for use in the canopy. Subsequently, an array of canopy access tools was designed in the 1980s and early 1990s that have opened up this “eighth continent” for global exploration and discovery. This

volume uses the major findings of the 5th international canopy conference as a platform for organization, but it does not mimic the sessions and presentations of the conference itself. Instead, it builds on the important themes that emerged from the conference and solicits articles that represent future priorities and advancements for canopy science in the next decade. Despite the global efforts of hundreds of forest scientists over the past 3 decades, forests are degrading at an accelerated rate and biodiversity is increasingly threatened by human activities. Given these trends - despite the very best efforts of the world's best scientists - other approaches must be taken. This volume summarizes the issue of "treetops at risk" and assembles a global authorship to examine past accomplishments and future initiatives critical in forest conservation.

The Insubordinate and the Noncompliant Howard Coombs, 2008-03-28 *The Unwilling and the Reluctant: Theoretical Perspectives on Disobedience in the Military and The Apathetic and the Defiant: Case Studies of Canadian Mutiny and Disobedience, 1812-1919* are the first two volumes in a series devoted to disobedience issues in the Canadian military. Now with *The Insubordinate and the Noncompliant*, the trilogy is complete. Military leadership has both formal and informal dimensions. The formal leadership of any organization must ensure that it minimizes the divergence between institutional aims and the actions of informal leaders. When this separation occurs, the result is sometimes mutiny. These incidents of insubordination and noncompliance represent a form of dialogue between military personnel and their leadership. *The Insubordinate and the Noncompliant* offers a perspective on the Canadian experience with military mutiny in the twentieth century in an effort to provide relevant lessons for today.

Understanding Military Culture Allan Douglas English,2004 Examines military culture from a theoretical and a practical point of view Considers conflicts in Afghanistan and Iraq that have highlighted the importance of culture as a concept in analyzing the ability of military organizations to perform certain tasks Culture has been described as the bedrock of military effectiveness because it influences everything an armed service does. The recent conflicts in Afghanistan and Iraq have highlighted the importance of culture as a concept in analyzing the ability of military organizations to perform certain tasks. In fact, a military's culture may determine its preferred way of fighting and dealing with other challenges, like incorporating new technologies, more than its doctrine or organizational structure. of view. It focuses on the Canadian and American military cultures, and it provides the first detailed examination of the culture of the Canadian Forces. It also compares their culture to that of the US armed forces. The book concludes that while the culture of the Canadian Forces has been Americanized to a certain extent, the culture of the US armed forces, due to changes in their personnel and roles, has experienced a certain degree of Canadianization at the end of the 20th and the beginning of the 21st centuries.

A Military History of Canada Desmond Morton,1992 Is Canada really a peaceable kingdom with an unmilitary people? Desmond Morton says no. This is a country that has been shaped, divided, and transformed by war - there is no greater influence in Canadian history, recent or remote. Through the Cold War, the Gulf War, and after, Canadians had to make difficult decisions about defence and foreign policy, and these events have shaped the country, developing our industries, changing the role of women, realigning our political factions, and changing Canada's status in the world.
