Teaching History in the Digital Age T. Mills Kelly, 2013-04-12 A practical guide on how one professor employs the transformative changes of digital media in the research, writing, and teaching of history

Rethinking Education Across Borders Uttam Gaulee, Shyam Sharma, Krishna Bista, 2020-02-14 This book focuses on critical issues and perspectives concerning globally mobile students, aspects that have grown in importance thanks to major geopolitical, economic, and technological changes around the globe (i.e., in and across major origins and destinations of international students). Over the past few decades, the field of international higher education and scholarship has developed robust areas of research that guide current policy, programs, and pedagogy. However, many of the established narratives and wisdoms that dominate research agendas, scope, and foci have become somewhat ossified and are unable to reflect recent political upheavals and other changes (e.g. the Brexit, Trump era, and Belt and Road Initiative) that have disrupted a number of areas including mobility patterns and recruitment practices, understanding and supporting students, engagement of global mobile students with their local counterparts, and the political economy of international education at large. By re-assessing established issues and perspectives in light of the emerging global/local situations, the contributing authors – all experts on international education – share insights on policies and practices that can help adapt to emerging challenges and opportunities for institutions, scholars, and other stakeholders in international higher education. Including theoretical, empirical, and practitioner-based methods and perspectives provided by scholars from around the world, the book offers a unique and intriguing resource.

You Shook Me All Campaign Long Eric T. Kasper, Benjamin S. Schoening, 2018-11-15 Music has long played a role in American presidential campaigns as a mode of both expressing candidates' messages and criticizing the opposition. The relevance of music in the 2016 campaign for the White House took various forms in a range of American media: a significant amount of popular music was used by campaigns, many artist endorsements were sought by candidates, ever changing songs were employed at rallies, instances of musicians threatening legal action against candidates burgeoned, and artists and others increasingly used music as a form of political protest before and after Election Day. The 2016 campaign was a game changer, similar to the development of music in the 1840 campaign, when "Tippecanoe and Tyler Too" helped sing William Harrison into the White House. The ten chapters in this collection place music use in 2016 in historical perspective before examining musical messaging, strategy, and parody. The book ultimately explores causality: how do music and musicians affect presidential elections, and how do politicians and campaigns affect music and musicians? The authors explain this interaction from various perspectives, with methodological approaches from several fields, including political science, legal studies, musicology, cultural studies, rhetorical studies, and communications and journalism. These chapters will help the reader understand music in the 2016 election to realize how music will be relevant in 2020 and beyond.

What's So Good About Biodiversity? Donald S. Maier, 2012-05-23 There has been a deluge of material on biodiversity, starting from a trickle back in the mid-1980's. However, this book is entirely unique in its treatment of the topic. It is unique in its meticulously crafted, scientifically informed, philosophical examination of the norms and values that are at the heart of discussions about biodiversity. And it is unique in its point of view, which is the first to comprehensively challenge prevailing views about biodiversity and its value. According to those dominant views, biodiversity is an extremely good thing – so good that it has become the emblem of natural value. The book's broader purpose is to use biodiversity as a lens through which to view the nature of natural value. It first examines, on their own terms, the arguments for why biodiversity is supposed to be a good thing. This discussion cuts a very broad and detailed swath through the scientific, economic, and environmental literature. It finds all these arguments to be seriously wanting. Worse, these arguments appear to have consequences that should dismay and perplex most environmentalists. The book then turns to a deeper analysis of these failures and suggests that they result from posing value questions from within a framework that is inappropriate for nature's value. It concludes with a novel suggestion for framing natural value. This new proposal avoids the pitfalls of the ones that prevail in the promotion of biodiversity. And it exposes the goals of conservation biology, restoration biology, and the world's largest conservation organizations as badly ill-conceived.

Pastplay Kevin Kee, 2014-03-10 In the field of history, the Web and other technologies have become important tools in research and teaching of the past. Yet the use of these tools is limited—many historians and history educators have resisted adopting them because they fail to see how digital tools supplement and even improve upon conventional tools (such as books). In Pastplay, a collection of essays by leading history and humanities researchers and teachers, editor Kevin Kee works to address these concerns head-on. How should we use technology? Playfully, Kee contends. Why? Because doing so helps us think about the past in new ways; through the act of creating technologies, our understanding of the past is re-imagined and developed. From the insights of numerous scholars and teachers, Pastplay argues that we should play with technology in history because doing so enables us to see the past in new ways by helping us understand how history is created; honoring the roots of research, teaching, and technology development; requiring us to model our thoughts; and then allowing us to build our own understanding.

Rigged Dean Baker, 2016-10-06 There has been an enormous upward redistribution of income in the United States in the last four decades. In his most recent book, Baker shows that this upward redistribution was not the result of globalization and the natural workings of the market. Rather, it was the result of conscious policies that were designed to put downward pressure on the wages of ordinary workers while protecting and enhancing the incomes of those at the top. Baker explains how rules on trade, patents, copyrights, corporate governance, and macroeconomic policy were rigged to make income flow upward.

Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a cannery factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. *The Son of the Wolf* (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, *The Call of the Wild* (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including *The Sea-Wolf* (1904), *White Fang* (1906), *South Sea Tales* (1911), and *Jerry of the South Seas* (1917). One of London's most interesting novels is the semi-autobiographical *Martin Eden* (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Technology and the Historian Adam Crymble, 2021-04-13 Charting the evolution of practicing digital history Historians have seen their field transformed by the digital age. Research agendas, teaching and learning, scholarly communication, the nature of the archive—all have undergone a sea change that in and of itself constitutes a fascinating digital history. Yet technology's role in the field's development remains a glaring blind spot among digital scholars. Adam Crymble mines private and web archives, social media, and oral histories to show how technology and historians have come together. Using case studies, Crymble merges histories and philosophies of the field, separating issues relevant to historians from activities in the broader digital humanities movement. Key themes include the origin myths of digital historical research; a history of mass digitization of sources; how technology influenced changes in the curriculum; a portrait of the self-learning system that trains historians and the problems with that system; how blogs became a part of outreach and academic writing; and a roadmap for the continuing study of history in the digital era.

Writing History in the Digital Age Jack Dougherty, Kristen Nawrotzki, 2013-10-28 Writing History in the Digital Age began as a “what-if” experiment by posing a question: How have Internet technologies influenced how historians think, teach, author, and publish? To illustrate their answer, the contributors agreed to share the stages of their book-in-progress as it was constructed on the public web. To facilitate this innovative volume, editors Jack Dougherty and Kristen Nawrotzki designed a born-digital, open-access, and open peer review process to capture commentary from appointed experts and general readers. A customized WordPress plug-in allowed audiences to add page- and paragraph-level comments to the manuscript, transforming it into a socially networked text. The initial six-week proposal phase generated over 250 comments, and the subsequent eight-week public review of full drafts drew 942 additional comments from readers across different parts of the globe. The finished product now presents 20 essays from a wide array of notable scholars, each examining (and then breaking apart and reexamining) if and how digital and emergent technologies have changed the historical profession.

The Routledge Handbook of Smuggling Max Gallien, Florian Weigand, 2021-12-21 The Routledge Handbook of Smuggling offers a comprehensive survey of interdisciplinary research related to smuggling, reflecting on key themes, and charting current and future trends. Divided into six parts and spanning over 30 chapters, the volume covers themes such as mobility, borders, violent conflict, and state politics, as well as looks at the smuggling of specific goods – from rice and gasoline to wildlife, weapons, and cocaine. Chapters engage with some of the most contentious academic and policy debates of the twenty-first century, including the historical creation of borders, re-bordering, the criminalisation of migration, and the politics of selective

toleration of smuggling. As it maps a field that contains unique methodological, ethical, and risk-related challenges, the book takes stock not only of the state of our shared knowledge, but also reflects on how this has been produced, pointing to blind spots and providing an informed vision of the future of the field. Bringing together established and emerging scholars from around the world, *The Routledge Handbook of Smuggling* is an indispensable resource for students and researchers of conflict studies, borderland studies, criminology, political science, global development, anthropology, sociology, and geography.

Hacking the Academy Daniel J. Cohen, Joseph Thomas Scheinfeldt, 2013-05-13 On May 21, 2010, Daniel J. Cohen and Tom Scheinfeldt posted the following provocative questions online: "Can an algorithm edit a journal? Can a library exist without books? Can students build and manage their own learning management platforms? Can a conference be held without a program? Can Twitter replace a scholarly society?" As recently as the mid-2000s, questions like these would have been unthinkable. But today serious scholars are asking whether the institutions of the academy as they have existed for decades, even centuries, aren't becoming obsolete. Every aspect of scholarly infrastructure is being questioned, and even more importantly, being hacked. Sympathetic scholars of traditionally disparate disciplines are canceling their association memberships and building their own networks on Facebook and Twitter. Journals are being compiled automatically from self-published blog posts. Newly minted PhDs are forgoing the tenure track for alternative academic careers that blur the lines between research, teaching, and service. Graduate students are looking beyond the categories of the traditional CV and building expansive professional identities and popular followings through social media. Educational technologists are "punking" established technology vendors by rolling out their own open source infrastructure. Here, in *Hacking the Academy*, Daniel J. Cohen and Tom Scheinfeldt have gathered a sampling of the answers to their initial questions from scores of engaged academics who care deeply about higher education. These are the responses from a wide array of scholars, presenting their thoughts and approaches with a vibrant intensity, as they explore and contribute to ongoing efforts to rebuild scholarly infrastructure for a new millennium.

The Films of Edgar G. Ulmer Bernd Herzogenrath, 2009-05-20 Considered the 'King of Poverty Row,' Edgar G. Ulmer (1904-1972) was an auteur of B productions. A filmmaker with an individual voice, Ulmer made independent movies before that category even existed. From his early productions like *The Black Cat* (1934) and Yiddish cinema of the late 1930s to his final films of the late 1950s and early 1960s, Ulmer created enduring works within the confines of economic constraints. Almost forgotten, Ulmer was rediscovered first in the 1950s by the French critics of the *Cahiers du Cinema* and then in the early 1970s by young American directors, notably Peter Bogdanovich. But who was Edgar G. Ulmer? The essays in this anthology attempt to shed some light on the director and the films he created—films that are great possibly because of, rather than despite, the many restrictions Ulmer endured to make them. In *The Films of Edgar G. Ulmer*, Bernd Herzogenrath has assembled a collection of essays that pay tribute to Ulmer's work and focus not only on his well-known films, including *Detour*, but also on rare gems such as *From Nine to Nine* and *Strange Illusion*. In addition to in-depth analyses of Ulmer's work, this volume also features an interview with Ulmer's wife and an interview Ulmer gave in 1965, in which he comments on actors Bela Lugosi and Boris Karloff, as well as fellow directors Tod Browning and James Whale.

The Film Handbook Geoff Andrew, 1990 The Film Handbook examines the current status of filmmaking, how film is produced and distributed and its relation with today's digital and web-based climate.

Manifesto for the Humanities Sidonie Ann Smith, 2015-11-25 After a remarkable career in higher education, Sidonie Smith offers *Manifesto for the Humanities* as a reflective contribution to the current academic conversation over the place of the Humanities in the 21st century. Her focus is on doctoral education and opportunities she sees for its reform. Grounding this manifesto in background factors contributing to current "crises" in the

humanities, Smith advocates for a 21st century doctoral education responsive to the changing ecology of humanistic scholarship and teaching. She elaborates a more expansive conceptualization of coursework and dissertation, a more robust, engaged public humanities, and a more diverse, collaborative, and networked sociality.
