This book can be used for introductory undergraduate computer graphics courses over one to two semesters. The careful exposition style attempting to explain each concept in the simplest terms possible should appeal to the self-study student as well.

Camera Todd Gustavson, 2009 Few inventions have had as powerful an influence as the camera, and few modes of expression have enjoyed the enduring artistic, scientific, and popular appeal of photography. We are so focused on the products of the camera, the indelible images marking our lives and times, that it's easy to forget the instrument itself has a history. Now that history has been comprehensively traced for photography buffs and amateurs alike by Todd Gustavson, Curator of Technology at George Eastman House. In this ... volume, hundreds of new and archival images from George Eastman House bring the story to life and provide an unmatched reference source. Vast in its scope, this ... book is an in-depth visual and narrative look at the camera, and consequently

Disclosure Dilemmas Hansjakob Müller,2017-03-02 There exists today a fast growing availability of personal genetic information. Its prognostic impact and value for an individual or family member's health is sometimes unclear, whilst at other times it is clear-cut. The issue of whether to disclose genetic information does however have wide ranging implications. Avoiding the rhetoric of 'genetic exceptionalism', and drawing on an expanded field of bioethical, sociological and anthropological research, this book sets a new agenda for discussing the ethics surrounding the disclosure of prognostic genetic information. A hermeneutical approach reconsiders the ethics of disclosure in a variety of contexts in which genetic information is generated, requested, interpreted or communicated - from the provider perspective, but also from the moral perspectives of clients and their families. It is in situations of disclosure, in these different contexts, that genetic information meets morality. Providers and recipients can become vulnerable to the revelation or concealment of information, and the forms in which it may be provided. **Disclosure Dilemmas** invites readers to explore these contexts from an ethical viewpoint and will be a

valuable resource for anyone with an interest in biomedical ethics.

Transformations of Late Antiquity Manolis

Papoutsakis,2016-12-05 This book focuses on a simple dynamic: the taking in hand of a heritage, the variety of changes induced within it, and the handing on of that legacy to new generations. Our contributors suggest, from different standpoints, that this dynamic represented the essence of 'late antiquity'. As Roman society, and the societies by which it was immediately bounded, continued to develop, through to the late sixth and early seventh centuries, the interplay between what needed to be treasured and what needed to be explored became increasingly self-conscious, versatile, and enriched. By the time formerly alien peoples had established their 'post-classical' polities, and Islam began to stir in the East, the novelties were more clearly seen, if not always welcomed; and one witnesses a stronger will to maintain the momentum of change, of a forward reach. At the same time, those in a position to play now the role of heirs were well able to appreciate how suited to their needs the 'Roman' past might be, but how, by taking it up in their turn, they were more securely defined and yet more creatively advantaged. 'Transformation' is a notion apposite to essays in honour of Peter Brown. 'The transformation of the classical

heritage' is a theme to which he has devoted, and continues to devote, much energy. All the essays here in some way explore this notion of transformation; the late antique ability to turn the past to new uses, and to set its wealth of principle and insight to work in new settings. To begin, there is the very notion of what it meant to be 'Roman', and how that notion changed. Subsequent chapters suggest ways in which fundamental characteristics of Roman society were given new form, not least under the impact of a Christian polity. Augustine, naturally, finds his place; and here the emphasis is on the unfettered stance that he took in the face of more broadly held convictions - on miracles, for example, and the errors of the pagan past. The discussion then moves on to
