Law and Macroeconomics Yair Listokin,2019-03-11 After 2008, private-sector spending took a decade to recover. Yair Listokin thinks we can respond more quickly to the next meltdown by reviving and refashioning a policy approach, used in the New Deal, to harness law's ability to function as a macroeconomic tool, stimulating or relieving demand as required under certain crisis conditions.

Fostering freedom online: the role of Internet intermediaries MacKinnon, Rebecca,Hickok, Elonnai,Bar, Allon,Lim, Hae-in,2015-01-29 Internet intermediaries play a unique role in linking authors of content and audiences. They may either protect or jeopardize end user rights to free expression, given their role in capturing, storing, searching, sharing, transferring and processing large amount of information, data and user-generated content. This research aims to identify principles for good practices and processes that are consistent with international standards for free expression that Internet intermediaries may follow in order to protect the human rights of end users online.

Gandhi & Churchill Arthur Herman,2008-04-29 In this fascinating and meticulously researched

book, bestselling historian Arthur Herman sheds new light on two of the most universally recognizable icons of the twentieth century, and reveals how their forty-year rivalry sealed the fate of India and the British Empire. They were born worlds apart: Winston Churchill to Britain's most glamorous aristocratic family, Mohandas Gandhi to a pious middle-class household in a provincial town in India. Yet Arthur Herman reveals how their lives and careers became intertwined as the twentieth century unfolded. Both men would go on to lead their nations through harrowing trials and two world wars—and become locked in a fierce contest of wills that would decide the fate of countries, continents, and ultimately an empire. *Gandhi & Churchill* reveals how both men were more alike than different, and yet became bitter enemies over the future of India, a land of 250 million people with 147 languages and dialects and 15 distinct religions—the jewel in the crown of Britain's overseas empire for 200 years. Over the course of a long career, Churchill would do whatever was necessary to ensure that India remain British—including a fateful redrawing of the entire map of the Middle East and even risking his alliance with the United States during World War Two. Mohandas Gandhi, by contrast, would dedicate his life to India's liberation, defy death and imprisonment, and create an entirely new kind of political movement: satyagraha, or civil disobedience. His campaigns of nonviolence in defiance of Churchill and the British, including his famous Salt March, would become the blueprint not only for the independence of India but for the civil rights movement in the U.S. and struggles for freedom across the world. Now master storyteller Arthur Herman cuts through the legends and myths about these two powerful, charismatic figures and reveals their flaws as well as their strengths. The result is a sweeping epic of empire and insurrection, war and political intrigue, with a fascinating supporting cast, including General Kitchener, Rabindranath Tagore, Franklin Roosevelt, Lord Mountbatten, and Mohammed Ali Jinnah,

the founder of Pakistan. It is also a brilliant narrative parable of two men whose great successes were always haunted by personal failure, and whose final moments of triumph were overshadowed by the loss of what they held most dear.

Missional Church Darrell L. Guder, Lois Barrett, 1998-02-09 What would a theology of the Church look like that took seriously the fact that North America is now itself a mission field? This question lies at the foundation of this volume written by an ecumenical team of six noted missiologists—Lois Barrett, Inagrace T. Dietterich, Darrell L. Guder, George R. Hunsberger, Alan J. Roxburgh, and Craig Van Gelder. The result of a three-year research project undertaken by The Gospel and Our Culture Network, this book issues a firm challenge for the church to recover its missional call right here in North America, while also offering the tools to help it do so. The authors examine North America's secular culture and the church's loss of dominance in today's society. They then present a biblically based theology that takes seriously the church's missional vocation and draw out the consequences of this theology for the structure and institutions of the church.

A Brutal Unity Ephraim Radner, 2012 To describe the Church as united is a factual misnomer—even at its conception centuries ago. Ephraim Radner provides a robust rethinking of the doctrine of the church in light of Christianity's often violent and at times morally suspect history. He holds in tension the strange and transcendent oneness of God with the necessarily temporal and political

function of the Church, and, in so doing, shows how the goals and failures of the liberal democratic state provide revelatory experiences that greatly enhance one's understanding of the nature of Christian unity.

Armed Robotic Systems Emergence Robert J. Bunker, 2017-11-18 Armed robotic systems-drones and droids-now emerging on the battlefield portend new strategic realities not only for U.S. forces but also for our allies and future potential belligerents. Numerous questions of immediate warfighting importance come to mind with the fielding of these drones and droids that are viewed as still being in their experimental and entrepreneurial stage of development. By drawing upon historical weapons systems life cycles case studies, focusing on the early 9th through the mid-16th-century knight, the mid-19th through the later 20th-century battleship, and the early 20th through the early 21st-century tank, the monograph provides military historical context related to their emergence, and better allows both for questions related to warfighting to be addressed, and policy recommendations related to them to be initially provided.

Credit Growth and Economic Recovery in Europe After the Global Financial Crisis Sergei Antoshin, Mr. Marco Arena, Nikolay Gueorguiev, Mr. Tonny Lybek, Mr. John Ralyea, Mr. Etienne B Yehoue, 2017-11-17 This paper reviews the empirical relationships between credit growth, economic recovery, and bank profitability in Europe after the global financial crisis (GFC). We find that the post-GFC recoveries in Europe have been weaker than previous recoveries, with the “double-dip” recessions in 2011-12 in many countries and the worldwide reach of the GFC explaining the underperformance. Bank lending has been subdued as well, but this appears to have only held back the recovery relatively moderately. A 10 percent increase in bank credit to the private sector is associated with a rise of 0.6-1 percent in real GDP and 2-2 1/2 percent in real private investment.

These relationships have not changed significantly during and after the GFC. Loan quality, customer deposits, bank equity price index, and bank capital appear to be closely linked to bank lending. As expected, bank profitability is positively and significantly influenced by credit growth, but this relationship has weakened after the GFC.

International Human Rights Law in a Global Context Felipe Gómez Isa, Koen de Feyter, 2009-01-01 The international human rights system remains as dynamic as ever. If at the end of the last century there was a sense that the normative and institutional development of the system had been completed and that the emphasis should shift to issues of implementation, nothing of the sort occurred. Even over the last few years significant changes happened, as this book amply demonstrates. We hope that this Manual makes a contribution to the development of International Human Rights Law and is of interest for those working in the field of promotion and protection of human rights. The book is the result of a joint project under the auspices of HumanitarianNet, a Thematic Network led by the University of Deusto, and the European Inter-University Centre for Human Rights and Democratisation (EIUC, Venice).
