Bio-Inspired Innovation and National Security National Defense University,2010-10 Despite the vital importance of the emerging area of biotechnology and its role in defense planning and policymaking, no definitive book has been written on the topic for the defense policymaker, the military student, and the private-sector bioscientist interested in the emerging opportunities market of national security. This edited volume is intended to help close this gap and provide the necessary backdrop for thinking strategically about biology in defense planning and policymaking. This volume is about applications of the biological sciences, here called biologically inspired innovations, to the military. Rather than treating biology as a series of threats to be dealt with, such innovations generally approach the biological sciences as a set of opportunities for the military to gain strategic advantage

over adversaries. These opportunities range from looking at everything from genes to brains, from enhancing human performance to creating renewable energy, from sensing the environment around us to harnessing its power.

Lake Victoria Joseph L. Awange, Obiero Ong'ang'a, 2006-08-18 This book constitutes a pioneering and unique work on Lake Victoria. It is the world's second largest fresh-water lake and supports the livelihood of more than 30 million people. Surprisingly, there has been no comprehensive book addressing its problems and potentials. Ecology, environmental pollution and resource management are some of the issues addressed by this comprehensive insight into the limitations, challenges and opportunities facing Lake Victoria.

Crude Existence Kristin Reed, 2009-11-15 After decades of civil war and instability, the African country of Angola is experiencing a spectacular economic boom thanks to its most valuable natural resource: oil. Focusing on the everyday realities of people living in the extraction zones, Reed explores the exclusion, degradation, and violence that are the fruits of petrocapitalism in Angola.

Chart No. 1 Nima, 2010 Chart Number One is essential to correct and accurate use of nautical charts. More than a chart, it is a book that defines the symbols, abbreviations and terms used on charts. It also provides important information about buoys, light visibility (range) and aids to navigation. This new and improved edition from Paradise Cay is a complete and accurate high quality reproduction of information provided by NOAA and NIMA.

War Photographs Taken on the Battlefields of the Civil War Mathew B. Brady, Alexander Gardner, 2013-06-01 Fought over the course of four years, the Civil War pitted countrymen against countrymen, North versus South, friend against friend, and brother against brother. The photographs within these pages document the war that united America as one. These rare shots were taken in the middle of the battlefield during the earliest days of photography. Selected from a collection of seven thousand original negatives, these historic photos capture nearly every aspect of Civil War life. Among these photos are images of camps sprawling across acres, soldiers at their battlements, firing of heavy

artillery, the aftermath of battle, and the terror that these young men faced. See first-hand of Union and Confederate officers strategizing their next moves, and Abraham Lincoln addressing his Union commanders. Originally released from the private collection of Edward Bailey Eaton in 1907, this edition is a must have for any Civil War buff or historian. No collection can be considered complete without these photographs by Matthew Brady and Alexander Gardner, as well as the meticulous passages that put the images in illuminating context.

Microfluidics and Nanofluidics Handbook Sushanta K. Mitra, Suman Chakraborty, 2016-04-19 This comprehensive handbook presents fundamental aspects, fabrication techniques, introductory materials on microbiology and chemistry, measurement techniques, and applications of microfluidics and nanofluidics. The second volume focuses on topics related to experimental and numerical methods. It also covers fabrication and applications in a variety of areas, from aerospace to biological systems. Reflecting the inherent nature of microfluidics and nanofluidics, the book includes as much interdisciplinary knowledge as possible. It provides the fundamental science background for newcomers and advanced techniques and concepts for experienced researchers and professionals.

Haunted Indiana 4 Mark Marimen, 2005-09 *Haunted Indiana 4* delves once more into the eerie side of Indiana history with new and old tales from across the state: * The spirit of America's most prolific female serial killer who is said to haunt her former home in La Porte; * The ghost of a grave robber said to walk the paths of a cemetery in New Albany; * A ghost town near Nashville that truly lives up to the term Ghost Town; * The gentle story of a grandfather's spirit who made a phone call from beyond the grave to aid his granddaughter when she needed it most; * Tales of enigmatic spirits of former prisoners who are serving a more than life sentence at the Old Jail Museum in Valparaiso; * A series of ghostly tales told within the ranks of the police from across the state; and many more. . Also included in *Haunted Indiana 4* is an audio CD narrated by Mark Marimen with four stories - including one never before published.

The Political Economy of the Hospital in History Martin Gorsky, Margarita Vilar Rodríguez, Jerònia Pons Pons, 2020 The modern hospital is at once the site of healing, the locus of medical learning and a cornerstone of the welfare state. Its technological and infrastructural costs have transformed health services into one of today's fastest growing sectors, absorbing substantial proportions of national income in both developed and emerging economies. The aim of this book is to examine this growth in different countries, with a main focus on the twentieth century, and also with a backward glance to

earlier shaping forces. It will explore the hospital's economic history, the relationship between public and private forms of provision, and the political context in which health systems were constructed. The collection advances the historical world map of different hospital models, ranging across Spain, Brazil, Germany, East and Central Europe, Britain, the United States and China. Collectively, these comparative cases illuminate the complexities involved in each country and bring new historical evidence to current debates on health care organisation, financing and reform.

Airline Operations and Management Gerald N. Cook, Bruce G. Billig, 2023-05-04 *Airline Operations and Management: A Management Textbook* presents a survey of the airline industry, with a strong managerial perspective. It integrates and applies the fundamentals of several management disciplines, particularly operations, marketing, economics and finance, to develop a comprehensive overview. It also provides readers with a solid historical background, and offers a global perspective of the industry, with examples drawn from airlines around the world. Updates for the second edition include: Fresh data and examples A range of international case studies exploring real-life applications New or increased coverage of key topics such as the COVID-19 pandemic, state aid, and new business models New chapters on fleet management and labor relations and HRM Lecture slides for instructors This textbook is for advanced undergraduate and graduate students of airline management, but it should also be useful to entry and junior-level airline managers and professionals seeking to expand their knowledge of the industry beyond their functional area.
