The Global Governance of Knowledge Peter Drahos,2010-01-28 Patent offices around the world have granted millions of patents to multinational companies. Patent offices are rarely studied and yet they are crucial agents in the global knowledge economy. Based on a study of forty-five rich and poor countries that takes in the world's largest and smallest offices, Peter Drahos argues that patent offices have become part of a globally integrated private governance network, which serves the interests of multinational companies, and that the Trilateral Offices of Europe, the USA and Japan make developing country patent offices part of the network through the strategic fostering of technocratic trust. By analysing the obligations of patent offices under the patent social contract and drawing on a theory of nodal governance, the author proposes innovative approaches to patent office administration that would allow developed and developing countries to recapture the public spirit of the patent social contract.

The Three U.S.-Mexico Border Wars Tony Payan,2016-10-11 This book addresses the three central issues that continue to dominate the U.S.-Mexico relationship today: drugs, immigration, and security. Nowhere is this more palpable than at the 2,000-mile border shared by the two countries. The U.S.-Mexico border remains a hot topic in the news—and a contentious one. This second edition of a popular work brings readers up to date on what is really going on at the U.S.-Mexico border and why. The book offers a detailed, history-based examination of the evolution of current conditions on the border, arguing that they exist due to a steady growth in the security concerns of the United States over almost two centuries. The author shows how the border has gone through four historical stages that, ultimately, have crippled the region, sacrificing its ability to produce prosperity in exchange for greater security. Combining depth and breadth, the book covers the economic relationship between Mexico and the United States, the deployment of technology, the bureaucratic interests that control the border landscape, the democratic deficit, and a detrimental lack of policy coordination. Issues such as drug trafficking and homeland security are considered as well. Demonstrating the internal and contradictory logic of American policy toward the border, the author argues that current conditions could lead to a return of authoritarianism in Mexico and a concurrent rise in anti-American sentiment.

The Crash of A Civilization Kanchan Banerjee,2022-07-13 The Current condition of each citizen, the society, and the nation are the result of a deeply complex history. But what we know from history books, especially academic textbooks, are constructs based on the narratives of political powers, colonists, and outdated socioeconomic analysts. The time has come to know and understand our true history from fresh and updated perspectives. The subject of this book is how foreign ideologies and forces Christian, Islamic, and later colonists, western and Marxists' profound and long-term influence have impacted India, her society, and people. With a computer science back- ground, Kanchan Banerjee makes this remarkable and significant contribution, attempting to depict the current era with unique and lively storytelling using carefully studied evidence, logical deduction, and analysis. He has given detailed and comprehensive descriptions and assessments from pre-Islamic Arabia's history, foreign attacks and invasions of the Huns, the Turks to the Islamic rule and occupation in Delhi, and the British colonial and imperial atrocities. How did the crash and fall of a great ancient civilization happen? How has it been wounded the body and soul of a nation to break into several pieces? And what is the way to change the direction to the path of recovery and revival? This book is an effort to find the answers to these questions from our true history. If we know our past, we can change our future as well.

Digital Labour and Karl Marx Christian Fuchs,2014-01-03 How is labour changing in the age of computers, the Internet, and social media such as Facebook, Google, YouTube and Twitter? In Digital Labour and Karl Marx, Christian Fuchs attempts to answer that question, crafting a systematic critical theorisation of labour as performed in the capitalist ICT industry. Relying on a range of global case studies--from unpaid social media prosumers or Chinese hardware assemblers at Foxconn to miners in the Democratic Republic of Congo--Fuchs sheds light on the labour costs of digital media, examining the way ICT corporations exploit human labour and the impact of this exploitation on the lives, bodies, and minds of workers.

East Sails West Stephen Davies,2013-12-01 In December 1846, the Keying, a Chinese junk purchased by British investors, set sail from Hong Kong for London. Named after the Chinese Imperial Commissioner who had signed away Hong Kong to the British, manned by a Chinese and European crew, and carrying a travelling exhibition of Chinese items, theKeying had a troubled voyage. After quarrels on the way and a diversion to New York, culminating in a legal dispute over arrears of wages for Chinese members of the crew, it finally reached London in 1848, where it went on exhibition on the River Thames until 1853. It was then auctioned off, towed to Liverpool, and finally broken up. In this account of the ship, the crew and the voyage, Stephen Davies tells a story of missed opportunities, with an erratic course, overambitious aims, and achievements born of lucky breaks—a microcosm, in fact, of early Hong Kong and of the relations between China and the West.
