**The Impact of Globalization on the United States** Michelle Bertho, Beverly Crawford, Edward A. Fogarty, 2008-09-30 Over the past decade, a virtual cottage industry has arisen to produce books and articles describing the nature, origins, and impact of globalization. Largely and surprisingly absent from this literature, however, has been extensive discussion of how globalization is affecting the United States itself. Indeed, it is rarely even acknowledged that while the United States may be providing a crucial impetus to globalization, the process of globalization – once set in motion – has become a force unto itself. Thus globalization has its own logic and demands that are having a profound impact within the United States, often in ways that are unanticipated. This set offers the first in-depth, systematic effort at assessing the United States not as a globalizing force but as a nation being transformed by globalization. Among the topics studied are globalization in the form of intensified international linkages; globalization as a universalizing and/or Westernizing force; globalization in the form of liberalized flows of trade, capital, and labor; and globalization as a force for the creation of transnational and superterritorial entities and allegiances. These volumes examine how each of these facets of globalization affects American government, law, business, economy, society, and culture.

**Innovation under the Radar** Xiaolan Fu, 2020-12-17 Investigating the nature, drivers and sources of innovation in Africa, this book examines the channels for effective diffusion of innovation in and to Africa under institutional, resource and affordability constraints. Fu draws on almost a decade of research on innovation in Africa to explore these issues and unpack the process, combining a rigorous statistical analysis of a purposely designed multi-wave, multi-country survey with in-depth studies of representative cases. Building on this research, Fu argues that African firms are innovative but unsupported. Those 'under-the-radar' innovations that widely exist in Africa as a result of the constraints are not sufficient to enable Africa to leapfrog the innovation gap in the era of the fourth Industrial Revolution. This is the first comprehensive analysis of the creation and diffusion of innovation in low income countries. It also provides the first survey-based analysis of innovation in the informal economy.

*Quantum Leadership: Building Better Partnerships for Sustainable Health* Tim Porter-O'Grady, Kathy Malloch, 2014-04-01 Quantum Leadership: Transdisciplinary leadership in complex systems Quantum Leadership: Building Better Partnerships for Sustainable Health, Fourth Edition skillfully prepares graduate students to thrive in a world of healthcare reform, complexity, and essential caring service. The Fourth Edition focuses on the current concepts of leadership, data, and research related to the complexities of leadership. The text also emphasizes the importance of principle-driven approaches and minimizes specific procedure-based solutions. This text is a seminal work around the complexity leadership as it applies to healthcare. There are very few other references that have the clarity, depth, and detail essential to enumerate this topic in healthcare organizations. It is especially valuable for graduate programs and DNP programs as it provides a foundation for contemporary leadership and emphasizes the characteristics necessary to lead complex organizations. The Fourth Edition features an additional chapter on the complexity of leadership in health care reform in an effort to incorporate the newest requirements of the Patient Protection Affordable Care Act in a manner that is relevant to leadership development and capacity. Case studies found within each chapter help reinforce translational work while new application exercises found in the The Quantum Workbook are an excellent supplement for learning. Additional updates to the text include: chapter podcasts, additional translational and learning material related to chapter case studies. Lastly, all references have been revised and updated to reflect the most current evidence around learning leadership.

**Legal Issues in Electronic Banking** Norbert Horn,2002-12-18 Although electronic banking is rapidly overtaking direct bank-to-customer and bank-to-bank contact and seems to be moving forward without serious problems the law governing this telecommunication-based business is not always clearly defined in relation to certain issues that arise with ever-greater frequency, especially in cross-border transactions. This is the first book to investigate and present the applicable legal consensus for each of these important issues, based on existing legislation and relevant judicial decisions. The legal issues in question arise from such events, activities, and actualities as the following, all of which are treated in this book: determination of local jurisdiction applicability of contractual obligations; probative value of digital documents electronic evidence electronic money protection of privacy day-trading facilities web marketing of lending services electronic bills of lading Internet stock offerings electronic determination of title outsourcing of electronic banking functions Eighteen outstanding authors, bankers, lawyers, and academics contribute their expertise to elucidate the issues and their implications. They draw their legal analyses from international norms such as the UNCITRAL Model Law, relevant EC directives and draft directives, the United States Uniform Electronic Transaction Act (UETA) and E-Sign Act and other national laws, as well as from numerous court decisions in Europe and the United States. The essays are based on papers originally presented at a conference sponsored by the Law Centre for European and International Cooperation (R.I.Z.) and held at Cologne in April 2001. Legal Issues in Electronic Banking will be of great value to anyone involved in banking or financial services. It could be said that what it sets forth is nothing less than the future mode of financial transactions.
