*Digital Media and Textuality* Daniela Côrtes Maduro,2017-12-31 Due to computers' ability to combine different semiotic modes, texts are no longer exclusively comprised of static images and mute words. How have digital media changed the way we write and read? What methods of textual and data analysis have emerged? How do we rescue digital artifacts from obsolescence? And how can digital media be used or taught inside classrooms? These and other questions are addressed in this volume that assembles contributions by artists, writers, scholars and editors such as Dene Grigar, Sandy Baldwin, Carlos Reis, and Frieder Nake. They offer a multiperspectival view on the way digital media

have changed our notion of textuality.

*The Domestic and the Foreign in Architecture* Ruth Baumeister, Sang Lee, 2007 For centuries, across nations, dialogue between the domestic and the foreign has affected and transformed architecture. Today these dialogues have become highly intensified. *The Domestic and the Foreign in Architecture* examines how these exchanges manifest themselves in contemporary architecture, in terms of its aesthetic potential and its practice, which, in turn, are impacted by broad economic, cultural and political issues. This book traces how diverse cultural encounters inevitably modify conventional categories, standards and codes of architecture, such as domestic identity, its political and economic representations and the negotiations with what is deemed foreign. Theoretical reflections by distinguished scholars are accompanied by interviews with some of the most influential architects practicing today, as well as stunning visual presentations by professional photographers.

**The Politics of Disgust** Ange-Marie Hancock, 2004-12-01 Winner of the 2006 Race, Ethnicity, and Politics Organized Section Best First Book Award from the American Political Science Association Winner of the 2006 W.E.B. DuBois Book Award from the National Conference of Black Political Scientists Ange-Marie Hancock argues that longstanding beliefs about poor African American mothers were the foundation for the contentious 1996 welfare reform debate that effectively ended welfare as we know it. By examining the public identity of the so-called welfare queen and its role in hindering democratic deliberation, *The Politics of Disgust* shows how stereotypes and politically motivated misperceptions about race, class and gender were effectively used to instigate a politics of disgust. The ongoing role of the politics of disgust in welfare policy is revealed here by using content analyses of the news media, the 1996 congressional floor debates, historical evidence and interviews with welfare recipients themselves. Hancock's incisive analysis is both compelling and disturbing, suggesting the great limits of today's democracy in guaranteeing not just fair and equitable policy outcomes, but even a fair chance for marginalized citizens to participate in the process.

**Oudry's Painted Menagerie** Mary Morton, 2007-06-25 In the 1720s and 1730s, Jean-Baptiste Oudry established himself as the preeminent painter in France of hunts, animals, still lifes, and landscapes. Oudry's *Painted Menagerie* focuses on a suite of eleven life-size portraits of exotic animals from the royal menagerie at Versailles, painted by Oudry between 1739 and 1752. These paintings eventually found their way into the ducal collection in Schwerin, Germany. Among them is the magnificent portrait of Clara, an Indian rhinoceros who became a celebrity in mid-eighteenth-century Europe. Her portrait has been out of public view for more than a century, and it is presented here in its newly conserved state.
