**Migrant Workers' Education in China** Fusheng Jia,2022-06-16 Based on an extended period of ethnographic research and observation of migrant workers' educational programmes, this book presents a theoretical exploration of social and educational issues in an industrialised area in south China. It highlights the tensions existing between the traditional ideology stressing collectivism, selfless devotion and teacher-centred teaching, and the new social practices promoting commercialization, personal development and interactive teaching. The author provides first-hand descriptions and analyses of rural-urban migrant workers' lives, work and education. He develops the ethnographic approach by analysing the tensions and contradictions in the implementation processes of educational policies in the region. The book argues that the educational programmes, which focused on elite workers to support the development of industrialization and urbanization projects, assisted migrant workers as students in promoting their aspirations. However, this also stratified migrant workers, thus increasing gaps in socioeconomic status and professional development. Education policy design and implementation are observed as a dynamic process, thus contributing to a nuanced understanding of adult education and migration at a micro level.

**Think Bayes** Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

**From Scratch** David Moscow,Jon Moscow,2022-10-25 PUBLISHERS WEEKLY BESTSELLER Gold Award Winner in "Food, Cooking, & Healthy Eating" Category of the the Nautilus Awards "Unadulterated, smart, beautifully rendered, and often thrilling... This is delicious, adventuresome entertainment for the mind, soul, heart, and stomach." —Kirkus Review "Adventurous Anthony Bourdain-esque eaters and readers will savor David Moscow's every word as he travels far (Ciao, sea of Sardinia) and near (howdy, Texas plains) to learn from farmers, hunters, fisherfolk, and scientists about how our food reaches our plates." —Reader's Digest David Moscow, the creator and star of the groundbreaking series From Scratch, takes us on an exploration of our planet's complex and interconnected food supply, showing us where our food comes from and why it matters in his new book of global culinary adventures. In an effort to help us reconnect with the food that sustains our lives, David Moscow has spent four years going around the world, meeting with rock-star chefs, and sourcing ingredients within local food ecosystems—experiences taking place in over twenty countries that include milking a water buffalo to make mozzarella for pizza in Italy; harvesting oysters in Long Island Sound and honey from wild bees in Kenya; and making patis in the Philippines, beer in Malta, and sea salt in Iceland. Moscow takes us on deep dives (sometimes literally) with fisherfolk, farmers, scientists, community activists, historians, hunters, and more, bringing back stories of the communities, workers, and environments involved—some thriving, some in jeopardy, all interconnected with food. The result is this travel journal that marvels in the world around us while simultaneously examining the environmental issues, cultural concerns, and overlooked histories intertwined with the food we eat to survive and thrive. Through the people who harvest, hunt, fish, and forage each day, we come to understand today's reality and tomorrow's risks and possibilities.

**Corporate Governance, Enforcement and Financial Development** Chen Ding, 2013-01-01 Ding Chen's detailed institutional analysis of the development of the Chinese stock market brings the question of enforcement to centre stage. In doing so, she not only introduces readers to the particularities of the Chinese system; she also sheds new light on conventional debates about the law and economics of corporate governance. Dr Andrew Johnston, University of Sheffield, UK In this book Dr Ding Chen has made an important theoretical contribution to our understanding of corporate governance in transitional economies and of corporate governance in China especially. Drawing upon the insights of New Institutional Economics theory she examines the interplay between formal and informal enforcement mechanisms relating to corporate governance in China. To support this argument the book breaks new ground by providing a comprehensive examination of enforcement actions in China's stock market; her findings are at variance from conclusions found in other research, such as in the law and finance literature. Rather than simply imitating the dominant Anglo-American model of corporate governance, she argues that local conditions will greatly affect the choice of the most appropriate governance models. This has been especially so in China. Dr Roman Tomasic, University of South Australia and Durham Law School, UK This important new book attempts to establish a fresh conceptual framework for the study of corporate governance by employing the new institutional economics of contract enforcement. This framework helps to clarify two critical issues including the role of law in financial development and whether there is an optimal corporate governance model that should be followed by countries attempting to develop their own stock markets. Applying this novel framework, the author conducts a comprehensive study on Chinese corporate governance and discovers that the Chinese stock market has rapidly expanded even in the absence of any effective institutions. She provides a credible explanation to this 'China puzzle' by arguing that the growth of the stock market is mainly driven by state guarantees, institutional rent seeking by state-owned companies, financial repression and investors' speculation. Indeed, there is probably nowhere better to look than China's stock market to assess the limits of the gradualist approach to financial development. As the book explains, the potential efficiency gains that could be created by a healthy, well-functioning stock market have been completely outweighed by the consideration of maintaining the existing political system. This book will appeal to scholars and students of economics and law with an interest in corporate governance, Chinese economic development and new institutional economics.

God's Word on Canvas Joe Garland, Cindy Garland, Jim Eichenberger, 2010-06 For centuries, the Bible's dramatic accounts have inspired artists to express the beauty, emphasize the power, and elaborate on the meaning of God's Word. Each elective study in the Through Artists' Eyes series is designed to help people connect classic art to the Bible and then apply the truths discovered to their own lives. In God's Word on Canvas you'll experience the artistry of six classic paintings while discovering and discussing the scriptural inspiration behind each one. You'll explore the themes of hope, belief, purpose, God's will, strength, and the future. Each of the six sessions includes: • Preparing the Canvas—an introductory, group-building activity that gives members an opportunity to share opinions about the main theme of study • Painting the Big Picture—an examination of the work, life, and thoughts of the artist • Framing the Art—a Bible study that places the work of the artist within biblical context • Adding It to the Gallery—discussion questions that encourage group members to apply the principles of the study to daily life Additionally, each study features margin notes, tips for projecting the art, definitions of art terms, and suggested supplemental resources for further exploration.

The Political Economy of Aid in Palestine Sahar Taghdisi-Rad, 2010-10-04 Despite for many years receiving the highest per capita aid worldwide, the economies of the West Bank and Gaza Strip have failed to achieve any lasting developmental outcomes and suffer from major weaknesses which undermine their very survival. This book argues that the dominant, mainstream approach to the study of aid and aid effectiveness is theoretically and empirically inadequate for a comprehensive understanding and analysis of the workings of aid in developing countries, particularly those undergoing conflict. This book examines the nature of donor operations in Palestine, highlighting the political and ideological determinants of aid allocation and effectiveness, and focussing on the role of trade-related donor assistance in Palestine, more commonly known as Aid for Trade. It discusses how such trade-related assistance is only another instance of donors working 'around' the conflict, as opposed to taking it into account; and how aid to Palestine cannot bring about significant improvement as long as the Palestinian economy is fundamentally affected by Israeli occupation, settlements and blockade. It argues that unless restructured and more carefully targeted, aid can only act as a temporary relief mechanism. Furthermore, the book sheds light on critical areas within Palestinian territories that are in need of development and require significant and immediate attention at both national and international level.
