**Think Bayes** Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Introduced in the Buddha's own lifetime, Pure Land practice puts us in touch with the beauty in our own world and brings us the security, solidity, and freedom we need in order to truly enjoy it. **Corporate Governance, Enforcement and Financial Development** Chen Ding,2013-01-01  
ÔDing ChenÕs detailed institutional analysis of the development of the Chinese stock market brings the question of enforcement to centre stage. In doing so, she not only introduces readers to the particularities of the Chinese system; she also sheds new light on conventional debates about the law and economics of corporate governance.Ô Ð Andrew Johnston, University of Sheffield, UK ÔIn this book Dr Ding Chen has made an important theoretical contribution to our understanding of corporate governance in transitional economies and of corporate governance in China especially. Drawing upon the insights of New Institutional Economics theory she examines the interplay between formal and informal enforcement mechanisms relating to corporate governance in China. To support this argument the book breaks new ground by providing a comprehensive examination of enforcement actions in ChinaÕs stock market; her findings are at variance from conclusions found in other research, such as in the law and finance literature. Rather than simply imitating the dominant Anglo-American model of corporate governance, she argues that local conditions will greatly affect the choice of the most appropriate governance models. This has been especially so in China.Ô Ð Roman Tomasic, University of South Australia and Durham Law School, UK This important new book attempts to establish a fresh conceptual framework for the study of corporate governance by employing the new institutional economics of contract enforcement. This framework helps to clarify two critical issues including the role of law in financial development and whether there is an optimal corporate governance model that should be followed by countries attempting to develop their own stock markets. Applying this novel framework, the author conducts a comprehensive study on Chinese corporate governance and discovers that the Chinese stock market has rapidly expanded even in the absence of any effective institutions. She provides a credible explanation to this ÔChina puzzleÕ by arguing that the growth of the stock market is mainly driven by state guarantees, institutional rent seeking by state-owned companies, financial repression and investorsÕ speculation. Indeed, there is probably nowhere better to look than ChinaÕs stock market to assess the limits of the gradualist approach to financial development. As the book explains, the potential efficiency gains that could be created by a healthy, well-functioning stock market have been completely outweighed by the consideration of maintaining the existing political system. This book will appeal to scholars and students of economics and law with an interest in corporate governance, Chinese economic development and new institutional economics.

**God's Word on Canvas** Joe Garland,Cindy Garland,Jim Eichenberger,2010-06 For centuries, the Bible's dramatic accounts have inspired artists to express the beauty, emphasize the power, and elaborate on the meaning of God's Word. Each elective study in the Through Artists' Eyes series is designed to help people connect classic art to the Bible and then apply the truths discovered to their own lives. In God's Word on Canvas you'll experience the artistry of six classic paintings while discovering and discussing the scriptural inspiration behind each one. You'll explore the themes of hope, belief, purpose, God's will, strength, and the future. Each of the six sessions includes:

- Preparing the Canvas—an introductory, group-building activity that gives members an opportunity to share opinions about the main theme of study
- Painting the Big Picture—an examination of the work, life, and thoughts of the artist
- Framing the Art—a Bible study that places the work of the artist

within biblical context • Adding It to the Gallery—discussion questions that encourage group members to apply the principles of the study to daily life Additionally, each study features margin notes, tips for projecting the art, definitions of art terms, and suggested supplemental resources for further exploration.

**The Price of China's Economic Development** Zhaohui Hong,2015-07-21 The People's Republic of China has experienced significant transformations since Deng Xiaoping instituted economic reforms in 1978. Subsequent leaders continued and often broadened Deng's policies, shifting the nation from agrarianism to industrialism, from isolation to internationalism, and from centralized planning to market-based economics. As the world strives to understand the nation's rapid development, few observers have comprehensively examined the social and cultural price of the economic boom for the majority of the Chinese people. Zhaohui Hong assesses the sociocultural consequences of these reforms in this provocative study. He contends that modern China functions as an oligarchy or plutocracy ruled by an alliance of political power and private capital where the boundaries between the private and public sectors are constantly shifting. This power-capital institution based on three millennia of Confucian ideology and decades of Maoist communism exercises monopolistic control of public resources at the expense of civil society and social justice for the majority of citizens. The Price of China's Economic Development urges policymakers to alter their analytic lens. While industrial and commercial development is quantitatively measured, Hong argues that social progress should be assessed qualitatively, with justice its ultimate goal and fair allocation of resources and opportunity as the main index of success. This sophisticated analysis introduces English speakers to the varied and significant work of contemporary Chinese scholars and substantially enriches the international dialogue.

**Managing risks to build climate-smart and resilient agrifood value chains** Food and Agriculture Organization of the United Nations,2022-05-13 This work provides a preliminary analysis of the key climate risks affecting agrifood value chains and opportunities for climate services that reach stakeholders involved in all stages of the value chain, from agrifood production to harvest, storage and refrigeration, processing and packaging, transportation, markets, trade and consumption. Climate services provide opportunities to effectively and comprehensively mainstream climate risk management across the entire agrifood value chain, in addition to increasing sustainability and efficiency in the face of changing climate conditions. This report provides significant primary information and recommendations on the development of climate services across the agrifood value chain with a view to systematically enhance sustainable and resilient opportunities. It also provides a basis for further research and investment funding in this area. Its findings could spark follow-up research and public and private investment.

*MEDINFO 2019: Health and Wellbeing e-Networks for All* L. Ohno-Machado,B. Séroussi,2019-11-12 Combining and integrating cross-institutional data remains a challenge for both researchers and those involved in patient care. Patient-generated data can contribute precious information to healthcare professionals by enabling monitoring under normal life conditions and also helping patients play a more active role in their own care. This book presents the proceedings of MEDINFO 2019, the 17th World Congress on Medical and Health Informatics, held in Lyon, France, from 25 to 30 August 2019. The theme of this year's conference was 'Health and Wellbeing: E-Networks for All', stressing the increasing importance of networks in healthcare on the one hand, and the patient-centered perspective on the other. Over 1100 manuscripts were submitted to the conference and, after a thorough review process by at least three reviewers and assessment by a scientific program committee member, 285 papers and 296 posters were accepted, together with 47 podium abstracts, 7 demonstrations, 45 panels, 21 workshops and 9 tutorials. All accepted paper and poster contributions are included in these proceedings. The papers are grouped under four thematic tracks: interpreting health and biomedical data, supporting care delivery, enabling precision medicine and public health, and the human element in medical informatics. The posters are divided into the same four groups. The book presents an overview of state-of-the-art informatics projects from multiple regions of the world; it will be of interest to anyone working in the field of medical informatics.

*Revisionism and Diversification in New Religious Movements* Eileen Barker,2016-04-08 New Religious Movements tend to start their lives with a number of unequivocal statements, not only of a theological nature but also about the world and appropriate behaviours for the believer. Yet these apparently inalienable Truths and their interpretations frequently become revised, 'adjusted' or selectively adopted by different believers. This book explores different ways in which, as NRMs develop, stagnate, fade away, or abruptly cease to exist, certain orthodoxies and practices have, for one reason or another, been dropped or radically altered. Sometimes such changes are adapted by only a section of the movement, resulting in schism. Of particular concern are processes that might lead to violent and/or anti-social behaviour. As part of the Ashgate/Inform series, and in the spirit of the Inform Seminars, this book approaches its topic from a wide range of perspectives. Contributors include academics, current and former members of NRMs, and members of 'cult-watching' movements. All the contributions are of a scholarly rather than a polemic nature, and brought

together by Eileen Barker, the founder of Inform.
