**Affirmative Action Matters** Laura Dudley Jenkins, Michele S. Moses, 2014-04-04 Affirmative Action Matters focuses specifically on affirmative action policies in higher education admissions, the sphere that has been the most controversial in many of the nations that have such policies. It brings together distinguished scholars from diverse nations to examine and discuss the historical, political and philosophical contexts of affirmative action and clarify policy developments to further the meaningful equality of educational opportunity. This unique volume includes both well established and emerging policies from the Americas, Europe, Africa, and Asia, policies which developed under a variety of political systems and target a range of underrepresented groups, based on race, ethnicity, gender, class, social background, or region. Accessible and thought provoking case studies of affirmative action demonstrate that such policies are expanding to different countries and target populations. While some countries, such as India, have affirmative action policies that predate those in the United States, affirmative action is a recent development in countries such as Brazil and France. Legal or political pressures to move away from explicitly race-based policies in several countries have complicated affirmative action and make this assessment of international alternatives particularly timely. New or newly modified policies target a variety of disadvantaged groups, based on geography, class, or caste, in addition to race or sex. International scholars in six countries spanning five continents offer insights into their own countries' experiences to examine the implications of policy shifts from race toward other categories of disadvantage, to consider

best practices in student admission policies, and to assess the future of affirmative action.

The Threat of Pandemic Influenza Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2005-04-09 Public health officials and organizations around the world remain on high alert because of increasing concerns about the prospect of an influenza pandemic, which many experts believe to be inevitable. Moreover, recent problems with the availability and strain-specificity of vaccine for annual flu epidemics in some countries and the rise of pandemic strains of avian flu in disparate geographic regions have alarmed experts about the world's ability to prevent or contain a human pandemic. The workshop summary, *The Threat of Pandemic Influenza: Are We Ready?* addresses these urgent concerns. The report describes what steps the United States and other countries have taken thus far to prepare for the next outbreak of killer flu. It also looks at gaps in readiness, including hospitals' inability to absorb a surge of patients and many nations' incapacity to monitor and detect flu outbreaks. The report points to the need for international agreements to share flu vaccine and antiviral stockpiles to ensure that the 88 percent of nations that cannot manufacture or stockpile these products have access to them. It chronicles the toll of the H5N1 strain of avian flu currently circulating among poultry in many parts of Asia, which now accounts for the culling of millions of birds and the death of at least 50 persons. And it compares the costs of preparations with the costs of illness and death that could arise during an outbreak.

**Nanotheranostics for Cancer Applications** Prakash Rai, Stephanie A. Morris, 2018-11-12 This book is the first to focus specifically on cancer nanotheranostics. Each of the chapters that make up this comprehensive volume is authored by a researcher, clinician, or regulatory agency member known for their expertise in this field. Theranostics, the technology to simultaneously diagnose and treat a disease, is a nascent field that is growing

rapidly in this era of personalized medicine. As the need for cost-effective disease diagnosis grows, drug delivery systems that can act as multifunctional carriers for imaging contrast and therapy agents could provide unique breakthroughs in oncology.

Nanotechnology has enabled the development of smart theranostic platforms that can concurrently diagnose disease, start primary treatment, monitor response and initiate secondary treatments if required. In oncology, chemotherapeutics have been routinely used. Some drugs have proven effective but all carry risks of adverse side effects. There is growing interest in using remotely triggered drug delivery systems to limit cytotoxicity in the diseased area. This book reviews the use of theranostic nanoparticles for cancer applications over the past decade. First, it briefly discusses the challenges and limitations of conventional cancer treatments, and presents an overview of the use of nanotechnology in treating cancer. These introductory chapters are followed by those exploring cancer diagnosis and a myriad of delivery methods for nanotherapeutics. The book also addresses multifunctional platforms, treatment monitoring, and regulatory considerations. As a whole, the book aims to briefly summarize the development and clinical potential of various nanotheranostics for cancer applications, and to delineate the challenges that must be overcome for successful clinical development and implementation of such cancer theranostics.

Blue Economy and Ocean Sustainable Development in a Globalised World: Social, Political, Economic and Environmental Issues Ibukun J. Adewumi, Andrei Polejack, Joanna Vince, Maree E. Fudge, 2023-12-05 In the last decade, the concept of a Blue Economy has ignited a deep theoretical debate. Ranging from the integration of the triple bottom line of sustainability to the optimization of profit from ocean exploitation, the meaning of the term blue economy differs considerably between epistemic communities and even more so among national and regional policies. There is a general sense of the opportunity to realise

enhanced social and economic benefits from the sustainable utilisation of their ocean and coastal resources under the umbrella framework of blue economy. Blue economy is gaining traction already as a significant component of national policies, even in spite of a clear conceptualization of the term. Many countries are now preparing national policies towards realising their blue economy ambitions, utilizing the concept as they see fit. Likewise, multilateral and regional organisations are developing guidelines, and providing investment in new research, technologies, and financing tools that promote blue economy. Critical challenges abound, in particular in less privileged countries. These include the gap in research capabilities, governments prioritizing social wellbeing and economic profit in contrast to environmental protection, the identification of new and emerging areas of ocean economic activity that are both socially and ecologically sustainable and holds viable business models that can attract private investment.

**Trouble Shooter** Louis L'Amour, 2004-08-31 Hopalong Cassidy has received a message from the dead. Answering an urgent appeal for help from fellow cowpuncher Pete Melford, he rides in only to discover that his old friend has been murdered and the ranch Pete left to his niece, Cindy Blair, has vanished without a trace. Hopalong may have arrived too late to save Pete, but his sense of loyalty and honor demands that he find that cold-blooded killers and return to Cindy what is rightfully hers. Colonel Justin Tredway, criminal kingpin of the town of Kachina, is the owner of the sprawling Box T ranch, and he has built his empire with a shrewd and ruthless determination. In search of Pete's killers and Cindy's ranch, Hopalong signs on at the Box T, promising to help get Tredway's wild cattle out of the rattler-infested brush. But in the land of mesquite and black chaparral, Cassidy confronts a mystery as hellish as it is haunting—a bloody trail that leads to the strange and forbidding Babylon plateau, to

\$60,000 in stolen gold, and to a showdown with an outlaw who has already cheated death once . . . and is determined to do it again.

*Flu* Gina Kolata,2011-04-01 Veteran journalist Gina Kolata's *Flu: The Story of the Great Influenza Pandemic of 1918 and the Search for the Virus That Caused It* presents a fascinating look at true story of the world's deadliest disease. In 1918, the Great Flu Epidemic felled the young and healthy virtually overnight. An estimated forty million people died as the epidemic raged. Children were left orphaned and families were devastated. As many American soldiers were killed by the 1918 flu as were killed in battle during World War I. And no area of the globe was safe. Eskimos living in remote outposts in the frozen tundra were sickened and killed by the flu in such numbers that entire villages were wiped out. Scientists have recently rediscovered shards of the flu virus frozen in Alaska and preserved in scraps of tissue in a government warehouse. Gina Kolata, an acclaimed reporter for *The New York Times*, unravels the mystery of this lethal virus with the high drama of a great adventure story. Delving into the history of the flu and previous epidemics, detailing the science and the latest understanding of this mortal disease, Kolata addresses the prospects for a great epidemic recurring, and, most important, what can be done to prevent it.
